<b>School Connectivity</b>	
Switches, Wireless Access Points	44,829
<b>Classroom Technology</b>	
Interactive Boards, Laptops, Speakers	88,804
<b>High-Tech Security Features</b>	
Indoor and outdoor cameras, Electronic entry control system	86,504
<b>Total:</b>	<b>220,137</b>

This plan is aligned with our current technology plan for our district. This plan will also address our security monitoring upgrades needed for our building. This initial phase contains critical elements that will improve our infrastructure necessary for the long term success of this program. Listed are items to be included in the project including rationale and estimated cost.

A brief description and rationale for these items follows.

**Connectivity:** Key to our local area network working robustly, is the upgrade of our switches and access points.

**Classroom Technology:** Interactive display boards will replace failing first generation smart boards and projection screens. We are moving toward chromebook laptops for each student.

**Security Features:** Our current camera system is at end of life and an upgrade to a more efficient entry control system is needed.
