### **EXECUTIVE SUMMARY**

Weston & Sampson Engineers, Inc. (Weston & Sampson), on behalf of Vernon Mill Owner II, LLC (Vernon Mill Owner II), has prepared this Phase I Environmental Site Assessment (ESA) for three contiguous properties located at 104 East Main Street, 5 Brooklyn Street, and 14 Laurel Street in Vernon, Connecticut (the Site). Findings of the Phase I ESA are as follows:

- Portions of the Site have been used for fabric milling since the 1800s. The earliest identified development of the southern portion of the Site (14 Laurel Street) was sometime prior to 1921 for auto repair. Later, this property also included residential apartments. It is not clear when auto repair activities no longer occurred on the 14 Laurel Street property. The building was removed sometime between 1995 and the present. On-Site uses considered "high-risk uses" (uses with the potential to have caused releases to the environment) include industrial uses (mills) and auto repair. Potential releases were previously subdivided into 25 areas of concern (AOCs). Potential releases at the 14 Laurel Street auto repair facility are considered a new AOC, AOC 26.
- Surrounding areas have been developed for residential, commercial, and industrial use since as early
  as 1885 and included several mills. Other high-risk nearby uses include an auto-filling station/repair
  garage, paint manufacturing, machining, and printing. Releases from the former auto-filling station
  have been assessed as AOC 21 and no impacts were identified. Potential off-Site releases to the
  west have been included with AOC 23 (groundwater), which includes both potential on-Site and offSite releases. Impacts to groundwater have been identified.
- Several assessment and investigation activities have occurred at the Site. Weston & Sampson reviewed the available reports and has concluded that AOCs 1-6, 8-11, 20, 21, and 24 have been assessed sufficiently and do not require additional assessment or remediation.
- Several AOCs have exceedances of applicable remedial criteria including AOCs 7, 12 through 19, 22, 23, and 25. Weston & Sampson reviewed the assessment activities and concluded that additional assessment or remediation is required at these AOCs. Planned institutional controls (land-use restrictions) or engineering controls are planned for several of these AOCs.
- Vapor encroachment screening indicates that a vapor encroachment condition does exist for the Site (specifically AOC 19) based on past Site assessment activities.
- The properties at 104 East Main Street and 5 Brooklyn Street, properties that were part of the Amerbelle Mill Complex, are an Establishment under the Connecticut Transfer Act and a Form III for the property has previously been filed. The property at 14 Laurel Street is not an Establishment based upon a review of the records available.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13. The assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Site, except for the following; each of these RECs also constitute an area of concern (AOC) under the Connecticut Site Characterization Guidance Document. AOCS that were previously investigated and do not require remediation are not RECs and are not listed below:

1

- AOC 7- Building 12 former maintenance and machine shop area
- AOC 12- Building 3 general storage area
- AOC 13- Building 7 solvent coating lines
- AOC 14- 18,000-gallon fuel oil ASTs
- AOC 15- Transformer Pad
- AOC 16- Building 7 loading dock
- AOC 17- Building 9 dye storage
- AOC 18- Building 8 former dye house
- AOC 19- Building 11 former dyeing/current chemical storage
- AOC 22- Fill

- AOC 23- Groundwater
- AOC 25- American Mill Pond
- Potential impacts due to releases from the former auto repair facility at 14 Laurel Street (AOC 26).

### 1.0 INTRODUCTION

Weston & Sampson Engineers, Inc. (Weston & Sampson), on behalf of Vernon Mill Owner II, LLC (Vernon Mill Owner II), has prepared this Phase I Environmental Site Assessment (ESA) for three contiguous properties located at 104 East Main Street, 5 Brooklyn Street, and 14 Laurel Street in Vernon, Connecticut (the Site). The Site was originally developed with 14 buildings ranging from 1 to 5 stories. **Figure 1** shows the general location of the Site in Vernon and **Figure 2** is a Site Map showing pertinent details of the Site and surrounding area. **Appendix A** is a photograph log of pictures taken during the August 4, 2021, Site reconnaissance.

This ESA was performed in accordance with ASTM Standard E1527-13, which is compliant with the EPA All Appropriate Inquiry (AAI) Rule. The Phase I ESA was performed to assess the Site with respect to the range of potential contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. This Phase I ESA was also conducted in accordance with the Connecticut Department of Energy and Environmental Protection (CT DEEP) Site Characterization Guidance Document (SCGD) issued in September 2007 and revised December 2010. This practice is intended to help Vernon Mill Owner II meet any obligations detailed in **Section 2.8.** 

## 1.1 Purpose

Weston & Sampson was requested by Vernon Mill Owner II to complete an ASTM Phase I ESA of the Site in advance of the purchase of the property. This practice is intended to permit Vernon Mill Owner II to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Site consistent with good commercial or customary practice" as defined in 42 U.S.C. §9601(35)(B).

The purpose of the Phase I ESA is to identify Recognized Environmental Conditions (RECs) in connection with the Site at the time of the Site evaluation. The term Recognized Environmental Condition referenced in ASTM Standard Practice E1527-13, refers to the presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The ASTM definition of REC does not include, de minimis conditions, which generally do not present a threat to human health or the environment and would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies; therefore, de minimis conditions are not considered RECs.

The identification of RECs in connection with the Site may impose an environmental liability on owners or operators of the Site, reduce the value of the Site, or restrict the use or marketability of the Site. Therefore, further investigation may be warranted to evaluate the scope and extent of potential environmental liabilities.

Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in pertinent sections of this report.

### 1.2 Scope of Work

This Phase I ESA was conducted using a standard of good commercial and customary practice consistent with ASTM Standard Practice E 1527-13 and included the following tasks:

- Review of previous environmental site assessments (if available);
- Regulatory records review;
- Interviews with regulatory officials and personnel associated with the Site and adjoining properties;
- · A site visit; and
- Evaluation of information and preparation of the report.

Any significant scope-of-work additions, deletions, or deviations to ASTM E 1527-13 are noted below or in the corresponding sections of this report. A copy of the scope of services between Weston & Sampson and Vernon Mill Owner II, specifying the work to be performed and responsibilities of the User, is included in **Appendix B**. Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials, which would be carried out in a Phase II ESA, if required.

# 1.3 Significant Assumptions

There is a possibility that, even with the proper application of these methodologies, there may exist at the Site conditions that could not be identified or which were not reasonably identifiable from the available information. Weston & Sampson believes that the information obtained from the record review and the interviews is reliable; however, Weston & Sampson cannot, and does not, warrant or guarantee that the information provided by third-party sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but to provide Vernon Mill Owner II with information relating to the presence or likely presence of RECs in connection with the Site.

## 1.4 Limitations and Exceptions

The findings, opinions, and conclusions provided by Weston & Sampson are based solely on the information provided in this document. Future investigations and/or information that were not available to Weston & Sampson at the time of the investigation may result in a modification of the findings stated in this report. Should additional information become available concerning this Site, or neighboring properties that could directly impact the Site, that information should be made available to Weston & Sampson for review so that, if necessary, conclusions presented in this report may be modified. The conclusions of this report are based on conditions observed at the Site by Weston & Sampson personnel at the time of the investigation, information provided by Vernon Mill Owner II, information provided by Environmental Data Resources, Inc. (EDR), and information provided by federal, state, and local agencies. This report has been prepared in accordance with ASTM Standard Practice E 1527-13 and generally accepted engineering and geological practices. No other warranty, express or implied, is made. It should be noted that this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may exist on the property. Some of the information presented in this report was provided through existing documents and interviews.

### 1.5 Deviations

Except for the limitations and exceptions discussed in **Section 1.4**, this Phase I ESA complies with the ASTM Standard Practice E 1527-13. Weston & Sampson did not deviate from the scope of ASTM Standard E 1527-13 outlined in **Section 1.2**.

### **1.6** Special Terms and Conditions

Authorization was given by Vernon Mill Owner II on July 20, 2021. Instructions as to the location of the property, access, and an explanation of the property and facilities to be assessed were provided by Vernon Mill Owner II.

### 1.7 Reliance

This report may be distributed and relied upon only by Vernon Mill Owner II or an affiliate. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the written consent of Weston & Sampson and Vernon Mill Owner II.

### 2.0 USER PROVIDED INFORMATION

The information requested in the User Questionnaire is intended to assist the User in meeting their obligations under ASTM E1527-13 and to assist the Environmental Professional in gathering evidence to identify RECs at the Site. Vernon Mill Owner II was identified as the User for this ASTM E1527-13 Phase I ESA. John Gumpert of Vernon Mill Owner II provided the User responses. A copy of the User Questionnaire is provided in **Appendix C**. The following subsections summarize responses from the completed questionnaire.

# 2.1 Owner, Property Manager, and Occupant Information

The Town of Vernon, with offices at 14 Park Place in Vernon, Connecticut owns the Site. Shaun Gately, the Economic Development Director for the Town is the Key Site Manager and has been associated with the Site for the past 6 years. The Site is vacant and has no occupants.

