

WHAT IS STREAM?

EXCITING
CHANGES COMING
FALL 2023

OUR UPDATED SPECIAL AREA

The OHES Library special area will now be known as STREAM, which stands for Science, Technology, Reading, Engineering, Arts, and Mathematics. The vision and purpose of STREAM is to provide students with a dynamic learning environment that integrates science, technology, engineering, arts, and mathematics with literacy skills. The library serves as a hub for exploration, creativity, and critical thinking, fostering a love for learning and preparing students for the challenges of the future. Through STEAM education in the library, students are encouraged to engage in hands-on activities, collaborative projects, and inquiry-based learning. They will explore various subjects, discover their interests, and develop essential skills such as problem-solving, communication, and teamwork. By incorporating literacy into STEAM, students enhance their reading comprehension,

information literacy, and communication abilities, enabling them to effectively navigate and contribute to a knowledge-driven society.

Our goals in STREAM align with the larger goal of nurturing well-rounded individuals who can thrive in a rapidly changing world. We aim to empower students to become lifelong learners, critical thinkers, and creative problem solvers, equipping them with the skills and knowledge needed to succeed academically and beyond. Ultimately, the library serves as a catalyst for fostering a passion for learning, inspiring curiosity, and laying a solid foundation for future academic and professional endeavors.
