

CHRYSALIS HEALTH

Behavioral Health Case Management

For children, adolescents, adults • Ages 3+ • Must be Medicaid Eligible

Our Case Management Teams aim to improve quality of life.

We help our clients with serious emotional and mental disturbances, connect with existing community resources that enable them to meet their basic needs. We assist with the completion of referrals, applications and attend meetings with clients as their advocates.

Our behavioral case management services work toward the goal of bettering the life and needs of our clients.

We advocate on behalf of individuals who are often not able to advocate for themselves due to mental illness.

We help identify needs, create service plans, set goals / objectives, and determine roles and responsibilities.

Once a plan is in place, we meet periodically as needed to evaluate progress in meeting those goals.

We can help our clients to connect to the following resources:

- Housing Resources
- Medical Support Services
- Transportation Resources
- Mentoring Programs & Educational Services
- Financial Resources
- Employment Resources
- Legal Support