### **2.2** Environmental Liens

Vernon Mill Owner II reported no environmental cleanup liens filed against the Site.

# 2.3 Activity and Use Limitations

Vernon Mill Owner II reported no Activity and Use Limitations (AULs) in place at the Site.

# 2.4 Specialized Knowledge

Vernon Mill Owner II reported no specialized knowledge as it relates to the current and/or former use of the Site.

# 2.5 Commonly Known or Reasonably Ascertainable Information

Vernon Mill Owner II reported no commonly known or reasonably ascertainable information about the Site that would be indicative of releases or threatened releases other than that identified through assessment activities summarized in **Section 4.2**.

### 2.6 Valuation Reduction for Environmental Issues

Vernon Mill Owner II reported no reduction in the value of the property due to real or perceived environmental issues.

### 2.7 Degree of Obviousness of Contamination

Vernon Mill Owner II reported no obvious indicators that point to the presence or likely presence of contamination at the Site other than that identified through assessment activities summarized in Section **4.2.** 

### 2.8 Reason For Performing Phase I ESA

Vernon Mill Owner II reported that the Phase I ESA is being conducted in anticipation of acquisition of the Site and to assist in satisfying one of the requirements to qualify for CERCLA landowner liability protections.

### 2.9 User Provided Documents

Vernon Mill Owner II did not provide any additional documents for review pertinent to the identification of RECs at the Site.

### 3.0 SITE DESCRIPTION

### 3.1 Location and Legal Description

The Site is made up of three contiguous properties located at 104 East Main Street, 5 Brooklyn Street, and 14 Laurel Street in Vernon, Connecticut, and referred to as parcel numbers, 40-0117-00006, 40-0119-00001, and 40-0119-00009, respectively. The center of the Site is located at the following latitude/longitude:

Latitude: 41.867375 NorthLongitude: -72.443213 West

## 3.2 Site and Vicinity Description

The Site consists of the former Amerbelle Corporation textile mill facility located on two parcels split by Brooklyn Street and an abutting parcel (14 Laurel Street) to the south. The Amerbelle mill facility is also split by a constructed concrete raceway containing the Hockanum River, which flows from the southeast to the northwest on the Site.

The parcel north of Brooklyn Street, 104 East Main Street, is 1.47 acres in size. Twelve buildings used in facility operations were located on the northern parcel, Buildings 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 13. Buildings 2, 7, 8, 10 and 13 have been demolished to the concrete foundation slab. The remaining buildings vary in size but the largest, Buildings 3, 9, and 11, are 5-story structures with basements. The parcel south of Brooklyn Street, 5 Brooklyn Street, is 2.71 acres in size. Two structures used in facility operations were located on the southern parcel, Buildings 12 and 14. Building 14 has been demolished and the concrete foundation slab removed. Building 12 remains and is a 5-story structure with a basement. 14 Laurel Street is a 0.28-acre parcel and all structures on this parcel have been demolished with a portion of the concrete foundation slab remaining.

The highest elevations on the property are located on the 14 Laurel Street parcel and there is a slope down to the 5 Brooklyn Street parcel. The 5 Brooklyn Street parcel and the portion of the 104 East Main street parcel south of the concrete raceway are at approximately the same elevation. North of the concrete raceway is another drop of elevation to the remainder of that parcel.

The 14 Laurel Street parcel is vegetated mostly with trees and access can be obtained from Laurel Street through a curb cut but the access drive has been removed. The portion of 5 Brooklyn Street south of the concrete raceway (former location of Building 14) is covered with turf and fenced; access can be obtained through a gate off Brooklyn Street. The portion of 5 Brooklyn Street north of the concrete raceway (location of Building 12) is covered with asphalt outside of the building footprint and some areas of stressed vegetation. Access to Building 12 can be obtained off of Grove Street. The 104 East Main Street parcel is mostly covered with the remaining buildings, concrete slabs remaining after demolition of structures, and asphalt. Small areas of vegetation are found to the north and south of the concrete raceway. The 104 East Main Street parcel is fenced but access may be gained through gates on East Main Street and Brooklyn Street.

# 3.3 Current Use of Property

The Site is zoned Historic District - Industrial (HDI) for 104 North Main Street and 5 Brooklyn Street parcels and Planned Neighborhood Development (PND) for the 14 Laurel Street parcel. The Site is currently vacant.

# **3.4** Description of Structures and Other Improvements

The 104 Main Street parcel is developed with four buildings remaining from the former mill complex. These buildings are vacant. Building No. 3 is a 5-story, approximately 2,300-square foot brick building with a full basement formerly used for general storage. Building No. 4/5 is a 2-story, approximately 3,000-square foot brick building with a full basement also formerly used for general storage. Building No. 6 is a 1-story, approximately 2,300-square foot brick building with a concrete slab-on-grade foundation formerly operated as the mill boiler room. A boiler stack is still present at this building. Building No. 9/11 is a 5-story, approximately 9,400 square-foot brick building with a full basement.

The 5 Brooklyn Street parcel is developed with one two-story brick building with a basement, Building No. 12. This building is connected to building No. 9/11 across Brooklyn Street with an elevated walkway.

The 14 Laurel Street parcel is vacant with no structures. However, a concrete building slab does remain on the property.

# **3.5** Adjoining Property Information

Weston & Sampson identified the following adjoining property uses:

- North commercial
- South residential
- East residential and commercial (includes auto repair)
- West residential

### **4.0 RECORDS REVIEW**

Performance of a Phase I ESA in accordance with ASTM E1527-13 requires the review of practically reviewable publicly available records to define the regulatory history, physical setting, and history of use of the Site, adjoining properties, and pertinent surrounding properties. The regulatory review is performed to understand the nature of any releases that have occurred within approximate minimum search distances of the Site that have the potential to impact environmental media (i.e., soil, groundwater, and vadose zone) beneath it. Physical setting information is reviewed to evaluate the general nature of the soil conditions and presence and movement of groundwater through the Site. Historical information sources are evaluated to develop the historical use of the Site, to the extent feasible, back to the first development Site or 1940, whichever is earlier. These reviews help identify the likelihood that past releases and/or uses have led to RECs in connection with the Site.

Weston & Sampson used a third-party data provider, Environmental Data Resources (EDR) of Shelton, Connecticut, to develop this information and meet the requirements of ASTM E1527-13. All data sources are defined in the following sections of this report and are specifically referenced in **Appendices E, F, G, H,** and **I**.

Weston & Sampson may have reviewed other records in order to fulfill the requirements of this standard practice. Any additional records that are reviewed are cited in the appropriate section of the report and in **Section 12.0**.

### 4.1 Standard Environmental Records Review

A review of standard regulatory databases maintained by federal, state, and tribal offices was completed through EDR. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E1527-13. As a part of this regulatory review, other non-ASTM standard database listings reported by EDR may have also been evaluated. In these cases, this section includes a supplemental discussion of any findings and our opinion as it relates to the identification of RECs in connection with the Site. The detailed EDR report, including the mapping of results and limitations of the search criteria, is contained in **Appendix E**.

The databases use geocoded information to identify the coordinates of the properties or to check the street addresses of practically reviewable non-geocoded orphan properties located within the same zip code. The EDR report defines acronyms that are not explicitly defined in this discussion, lists the names of all of the databases that were searched, the date information was last updated by EDR, and the date information was last updated by the original source.

Plotted locations of all database listings are not always accurate. For listings that are suspected to be inaccurate, Weston & Sampson uses the best available data when evaluating listing locations.

The table below summarizes the number of properties identified for each database. Available records for each of the identified listings were reviewed to assess the potential to impact the Site. In general, releases with sources that are proximate to and hydraulically upgradient have the greatest potential to impact the Site. Weston & Sampson reviewed the location of each listing to determine if it met these criteria. If one or more of the following conditions were met, then the database listing was excluded from further consideration:

- Hydrogeologically isolated from the Site (e.g., opposite bank of a river);
- At such distance from the Site that migration of contaminants to the Site is unlikely (i.e. greater than 0.25 mile upgradient for hazardous substance sites and greater than 500 feet for petroleum sites); or
- Groundwater flow from the listed property is away from the Site.

Those listings that were not excluded were evaluated in more detail to assess if they pose a threat to the

Site. For these listing, summary tables are provided that include Weston & Sampson's opinion as to whether those listings constitute a REC. References to any Connecticut Department of Energy and Environmental Protection (CT DEEP) reports that were reviewed are included in Section 12.0.

The Site was identified in 31 databases. Sixteen off-Site listings, corresponding to 5 individual properties, were identified which required further review. No other listings were identified by Weston & Sampson as likely to have current or former releases with the potential to migrate to the Site. No unmapped 'orphan' listings were identified.

