

Board of Education Policy

OPIOID OVERDOSE PREVENTION

The Board of Education recognizes that many factors, including the use and misuse of prescription painkillers, can lead to the dependence on and addiction to opiates, and that such dependence and addiction can lead to overdose and death among the general public, including district students and staff. The Board wishes to minimize these deaths by the use of opioid overdose prevention measures.

The Board directs that the district shall operate an Opioid Overdose Prevention Program registered with the New York State Department of Health. The Deputy Superintendent is designated as the Program Director. The Board permits the administration of naloxone (also known as Narcan, among other names) nasal spray, by volunteer trained responder staff, to any student or staff member showing opioid overdose symptoms, along with contacting emergency responders pursuant to the naloxone training. The Board permits any staff member to volunteer to be trained in naloxone administration, via the district's Opioid Overdose Prevention Program, by contacting the Program Director. Naloxone kits provided by the Program through the Department of Health shall be stored as indicated in the district's policies and procedures for the Program. The district shall comply with all recordkeeping, inventory, documentation and notification requirements of state regulations. The Program Director shall maintain and distribute to the Superintendent, Building Principals, and Miller Place High School, North Country Road Middle School, Laddie A. Decker Sound Beach School and Andrew Muller Primary School nurses a list of all trained responders in the district and/or building, as appropriate.

The Board further directs the school physician/medical director to issue a non-patient specific order to school nurses to administer intranasal naloxone (also known as Narcan, among other names). The non-patient specific order shall include a written protocol containing the elements required by the regulations of the Commissioner of Education. The Board permits school nurses to administer naloxone to any person at school or a school event displaying symptoms of an opioid overdose. The district shall purchase and provide the naloxone kits to be stored in the High School and Middle School nurse's office and Automated External Defibrillator (AED) case closest to the main office in the Miller Place High School, North Country Road Middle School, Laddie A. Decker Sound Beach School and Andrew Muller Primary School. Naloxone shall be accessible during school hours and during on-site school-sponsored activities when possible.
