

Navigating your care with ease

A care navigation program

Navigating the healthcare system can be complex and overwhelming, but we're here to support you. Our care team can help you find high-caliber, in-network specialists and work with you throughout the process to ensure you receive the care you need.

Who is eligible?

Care navigation is available to all Everside patients who need support in selecting the right specialist(s) and managing different areas of their care.

What kind of assistance can I expect?

- Understanding what your referral is for
- Identifying a high value specialist
- Referrals for additional services if needed
- Appointment scheduling
- Assistance with record transfer prior to the specialist visit
- Follow up support after specialist visits

What if my employer already offers a preferred network?

Everside has already worked with your employer to ensure current incentive programs and preferred provider networks are a part of your program experience. Your Patient Navigator will support you in selecting the right provider that is a high value specialist and part of your current benefit offerings.

How do I access the program?

Scan the QR code or visit the link below for direct access. Or present this flyer at checkout and a member of the Everside care team will assist with next steps. Your Patient Navigator will reach out within two business days.