# Map Findings Summary

# **Detail Summary**

Site Name:	AMERBELLE TEXTILES LLC; AMERBELLE CORP; AMERBELLE TEXTILES; SPILL WASTE CGS 22A-451 RESP PARTY IS; AMBERBELLE TEXTILES-DYE AND TREATMENT OF FABRIC PRODUCTION;
Databases:	ERNS, AIRS, RCRA-VSQG, ICIS, SPILLS, NJ MANIFEST, RI MANIFEST, CT MANIFEST, NY MANIFEST, NPDES, UST, US BROWNFIELDS, CT PROPERTY, ENFORCEMENT, ECHO, FINDS, ASBESTOS,
Address:	104 E. MAIN ST; 5 BROOKLYN STREET
Distance:	0
Direction:	Northwest
Elevation:	Higher
Comments:	The Site is listed as a small quantity generator and historical large quantity generator several times since the late 1980s for contaminants including, ignitable waste, corrosive waste, cadmium, lead, chloroform, methyl ethyl ketone, tetrachloroethylene, and formaldehyde. Several releases of various natures have occurred at the Site. Assessment and remediation have occurred at the Site and are summarized in Section 4.2.

Site Name:	FORMER DANIELS MILL - ASSESSMENT
Databases:	BROWNFIELDS, SPILLS,
Address:	98 EAST MAIN STREET
Distance:	5
Direction:	NNE
Elevation:	Higher
Comments:	This property, located adjacent to the Site to the north (cross-gradient), is listed as a Brownfield
	Program grant recipient in 2015, a release of approximately 110 gallons of glue from a spill of two
	leaking drums in 1998, as well as a chemical release in 2011 of unspecified nature. Based on its
	historical use and location adjacent to the Site, Weston & Sampson is of the opinion that this
	property poses a risk of impacting environmental media at the Site.

Site Name:	FORMER DRAKE SUNOCO; GROVE ST
Databases:	LUST, CPCS; UST
Address:	RTE. 74 & RTE. 31; 1 GROVE ST
Distance:	43
Direction:	ESE
Elevation:	Higher
Comments:	This property, located adjacent to the Site to the east (downgradient), is listed for a completed
	leaking gasoline UST in 1998. Based on its location downgradient, Weston & Sampson is of the
	opinion that this property poses a low risk of impacting environmental media at the Site.

O'I M	ANGOGIL CORROBATION PAROFILAT 40 PROCEEDING ANGOGILLI O ANGOGIL
Site Name:	ANOCOIL CORPORATION, PARCEL AT 40 BROOKLYN ST; ANOCOIL LLC, ANO-COIL
	CORPORATION; ANO COI; ANO COIL;
Databases:	CT PROPERTY, AUL, AIRS, CT MANIFEST, NPDES, ASBESTOS, UST, SDADB, CPCS, CT
	MANIFEST, LWDS, ENFORCEMENT, RI MANIFEST, RCRA-SQG, ICIS, US AIRS (AFS), NJ
	MANIFEST, VCP, AUL
Address:	40 BROOKLYN STREET (60 EAST MAIN MAILING), 1 COURT STREET
Distance:	235
Direction:	WSW
Elevation:	Lower
Comments:	This property, located approximately 235 feet west of the Site, downgradient, is listed for an activity use limitation for direct exposure to soil in 2018, as well as possession of several permits from 2006 to 2016 for surface water discharge and stormwater industrial activities, and several hazardous wastes, including tetrachloroethylene and ignitable waste from the late 1980s to the mid-2000s. Records revealed that this property may have been used as an electroplating and polishing facility. Based on potential high-risk uses and types of compounds used at this facility, Weston & Sampson is of the opinion that this property poses a risk of impacting environmental media at the Site.

### 4.2 Other Environmental Records Review

For this Phase I ESA, Weston & Sampson reviewed the following other records, which are specific to the 104 East and 5 Brooklyn Street portions of the Site:

- GZA Environmental. 2019. Abatement, Demolition, and Remediation Report, Former Amerbelle Textile Mill, Vernon, Connecticut. Prepared for: Town of Vernon. April.
- GZA Environmental. 2015. Revised Remedial Action plan, Former Amerbelle Property, 104 East Main Street, Vernon, Connecticut. Prepared for: Town of Vernon. November.
- GZA Environmental. 2015. Phase III Data Gap Assessment Report, Former Amerbelle Property, 104
  East Main Street, Vernon, Connecticut. Prepared for: Town of Vernon. July.

Assessment and investigation activities have occurred at the Site, beginning with Phase I and Phase II ESAs completed by GeoDesign, Inc. in 2004, a Targeted Brownfields Assessment by Metcalf & Eddy in 2006, a Limited Phase III/Phase III ESA by Fuss & O'Neill in 2009, and a Phase III Data Gap Assessment by GZA Environmental in 2015. Twenty-five Areas of Concern (AOCs) were identified and assessed and included the following:

- AOC 1- Building 14 former xylene underground storage tanks (USTs)
- AOC 2- Building 14 south loading dock
- AOC 3- Building 14 west loading dock
- AOC 4- Building 14 former finishing department/dye mixing room
- AOC 5- Building 14 wastewater conveyance trenches
- AOC 6- Southeast corner of Building 14
- AOC 7- Building 12 former maintenance and machine shop area
- AOC 8- Slope west of Buildings 1 and 2
- AOC 9- Building 13 latex coating
- AOC 10- Building 2 loading dock
- AOC 11- Buildings 1 and 2 coating storage
- AOC 12- Building 3 general storage area
- AOC 13- Building 7 solvent coating lines
- AOC 14-18,000-gallon fuel oil aboveground storage tanks (ASTs)
- AOC 15- Transformer Pad
- AOC 16- Building 7 loading dock
- AOC 17- Building 9 dye storage
- AOC 18- Building 8 former dye house
- AOC 19- Building 11 former dyeing/current chemical storage
- AOC 20- Building 11 loading dock
- AOC 21- Former off-site gasoline station
- AOC 22- Fill
- AOC 23- Groundwater
- AOC 24- Raceway
- AOC 25- American Mill Pond

Assessment activities revealed that subsurface soil is widely impacted by metals (chiefly arsenic and lead), polycyclic aromatic hydrocarbons (PAHs), and extractable total petroleum hydrocarbons (ETPH). Volatile organic compound (VOC) impacts, primarily tetrachloroethene (PCE), were also identified. In 2015, GZA Environmental prepared a Remedial Action Plan (RAP) for the Site. Proposed remedial actions included the following:

- The placement of an Environmental Land Use Restriction (ELUR) on impacted soil (urban fill material) while maintaining the building slabs for buildings proposed for demolition.
- The placement of an ELUR on the footprint of Building No. 12 (on the 5 Brooklyn Street parcel) to restrict the demolition of the building and the disturbance or removal of the soil below.
- The excavation and removal of petroleum-impacted soil south of Building No. 3 (AOCs 14 and 15)
- The excavation and removal of soil south of Building No. 7 with petroleum, PAH, and arsenicimpacted soil (AOC 16).
- In situ chemical oxidation of VOC-impacted soil beneath Building No. 11 (known as AOC 19)
- An Ecological Risk Assessment of sediment in the American Mill Pond impacted with PAHs and metals.
- Ongoing groundwater monitoring.

In 2016, hazardous building material abatement and demolition of several former mill buildings and structures was completed, as well as demolition and replacement of the raceway dam, excavation and disposal of impacted soil at the AST Building, processing of select concrete and brick surfaces as on-Site fill; removal of loose flaking paint from building exteriors, and installation of chemical injection trenches beneath Building 11 for future remedial activities.

Weston & Sampson reviewed the results of assessment and remediation and concluded that AOCs 1 through 6, 8 through 11, 20, 21, and 24 have been assessed sufficiently and do not require additional assessment or remediation.

Exceedances of applicable remedial criteria remain at several AOCs:

- AOC 7- Building 12 former maintenance and machine shop area
- AOC 12- Building 3 general storage area
- AOC 13- Building 7 solvent coating lines
- AOC 14- 18,000-gallon fuel oil ASTs
- AOC 15- Transformer Pad
- AOC 16- Building 7 loading dock
- AOC 17- Building 9 dye storage
- AOC 18- Building 8 former dye house
- AOC 19- Building 11 former dyeing/current chemical storage
- AOC 22- Fill
- AOC 23- Groundwater
- AOC 25- American Mill Pond

### **4.3** Physical Setting

Physical setting sources were reviewed to understand the nature of the topography, geology (soil and bedrock), and hydrogeology of the Site. Weston & Sampson reviewed available topographic, soil, and geologic maps, the Connecticut Environmental Conditions Online (ECO) viewer, and the environmental records listed in **Section 4.2**.

### 4.3.1 Topography

Topography of the Site slopes generally to the north northwest towards the American Mill Pond. The Site is situated approximately 489 feet above mean sea level. **Figure 1** depicts the Site and surrounding topography based on the United States Geological Survey (USGS) Quadrangle 7.5-minute series topographic map.

