		installation of new basement windows and basement window enclosures						Applicant	Jason M Roche, Address:775 MOUNTAIN ROAD, Phone:(205) 249-3194
		Place Everlast Basement Window™ in opening using shims level entire window in opening. Using a window and door foam that has minimal expansion properties is best so it won't bow in the window jambs. Leave the foam to set for 15 minutes to allow for expansion and cure time. Next, tape off the window jambs to protect the jamb and window. Use a small bead of hydraulic cement or textured FlexiCaulk™ on the interior and exterior of the window. Allow time for cement to set up and remove tape.						Contractor	* CT Basement Systems, Inc., Address:33 Progress Avenue, Phone:(800) 541-0487 Ext:19458
		-----						Contractor	* CT Basement Systems, Inc., Address:33 Progress Avenue, Phone:(800) 541-0487 Ext:19458
		Start installation by digging out and removing old well. Dig out hole an additional 6" to 12" deep and clean wall surrounding window of any debris. Replace 6" to 12" of material previously removed with 3/4" clean stone for drainage. Set Sunhouse well into hole and check fit around surface of window, add or remove gravel as necessary to get elevation correct. (Lip of well should be 1" above finished grade). Drill (2) 1/4" on left and right side of SunHouse Well (No fasteners are required along bottom) Hammer in (2) 1/4" expandable fasteners into predrilled holes to secure well to masonry wall, seal sides only with textured polyurethane sealer (do not seal bottom of well). Backfill perimeter of well with soil to grade and within 1" of well lip, secure cover with small screws along lip. Ext. rings are modular and can be stacked as tall as necessary. Procedure for connection of base and ext. ring: Run a 1/4" bead of clear silicone along the surface of the ext. ring that meets the top ring of the Sunhouse base if required. Align the ext. ring and base so the surface that mounts to the foundation are flush to one another. Use 1 of the supplied stainless-steel screws to fasten the base and extension ring. Repeat procedure on other side of Sunhouse. After both sides are aligned, flush and fastened use 3 remailing screws to connect base and ext. ring 1 directly in the center of the and 1 on the left and right radius of the flange to create uniform support.