#### 4.3.2 Geology

Surficial soil and bedrock geology sources included observation during the Site reconnaissance, the United States Department of Agriculture (USDA) Soil Conservation Service (SCS) information provided by EDR, the online Connecticut ECO viewer, the Surficial Materials Map of Connecticut (Stone et al, 1992), and the

United States Geological Survey Bedrock Geological Map of Connecticut (Rodgers, J., 1985).

#### 4.3.2.1 Soil

Subsurface lithology at the Site is mapped as unconsolidated deposits in the southern portion and glacial till in the northern portion of the Site. Previous investigation at the Site has observed densely packed sands and silts from less than 3 feet to 27 feet below ground surface (ft. bgs) overlying bedrock.

### 4.3.2.2 Bedrock

Bedrock geology at the Site is mapped as Glastonbury Gneiss, a gray, medium- to coarse-grained, massive to well-foliated granitoid gneiss composed of oligoclase, quartz, microcline, and biotite of the Middle Ordovician age. Bedrock was not observed during the Site reconnaissance, but bedrock has been encountered in previous investigations at 3 to 27 ft. bgs.

### 4.3.3 Hydrogeology

The direction of local groundwater flow was identified from a review of previous investigation reports. Topographic maps were reviewed to identify the nearest surface water bodies to the Site.

#### 4.3.3.1 Groundwater

Groundwater has been reported at depths ranging from approximately 5 to 18 ft. bgs and is generally found within bedrock. Groundwater has been interpreted to flow primarily to the north-northeast, with some local flow to the northwest near the edge of the American Mill Pond.

The CT DEEP has classified the overburden groundwater aquifer beneath the Site as "GB." Groundwater classified as GB is not suitable for human consumption without treatment and is generally located within urbanized areas or in areas of industrial activity where a public water supply is available. GB designated uses are industrial process water and cooling waters and baseflow for hydraulically connected waterbodies and is presumed not suitable for human consumption without treatment.

### 4.3.3.2 Surface Water

The nearest surface water bodies are two mill ponds and a mill raceway. The Hockanum River flows from Shenipsit Lake to Paper Mill Pond, located adjacent to the east of the Site, through the Site as a mill raceway, and out to the American Mill Pond located adjacent to the north of the Site. The CT DEEP has classified the freshwater surface water at the Hockanum River, Paper Mill Pond, and American Mill Pond as "B." Designated uses for freshwater surface water classified as B are habitat for fish and aquatic life and wildlife; recreation; navigation; and industrial and agricultural water supply.

### 4.4 Historical Site and Area Use

For this Phase I ESA, EDR provided the following historical sources: Sanborn fire insurance maps, aerial photographs, topographic maps, and city directories. Weston & Sampson also reviewed Copies of all historical documents reviewed are included in Appendices F, G, H, and I.

### 4.4.1 Historical Use Summary

The 114 Main Street and 5 Brooklyn Street portions of the Site have been used for fabric milling since the 1800s. The earliest identified development of the Site was sometime before 1885 as the Belding Bros & Company Sewing Silk Mill and the White Manufacturing Company, a cotton yarn manufacturer, in the northwestern portion of the Site. The earliest identified development of the southern portion of the Site (14 Laurel Street) is in 1921 for auto repair and later residential apartments. It is not clear when auto repair activities no longer occurred on the 14 Laurel Street property, but in 1964 this property was listed as the location of O-Brien's TV Repair and several residential apartments. The building was removed sometime between 1995 and the present. On-Site uses with the potential to have caused releases to the environment include industrial uses (mills at 114 East Main Street and 5 Brooklyn Street) and auto repair at 14 Laurel Street.

Surrounding areas have been developed for residential, commercial, and industrial use since as early as 1885 and included several mills. Other uses identified in the vicinity of the Site include an auto-filling station/repair garage adjoining the Site to the east since the 1940s; paint manufacturing nearby to the west of the Site in the 1960s, and machining and printing west of the Site in the 1980s.

# Connecticut Property Transfer Act

The Connecticut Property Transfer Act (C.G.S. Section 22a-134 et seq., as amended) requires the disclosure, investigation, and potential remediation of environmental conditions when certain real properties and/or businesses ("Establishments") are transferred. An "Establishment" is defined as any real property at which, or any business operation from which:

- (A) on or after November 19, 1980, there was generated, except as the result of (i) remediation of polluted soil, groundwater or sediment, or (ii) the removal or abatement of building materials, more than one hundred kilograms of hazardous waste in any one month,
- (B) hazardous waste generated at a different location was recycled, reclaimed, reused, stored, handled, treated, transported or disposed of,
- (C) the process of dry cleaning was conducted on or after May 1, 1967,
- (D) furniture stripping was conducted on or after May 1, 1967, or
- (E) a vehicle body repair facility was located on or after May 1, 1967.

The Amerbelle Mill Site is an Establishment and a Form III for the property has been filed under the Transfer Act. The Site at 14 Laurel Street is not an establishment based upon a review of the available records for the property.

### 4.4.2 Sanborn Fire Insurance Maps

Sanborn fire insurance maps were reviewed and are summarized in the table below. Fire insurance maps are included in **Appendix F**.

### Summary

Date(s)	Property Comments	Surrounding Area Comments
1885	The northern portion of the Site is developed with a portion of the White Manufacturing Company (cotton-yarn manufacturer) complex on the west and the Belding Brothers and Company Sewing Silk Mill. The southernmost portion of the Site (14 Laurel Street) is unmapped.	Dwellings and commercial buildings are located on all sides of the Site. Map data for the southern portion is not available. Several mills, including Sam Fitches Knitting Mill, adjacent to the north and American Mills Co, located to the west, are considered high-risk uses.
1892	No significant changes are apparent. White Manufacturing Company has been replaced with JJ Regan (still a cotton yarn manufacturer). The southernmost portion of the Site (14 Laurel Street) is unmapped.	No significant changes are apparent.
1897	No significant changes are apparent. The southernmost portion of the Site (14 Laurel Street) is unmapped.	No significant changes are apparent.
1903	No significant changes are apparent. The southernmost portion of the Site (14 Laurel Street) is unmapped.	No significant changes are apparent.
1911	No significant changes are apparent. All Site buildings are shown operated by Belding Bros & Co Silk Sewing Mill. No structures are shown on the 14 Laurel Street property.	No significant changes are apparent.
1921	No significant changes are apparent, other than a building labeled auto and storage is shown on the 14 Laurel Street property.	No significant changes are apparent.

Date(s)	Property Comments	Surrounding Area Comments
1946	than the building formerly labeled auto and	No significant changes are apparent, except for a gasoline filling station is now shown adjacent to the east of the 5 Brooklyn Street property. Filling stations are considered a "high-risk" use.
1961	A large building labeled "Factory Building" is located on a large portion of the 5 Brooklyn Street property. The former auto repair shop (14 Laurel Street) is now labeled "storage."	

# 4.4.3 Topographic Maps

Topographic maps were reviewed and are summarized in the table below. Topographic maps are included in  ${\bf Appendix}~{\bf G}.$ 

### **Summary**

Date(s)	Quad	Property Comments	Surrounding Area Comments	
1892	Tolland	The Site appears to be developed with structures running east to west that may be part of a rail system.	The west and north of the Site appear to be heavily developed with buildings and roads. Some development exists to the east and south of the Site with roads and buildings. A railroad runs to the west of the Site from east to west.	
1915	Tolland	No significant changes are apparent.	No significant changes are apparent.	
1921	Tolland	No significant changes are apparent.	No significant changes are apparent.	
1944	Rockville, Ellington	No significant changes are apparent.	No significant changes are apparent.	
1953	Rockville, Ellington	No significant changes are apparent.	No significant changes are apparent.	
1967	Rockville, Ellington	No significant changes are apparent, except one large industrial building is shown on the center of the 50 Brooklyn Street property.	No significant changes are apparent.	
1972	Rockville, Ellington	No significant changes are apparent.	No significant changes are apparent.	
1984	Rockville, Ellington	No significant changes are apparent.	No significant changes are apparent.	
2012	Rockville, Ellington	Individual buildings are not shown on this map.	Individual buildings are not shown on this map.	

# 4.4.4 Aerial Photos

Aerial photographs were reviewed and are summarized in the table below. Aerial photographs are included in  ${\bf Appendix}\ {\bf H.}$ 

### **Summary**

Date(s)	Property Comments	Surrounding Area Comments
1934		The area surrounding the Site appears to be
	with what is interpreted as the mill complex,	primarily residential, except to the north and
	with five buildings.	west of the northern section of the Site, which
	5 Brooklyn Street: Appears to be developed	is developed with several mill complex

2017	Challenge Sailcloth (104 East Main	Surrounding properties included
	St);	residential and commercial uses. No
	No listing for 14 Laurel St.	high-risk uses were identified.

### 4.4.6 Title Records

No title records were reviewed as a part of this Phase I ESA because adequate historical information was obtained from other sources.

#### 4.4.7 Other Land Use Records

Weston & Sampson did not review any other land-use records as a part of this Phase I ESA because adequate historical information was obtained from other sources.

#### 4.5 Vapor Encroachment Evaluation

In 2015, ASTM International issued its revised Standard E2600-15 entitled Standard Guide for Vapor Encroachment (VE) Screening on Property Involved in Real Estate Transactions. The purpose of this screening is to assess the potential for migrating vapors to encroach upon the Site, creating a vapor encroachment condition (VEC). Whether or not a VEC is causing vapor intrusion requires further investigation and is beyond the scope of the standard.

A VEC is defined as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the Site. An area of concern (AOC) is measured 0.333 miles away for known or suspected releases of volatile organic compounds (VOCs) or semi-volatile organic compounds (SVOCs) and 0.1 miles for petroleum hydrocarbons. The AOCs may be reduced if the groundwater flow direction is known. For cross-gradient locations, the search distance can be reduced to 365 feet for VOCs/SVOCs, 165 feet for petroleum light non-aqueous phase liquid (LNAPL), or 95 feet for dissolved petroleum hydrocarbons. For down-gradient locations, the search distance can be reduced to 100 feet for VOC/SVOCs and LNAPL, and 30 feet for dissolved petroleum hydrocarbons.

Weston & Sampson has performed a Vapor Encroachment Screening in general accordance with the scope of work and limitations of ASTM Standard Practice E 2600-15. Based on the results of this screening, it is Weston & Sampson's opinion that a vapor encroachment condition does exist for the Site (specifically AOC 19) based on past Site assessment activities.

### **5.0 SITE RECONNAISSANCE**

The Site reconnaissance was conducted on August 4, 2021, by Malcolm Beeler, a Team Leader for Weston & Sampson and the Project Manager. Mr. Beeler meets the definition of an Environmental Professional.

# 5.1 Methodology and Limiting Conditions

The Site reconnaissance consisted of observing the Site boundaries and systematically traversing the Site to provide an overlapping field of view, wherever possible. The peripheries of any on-Site structures were observed along with accessible interior common areas, storage, maintenance, and physical plant areas. Photographs of pertinent Site features are included in **Appendix A**.

# **Limiting Conditions**

No limiting conditions were encountered during the Site reconnaissance.

## 5.2 General Site Setting

The Site consists of the former Amerbelle Corporation textile mill facility, which is located on two parcels split by Brooklyn Street and an abutting parcel (14 Laurel Street) to the south. The Amerbelle mill facility is also split by a constructed concrete raceway containing the Hockanum River, which flows from the southeast to the northwest on the Site.

The parcel north of Brooklyn Street, 104 East Main Street, is 1.47 acres in size. Twelve buildings used in facility operations were located on the northern parcel, Buildings 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 13. Buildings 2, 7, 8, 10 and 13 have been demolished to the concrete foundation slab. The remaining buildings vary in size but the largest, Buildings 3, 9, and 11 are 5-story structures with basements. The parcel south of Brooklyn Street, 5 Brooklyn Street, is 2.71 acres in size. Two structures used in facility operations were located on the southern parcel, Buildings 12 and 14. Building 14 has been demolished and the concrete foundation slab removed. Building 12 remains and is a 5-story structure with a basement. 14 Laurel Street is a 0.28-acre parcel and all structures on this parcel have been demolished with a portion of the concrete foundation slab remaining.

The highest elevations on the property are located on the 14 Laurel Street parcel and there is a slope down to the 5 Brooklyn Street parcel. The 5 Brooklyn Street parcel and the portion of the 104 East Main street parcel south of the concrete raceway are at approximately the same elevation. North of the concrete raceway is another drop of elevation to the remainder of that parcel.

The 14 Laurel Street parcel is vegetated mostly with trees and access can be obtained from Laurel Street through a curb cut but the access drive has been removed. The portion of 5 Brooklyn Street south of the concrete raceway (former location of Building 14) is covered with turf and fenced and access can be obtained through a gate off Brooklyn Street. The portion of 5 Brooklyn Street north of the concrete raceway (location of Building 12) is covered with asphalt outside of the building footprint and some areas of stressed vegetation. Access to Building 12 can be obtained off of Grove Street. The 104 East Main Street parcel is mostly covered with the remaining buildings, concrete slabs remaining after demolition of structures, and asphalt. Small areas of vegetation are found to the north and south of the concrete raceway. The 104 East Main Street parcel is fenced but access may be gained through gates on East Main Street and Brooklyn Street.

# 5.3 Site Visit Findings

5.3.1 Hazardous Substances

Weston & Sampson observed no evidence of hazardous substances at the Site.

### 5.3.2 Petroleum Products

Weston & Sampson observed no evidence of petroleum products at the Site.

#### 5.3.3 USTs

Weston & Sampson observed no readily apparent evidence of underground storage tanks (USTs) at the Site.

#### 5.3.4 ASTs

Weston & Sampson observed no readily apparent evidence of aboveground storage tanks (ASTs) at the Site.

### 5.3.5 Drums

Weston & Sampson observed no readily apparent evidence of drum storage at the Site.

# 5.3.6 Other Suspect Containers

Weston & Sampson observed no unidentified substance containers at the Site.

#### 5.3.7 Odors

Weston & Sampson noted no noxious odors possibly indicative of the presence of hazardous substances and/or petroleum products at the Site.

### 5.3.8 Equipment Likely to Contain PCBs

Weston & Sampson observed no evidence of equipment with the potential to contain PCBs (installed or in use prior to 1979) at the Site.

# 5.3.9 Interior Staining/Corrosion

Weston & Sampson did not observe significant interior stains or evidence of corrosion at the Site.

### 5.3.10 Heating/Cooling Equipment

The former mill complex was heated with an on-Site boiler room (Building No. 6) which is no longer operational. The heating or cooling source for the former residential structure at 14 Laurel Street is unknown.

### 5.3.11 Drains and Sumps

Weston & Sampson did not observe any drains or sumps at the Site.

# 5.3.12 Pits, Ponds, and Lagoons

Weston & Sampson observed no pits, ponds, or lagoons at the Site.

### 5.3.13 Pools of Liquid

Weston & Sampson observed no pools of liquid at the Site.

### 5.3.14 Solid Waste Dumping/Landfills

Weston & Sampson observed no evidence of solid waste dumping areas or areas of filled land at the Site.

### 5.3.15 Stained Soil/Stressed Vegetation

Weston & Sampson observed no stained soil or stressed vegetation at the Site.

### 5.3.16 Wells

Weston & Sampson observed no private water wells at the Site. Several monitoring wells associated with environmental assessment activities were observed on the 104 Main Street and 5 Brooklyn Street parcels.

## 5.3.17 Wastewater and Septic Systems

Weston & Sampson observed no wastewater or septic systems in use at the Site.

### 6.0 INTERVIEWS AND LOCAL FILE REVIEWS

To the extent practicable, Weston & Sampson interviews individuals with knowledge of current and past operations at the Site and reviews local municipal files to identify evidence of storage or releases of hazardous substances and/or petroleum to environmental media at the Site.

#### **6.1** Interviews

Interviews were conducted with a representative of the current owner and local government officials. Interviews were performed either in person or via a written questionnaire. Questions were focused on the identification of past releases of hazardous substances and/or petroleum at the Site.

### 6.1.1 Current Owner

Shaun Gately, the Economic Development Director for the Town of Vernon was interviewed regarding the current and former use of the Site. No findings pertinent to the identification of RECs at the Site were reported other than the following:

- The Site was developed as a portion of a textile mill complex.
- The adjoining property was historically part of the mill complex and also produced fire retardant paints and mastics, as well as insecticides.
- Three PCB-containing transformers were located south of building 7.

# 6.1.2 Key Site Manager

Shaun Gately of the Town of Vernon was also identified as the Key Site Manager. Pertinent interview responses are summarized in **Section 6.1.1**.

# 6.1.3 Occupants

The Site is vacant and has no occupants.

### 6.1.4 Past Owners

Past owners were not interviewed during this Phase I ESA because they were not identified by the current Site Owner.

### 6.1.5 Operators

The Site is vacant and has no operators.

### 6.1.6 Local Government Officials

No other local government officials were interviewed during this Phase I ESA because Vernon department officials were deemed not likely to have a direct working knowledge of past operations at the Site.

### 6.2 Local File Reviews

Weston & Sampson contacted the local fire department and reviewed tax assessment and building permits. Pertinent findings are summarized in the following subsections.

### 6.2.1 Fire Department

Weston & Sampson contacted the Town of Vernon Volunteer Fire Department for any information they might have regarding environmental conditions at the Site. No response had been received as of the completion of this report.

### 6.2.2 Tax Assessor

Weston & Sampson performed an online file review with the Vernon Assessing Department on August 9, 2021 (<u>Property Search (anashtech.com</u>)). No pertinent information was identified regarding potential RECs at the Site. The current use of the Site was identified as Historic District, Industrial for the two northern parcels and as Planned Neighborhood Development for the southern parcel. Copies of any records obtained are included in **Appendix J**.

## 6.2.3 Health Services Department

Weston & Sampson contacted the North Central Health District for any information they might have regarding environmental conditions at the Site. The Health District did not provide any information pertinent to identifying RECs at the Site.

### 6.2.4 Inspectional Services Department

A building permit report was provided by EDR that included records of building permits to 2004. Permits related to the demolition of former mill buildings on the 104 Main Street and 5 Brooklyn Street parcels were pulled in 2016. No records pertinent to the identification of RECs at the Site were identified.

### 6.2.5 Electric Utility

Weston & Sampson contacted Eversource, the local power authority, to request information concerning past releases from electric transformers on the Site. No information was provided within the time constraints of this project. One transformer release was identified in the database review and is summarized in **Section 4.1**.

# 7.0 OTHER ENVIRONMENTAL CONSIDERATIONS

This section is reserved for a discussion of asbestos-containing materials (ACM), lead-based paint (LBP), and polychlorinated biphenyls (PCBs) in building materials. However, the project scope did not include the identification of these building materials.

# 8.0 DATA GAPS

A data gap is a lack of, or inability to obtain, required information despite good faith efforts by the Environmental Professional. Significant data gaps are data gaps that affect the ability of the environmental professional to identify recognized environmental conditions. The following data gaps were identified:

- Data failure was encountered during the historical use source review related to the 5-year interval requirement.
- The historical use review did not identify Site use back to the date of the original development of the Site.
- Past owners and occupants were not interviewed during this Phase I ESA.

It is Weston & Sampson's opinion that these data gaps do not represent significant data gaps because other information was able to be developed to suggest the nature of original Site use and to define the continuity of Site use.

### 9.0 FINDINGS AND OPINIONS

A summary of relevant environmental findings, along with Weston & Sampson's professional opinions, are provided below:

- Portions of the Site have been used for fabric milling since the 1800s. The earliest identified development of the southern portion of the Site (14 Laurel Street) was sometime prior to 1921 for auto repair. Later, this property also included residential apartments. It is not clear when auto repair activities no longer occurred on the 14 Laurel Street property. The building was removed sometime between 1995 and the present. On-Site uses considered "high-risk uses" (uses with the potential to have caused releases to the environment) include industrial uses (mills) and auto repair. Potential releases were previously subdivided into 25 areas of concern (AOCs). Potential releases at the 14 Laurel Street auto repair facility are considered a new AOC, AOC 26. Opinions regarding which of these AOCs are considered RECs are provided below.
- Surrounding areas have been developed for residential, commercial, and industrial use since as early as 1885 and included several mills. Other high-risk nearby uses include an auto-filling station/repair garage, paint manufacturing, machining, and printing. Releases from the former auto-filling station have been assessed as AOC 21 and no impacts were identified. AOC 21 is considered a historical recognized environmental condition (HREC). Potential off-Site releases to the west have been included with AOC 23 (groundwater), which includes both potential on-Site and off-Site releases. Impacts to groundwater have been identified and AOC 23 is considered a REC.
- Several assessment and investigation activities have occurred at the Site. Weston & Sampson reviewed the available reports and has concluded that AOCs 1-6, 8-11, 20, 21, and 24 have been assessed sufficiently and do not require additional assessment or remediation. AOCs 1 through 6, 8 through 11, 20, 21, and 24 are therefore considered HRECs.
- Several AOCs have exceedances of applicable remedial criteria including AOCs 7, 12 through 19, 22, 23, and 25. Weston & Sampson reviewed the assessment activities and concluded that additional assessment or remediation is required at these AOCs. Planned institutional controls (land-use restrictions) or engineering controls are planned for several of these AOCs. These AOCs are considered RECs.
- Vapor encroachment screening indicates that a vapor encroachment condition does exist for the Site (specifically AOC 19) based on past Site assessment activities.
- The Site is an Establishment under the Connecticut Transfer Act and a Form III for the property has previously been filed.

### 10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Amerbelle Mill located at 104 East Main Street, Vernon, CT. Any exceptions to, deletions from, this practice are described in **Section 1.0** of this report. The assessment has revealed no evidence of recognized environmental conditions in connection with the Site except for the following:

Known impacts to the Site at the following AOCs:

- AOC 7- Building 12 former maintenance and machine shop area
- AOC 12- Building 3 general storage area
- AOC 13- Building 7 solvent coating lines
- AOC 14- 18,000-gallon fuel oil ASTs
- AOC 15- Transformer Pad
- AOC 16- Building 7 loading dock
- AOC 17- Building 9 dye storage
- AOC 18- Building 8 former dye house
- AOC 19- Building 11 former dyeing/current chemical storage
- AOC 22- Fill
- AOC 23- Groundwater
- AOC 25- American Mill Pond

Potential impacts due to releases from the former auto repair facility at the 14 Laurel Street (AOC 26).

### 11.0 SIGNATURES OF THE ENVIRONMENTAL PROFESSIONAL

This ESA was overseen by Qualified Environmental Professionals as defined in ASTM E1527-13 and EPA's AAI Final Rule. Qualifications for the Environmental Professionals are included in **Appendix K**. Please note that the signatures included below may include individuals acting as an ASTM defined Environmental Professional and those supporting the Environmental Professional in the performance of the Phase I ESA.

### **Environmental Professional Statement**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

John Gumpert President Camden Management Partners, Inc. 4770 South Atlanta Road Atlanta, GA

Re:

Phase I Environmental Site Assessment Proposal Amerbelle Mill and 14 Laurel Street Parcel 104 East Main Street and 14 Laurel Street, Vernon, Connecticut

Dear Mr. Gumpert:

Weston & Sampson Engineers, Inc. (Weston & Sampson) is pleased to provide you with this proposal for performing a Phase I Environmental Site Assessment (ESA) at the Amerbelle Mill property located at 104 East Main Street and the abutting parcel at 14 Laurel Street; collectively denoted herein as the "Site" in Vernon, Connecticut. It is understood that the Mill property was previously remediated but that the property has not yet been verified. This Site and other parcels will be entered into the Connecticut Brownfield Remediation Liability Relief Programs (BRRP) and performance of this Phase I ESA is part of the Site Verification process required under the BRRP.

### Scope of Services:

#### Phase I ESA

Weston & Sampson will complete a Phase I ESA for the entire Site (two parcels) in general accordance with the United State Environmental Protection Agency's (EPA's) All Appropriate Inquiries (AAI) Final Rule and the standards set forth in the ASTM E1527-13 process. With the Site in Connecticut, the ESA will also be performed in general accordance with the CTDEEP's Site Characterization Guidance Document (SCGD) and will be evaluated in relation to the Connecticut Transfer Act (CGS 22a-134). The tasks of the Phase I ESA include:

- Historical, Environmental Site Review, Interviews: Weston & Sampson will review existing files pertaining to historical site use and regulatory issues from various sources. To supplement the Phase I ESA, Weston & Sampson will obtain a standard ASTM Phase I database search report to obtain additional information about potential documented releases at each property and surrounding areas. At this time CT DEEP files are not available for review and it is assumed that the current owner will provide files that they have for the Site.
- <u>Site Reconnaissance:</u> Weston & Sampson will perform a reconnaissance of the Site and surroundings to
  document evidence of RECs such as releases of hazardous materials, dumped solid and/or hazardous
  waste, stressed vegetation, and evaluate potential impacts to the Site identified in the records review.
  Photographs will be taken of the Site to provide further documentation of observed conditions. A qualified
  "Environmental Professional" will perform the Site Inspection/Reconnaissance as required by AAI
  guidelines.
- Questionnaires: Weston & Sampson will provide a User Questionnaire to be completed by the persons
  designated. It is assumed that Weston & Sampson will be provided information, if available, regarding
  environmental liens, site use restrictions, and specialized knowledge concerning potential environmental
  concerns in connection with the site and site use, valuation reduction for environmental issues, and
  Degree of Obviousness of Contamination. In addition to the above questionnaire, Weston & Sampson
  will provide the OWNER with a separate General Environmental Questionnaire which is designed to be

completed by multiple parties including the Weston & Sampson inspector, a site occupant, and the owner of the Site. The information in the Environmental Questionnaire will generally include information regarding the environmental condition of the property including but not limited to: current use of the property, age of structures, use of abutting property, liens, property limitations, previous assessments, potential presence of contamination, etc.

 Report: Weston & Sampson will prepare a Phase I ESA Report summarizing the information collected above for the Site. The report will include a summary of the work scope, narrative descriptions of the completed tasks, findings and conclusions, figures, and images as necessary to support the information. The Phase I ESA does not include a Chain-of-Title search at the City of Vernon Clerk's Office.

#### Task Order Fee:

The above-described services will be provided and billed monthly on a lump sum basis. Based on the perceived level of effort associated with the described services, Weston & Sampson proposes the following budgetary amounts for the above tasks:

Task	Labor	Subs and ODCs	Total Cost
A - Phase I ESA	\$4,000	\$500	\$4,500
		Total	\$4,500

Weston & Sampson's fees shall not exceed the indicated budgetary amounts without prior written approval.

#### Task Order Schedule:

Weston & Sampson's services shall commence immediately following acceptance of the services and fees indicated herein. It is anticipated that all of the tasks will be completed within three weeks of receiving authorization to proceed.

#### Task Order Acceptance:

Signature by both parties below signifies mutual acceptance of the proposed Scope of Service, Fee, and Schedule presented in this proposal. The work as described under this proposal will be completed under the standard terms and conditions already signed by both parties.

If you have any questions, comments, or concerns regarding this proposal, please do not hesitate to contact Malcolm Beeler via phone at 860-986-7929 or email at <a href="mailto:beelerm@wseinc.com">beelerm@wseinc.com</a> or John Figurelli via phone at 860-513-1473 or email at <a href="mailto:figurej@wseinc.com">figurej@wseinc.com</a>.

Sincerely,

WESTON & SAMPSON ENGINEERS, INC.

**Questionnaires/Checklists** 

Description of Site/Address: 104 East Main Street and 5 Brooklyn Street

Question	Owner	Occupant or Prospective Purchaser	If yes, provide description	
1a. Is the <i>property</i> used for an industrial use?	Yes No Unk	Yes No Unk		
1b. Is any adjoining property used for an industrial use?	Yes No Unk	Yes No Unk		
2a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used for an industrial use in the past?	Yes No Unk	Yes No Unk	Property was a former textile mill. Also see July 2015 Phase III Data Gap Assessment Report	
2b. Did you observe evidence or do you have any prior knowledge that any adjoining property has been used for an industrial use in the past?	Yes No Unk  ✓ □ □	Yes No Unk	Adjoining property was a former textile mill and also produced fire retardant paints and mastics and insecticides.	
3a. Is the <i>property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes No Unk	Yes No Unk		
3b. Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes No Unk	Yes No Unk		
4a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes No Unk	Yes No Unk		

Question	estion Owner Occupants or Prospective Purchaser		If yes, provide description
4b. Did you observe evidence or do you have any prior knowledge that any adjoining property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes No Unk	Yes No Unk	See July 2015 Phase III Data Gap Assessment Report
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes No Unk	Yes No Unk	
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	Yes No Unk	Yes No Unk	Various containers of miscellaneous paints, cleaners, lubricants, caustic wastes, and batteries were previously removed from the buildings and disposed off-Site. See April 2019 Abatement, Demolition, and Remediation Report.
6a. Are there currently any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes No Unk	Yes No Unk	
6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes No Unk	Yes No Unk	See response to 5b.
7a. Did you observe evidence or do you have any prior knowledge that fil dirt has been brought onto the property that originated from a contaminated site?	Yes No Unk	Yes No Unk	
7b. Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is of an unknown origin?	Yes No Unk	Yes No Unk	

Question	Owner	Occupants or Prospective Purchaser	If yes, provide description
8a. Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes No Unk	Yes No Unk	
8b. Did you observe evidence or do you have any prior knowledge that there have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes No Unk	Yes No Unk	There were pits and trenches within the former buildings but it is our understanding these features were utilized in the textile mill operations and not for waste disposal.
9a. Is there currently any stained soil on the <i>property?</i>	Yes No Unk	Yes No Unk	
9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the <i>property?</i>	Yes No Unk	Yes No Unk	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the <i>property?</i>	Yes No Unk	Yes No Unk	
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the <i>property?</i>	Yes No Unk	Yes No Unk	See July 2015 Phase III Data Gap Assessment Report
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes No Unk	Yes No Unk	
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes No Unk	Yes No Unk	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	Yes No Unk	Yes No Unk	

Question	Owner	Occupants or Prospective Purchaser	If yes, provide description
13a. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes No Unk	Yes No Unk	
13b. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	Yes No Unk	Yes No Unk	
14. Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	Yes No Unk	Yes No Unk	
15a. Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes No Unk	Yes No Unk	See July 2015 Phase III Data Gap Assessment Report and November 2015 Revised Remedial Action Plan
15b. Has the owner or occupant of the property been informed of the current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes No Unk	Yes No Unk	See November 2015 Revised Remedial Action Plan
15c. Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	Yes No Unk	Yes No Unk	
15d. Has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?	Yes No Unk	Yes No Unk	

Question	Owner	Occupants or Prospective Purchaser	If yes, provide description
16. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	Yes No Unk  ✓ □ □	Yes No Unk	See July 2015 Phase III Data Gap Assessment Report and November 2015 Revised Remedial Action Plan
17. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	Yes No Unk  ☐ ✓ ☐	Yes No Unk	
18a. Does the <i>property</i> discharge waste-water (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a storm water system?	Yes No Unk	Yes No Unk	
18b. Does the <i>property</i> discharge waste water (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a sanitary sewer system?	Yes No Unk	Yes No Unk	
19. Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?	Yes No Unk	Yes No Unk	
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of <i>PCBs</i> ?	Yes No Unk  ✓	Yes No Unk	Three PCB-containing transformers were formerly located on a fence-enclosed concrete pad south of Building 7 and east and adjacent to the fuel oil storage building. These transformers were previously

# Weston & Sampson Phase I ESA Supplemental Owner Questionnaire

Site Address: Former Amerbelle Textile Mill: 104 East Main Street and 5 Brooklyn Street, Vernon, CT
What is your relationship to the Site?
Owner
How many years have you been associated with the Site?
What is the current heat source for the building (e.g. oil-fired boiler, furnace, heat-pump, etc.)?
If there is a fuel oil tank, what size is it? Where is it located?
None
What was the former heat source of the building?
Fuel oil fired boilers and natural gas.
What is the source of potable water for the Site building (private well, municipal system, other)?
Municipal
Where is sanitary septage discharged (e.g. septic system, municipal sewer, drywell, etc.)?
Municipal sewer. Non-contact cooling water formerly discharged to Hockanum River.
Who is the electrical provider for the Site building? Do you know of any transformers located on the Site?
Eversource. Transformers were previously removed from Site.

Are you aware of any floor drains in the Site building? Where are they located?
Unknown
Are you aware of any fires that have occurred at the Site?
Unknown
To the best of your knowledge, what is the history of the Site? When was it developed, what has it beer used for? Include approximate dates or decades (e.g. "in the 1960s"), if known.
See July 2015 Phase III Data Gap Assessment Report including the reports in the appendices.

# AAI - USER QUESTIONNAIRE

SITE:	
ADDR	ESS:
availab	to receive CERCLA liability protection, the <i>user</i> <sup>1</sup> must provide the following information (if e). Failure to provide this information could result in the determination that "all appropriate inquiry" complete.
1.	Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?
	☐ Yes No ☐ Unknown
	If yes, please describe (attach a separate piece of paper if necessary).
2.	Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
	Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
	☐ Yes No ☐ Unknown
	If yes, please describe.
3.	Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
	☐ Yes  No ☐ Unknown
	If yes, please describe.

<sup>&</sup>lt;sup>1</sup> The party seeking to complete an AAI to receive CERCLA liability protection

4.	Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
	Yes No Unknown
	If yes, please describe.
5.	Commonly known or reasonably ascertainable information about the property (40 CFF 312.30).
	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of any spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?
	Yes No Unknown
	If yes, please describe.
6.	The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
	Yes No Unknown
	If yes, please describe.

# **EDR BUILDING PERMIT REPORT**

#### **About This Report**

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

#### **ASTM and EPA Requirements**

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

#### Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

# **EXECUTIVE SUMMARY: SEARCH DOCUMENTATION**

Asearch of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Weston & Sampson Engineers, Inc on Jul 22, 2021.

#### **TARGET PROPERTY**

104 East Main Street Vernon Rockville, CT 06066

#### **SEARCH METHODS**

EDR searches available lists for both the Target Property and Surrounding Properties.

#### **RESEARCH SUMMARY**

Building permits identified: YES

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Permit Description: Roofing

Work Class: Proposed Use:

Permit Number: RP-2011-0232 Status: APPROVED Valuation: \$0.00

Contractor Company: Contractor Name:

Date: 5/1/2008 Permit Type: PP

Description: add bathroom & kitchen plumbing to garage apt

Permit Description: Plumbing

Work Class: Proposed Use:

Permit Number. PP-2008-0084 Status: SIGNED OFF

Valuation: \$0.00

Contractor Company: Contractor Name:

Date: 2/14/2008
Permit Type: EP

Description: electrical to new space above garage; elect heat

Permit Description: **Electrical** 

Work Class: Proposed Use:

Permit Number. EP-2008-0040 Status: SIGNED OFF

Valuation: \$0.00

Contractor Company:
Contractor Name:

Date: 2/8/2008
Permit Type: BP

Description: finish upper level of garage framing & sheetrock upper level of garage for linving

space (apt

Permit Description: Building

Work Class: Proposed Use:

Permit Number. BP-2008-0030 Status: SIGNED OFF

Valuation: \$0.00 Contractor Company:

Contractor Name:

### 5 RAYMOND ST

Date: 12/9/2016

Permit Type: **BP** 

Description: replace 4 windows including picture window; unaware if structural work will be

needed

Permit Description: **Building** Work Class: Other

Proposed Use:

Permit Number: BP-2016-0433 Status: APPROVED Valuation: \$0.00

Contractor Company:
Contractor Name:

### **GLOSSARY**

### **General Building Department concepts**

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- GC: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- HVAC (Mechanical, Heating & Air companies): HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):

  Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- CBO: Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

### **GLOSSARY**

### **Permit Content Definitions**

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

### Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -

New Permit Number: 101000000405 Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

### State- and tribal - equivalent CERCLIS

CT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Inventory of Hazardous Disposal Sites.

A review of the CT SHWS list, as provided by EDR, and dated 04/23/2010 has revealed that there are 2 CT SHWS sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

CT LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's Leaking Underground Storage Tank List.

A review of the CT LUST list, as provided by EDR, and dated 03/29/2021 has revealed that there are 5 CT LUST sites within approximately 0.5 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CT CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CT CPCS list, as provided by EDR, and dated 08/14/2020 has revealed that there are 8 CT CPCS sites within approximately 0.5 miles of the target property.

CT SEH: The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

A review of the CT SEH list, as provided by EDR, and dated 09/30/2020 has revealed that there is 1 CT SEH site within approximately 0.5 miles of the target property.

Waste Description: CHLOROFORM

Waste Code: D035

Waste Description: METHYL ETHYL KETONE

Waste Code: D039

Waste Description: TETRACHLOROETHYLENE

Waste Code: F002

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U004

Waste Description: ACETOPHENONE (OR) ETHANONE, 1-PHENYL-

Waste Code: U122

Waste Description: FORMALDEHYDE

Waste Code: U123

Waste Description: FORMIC ACID (C,T)

Waste Code: U154

Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U159

104 EAST MAIN STREET AND 5 BROOKLYN STREET

Citv.State.Zip: VERNON, CT 06066

Recipient Name: R1 TBA - Connecticut (STAG Funded)

Grant Type: TBA Property Number: 4.68 Parcel size: Latitude: 41.8665934 Longitude: -72.4429537

HCM Label: Address Matching-House Number

Map Scale: 1:24000

Point of Reference: Entrance Point of a Facility or Station

Highlights: One of the town's primary goals is to maintain the operating mill in

the community and to preserve the 107 jobs at the mill. The current owner also plans to expand the workforce to meet expected demands.

Former Use: The site has historically been used for textile operations. The site was formerly owned and operated by the Amerbelle Corporation. The mill buildings on site were constructed between 1865 and 1869. The Amerbelle Corporation was in arrears in its sewer payments to the town, and was prepared to close its Vernon operations and bankruptcy in November 2003. To help preserve the business and its 107 jobs for the town, the town enlisted the Hockanum Industrial Development and Venture Corporation HIDVC to work with Amerbelle Corporation to transfer the property. The HIDVC is a non-profit corporation established by the Town of Vernon to take ownership of industrial properties within the town that have closed or are in danger of closing, and assist the town in maintaining productive uses of such sites. The site is currently owned by the HIDVC. The site is comprised of a northern and southern parcel. The 1.5 acre northern parcel is occupied by an approximately 42,700 square-foot mill complex. The northern parcel mill complex currently houses solvent and latex-based textile coating operations, the company s industrial boiler systems, and storage areas. In addition to these operations,

these latter buildings also house a Quality Control laboratory, various administrative offices, and the operations of Challenge

Property Description:

Not reported

The site has historically been used for textile operations. The site was formerly owned and operated by the Amerbelle Corporation. The mill buildings on site were constructed between 1865 and 1869. The Amerbelle Corporation was in arrears in its sewer payments to the town, and was prepared to close its Vernon operations and bankruptcy in November 2003. To help preserve the business and its 107 jobs for the town, the town enlisted the Hockanum Industrial Development and Venture Corporation HIDVC to work with Amerbelle Corporation to transfer the property. The HIDVC is a non-profit corporation established by the Town of Vernon to take ownership of industrial properties within the town that have closed or are in danger of closing, and assist the town in maintaining productive uses of such sites. The site is currently owned by the HIDVC. The site is comprised of a northern and southern parcel. The 1.5 acre northern parcel is occupied by an approximately 42,700 square-foot mill complex. The northern parcel mill complex currently houses solvent and latex-based textile coating operations, the company s industrial boiler systems, and storage areas. In addition to these operations, these latter buildings also house a Quality Control laboratory, various administrative offices, and the operations of Challenge Sailcloth, a tenant at the site. The 2.7-acre southern parcel is occupied by an approximately 54,500 square-foot two-story brick building, which currently houses textile dyeing and finishing operations.

The Amerbelle Corporation was in arrears in its sewer payments to the town, and was prepared to close its Vernon operations and bankruptcy in November 2003. To help preserve the business and its 107 jobs for the town, the town enlisted the Hockanum Industrial Development and Venture Corporation HIDVC to work with Amerbelle Corporation to transfer the property. The HIDVC is a non-profit corporation established by the Town of Vernon to take ownership of industrial properties within the town that have closed or are in danger of closing, and assist the town in maintaining productive uses of such sites. The site is currently owned by the HIDVC. The site is comprised of a northern and southern parcel. The 1.5 acre northern parcel is occupied by an approximately 42,700 square-foot mill complex. The northern parcel mill complex currently houses solvent and latex-based textile coating operations, the company s industrial boiler systems, and storage areas. In addition to these operations, these latter buildings also house a Quality Control laboratory, various administrative offices, and the operations of Challenge Sailcloth, a tenant at the site. The 2.7-acre southern parcel is occupied by an approximately 54.500 square-foot two-story brick building, which

currently houses textile dyeing and finishing operations.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. HAZARDOUS WASTE BIENNIAL REPORTER

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

#### AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002495256

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

the site identified multiple factors of environmental and health concern within the building, which must be addressed prior to redevelopment. The environmental assessments will work in tandem with a \$400,000 Main Street Investment Grant being used to conduct exterior renovations to the structure, bringing historic and aesthetic uniformity to the building and the entire municipal complex. The site is 1.5 miles from I-84, is linked to I-84 via State Routes 74 and 31, and is accessible to public transit. The site has access to water, sewer, electric, gas connections and abundant dark fiber, including wi-fi access. Facade renovations were undertaken in 2016 with a \$400,000.00 Connecticut Main Street Investment Fund grant. In the spring of 2018 the Town awarded a contract to be funded with town funds for architectural renderings for interior renovations. Town anticipates storefront use on first floor and office space on second and third floors. Former Use: The Citizen s Block is an important building within the municipal center of Vernon in downtown Rockville. Erected in 1879, Citizen s Block is a three-story, 15,000 square feet structure. The first floor is home to the volunteer Rockville Downtown Association. The second and third floors, once residential, have been vacant since 1998 when the site was purchased by the town.

Property Transfer Forms: Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled

loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III

certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a

completed Environmental Condition Assessment Form

(ECAF)(DEP-PERD-PTP-200).

Property Transfer Forms: Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled

loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a

completed Environmental Condition Assessment Form

(ECAF)(DEP-PERD-PTP-200).

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021 Date Data Arrived at EDR: 03/23/2021 Date Made Active in Reports: 05/19/2021

## Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Next Scheduled EDR Contact: 10/04/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

### State- and tribal - equivalent CERCLIS

SHWS: Inventory of Hazardous Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/23/2010 Date Data Arrived at EDR: 04/23/2010 Date Made Active in Reports: 05/25/2010

# ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

SEH: List of Significant Environmental Hazards Report to DEEP

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

North Map: 5642417 ELLINGTON, CT

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

#### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

#### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

NWI Quad at Target Property
Data Coverage

ROCKVILLE YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

# Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
Δ1	1/4 - 1/2 Mile West	

A1 1/4 - 1/2 Mile West E 1G 1/4 - 1/2 Mile West E

For additional site information, refer to Physical Setting Source Map Findings.

# **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

# GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Tidal Wetlands

Source: Department of Energy & Environmental Protection

Telephone: 860-424-4054

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Community and Non-Community Water System Wells

Source: Department of Public Health, Water Supplies Section

Telephone: 860-509-7333

Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

#### OTHER STATE DATABASE INFORMATION

Connecticut Leachate and Wastewater Discharge Sites

Source: Department of Environmental Protection

Telephone:

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut

Source: EPA Telephone:

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

#### **RADON**

State Database: CT Radon

Source: Department of Public Health

Telephone: 860-509-7367 Radon Statistical Summary

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

# The EDR Property Tax Map Report

# **EDR Property Tax Map Report**

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

# **NO COVERAGE**

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

# **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. # **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## **GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM**

#### **TARGET PROPERTY ADDRESS**

AMERBELLE MILL 104 EAST MAIN STREET VERNON ROCKVILLE, CT 06066

### **TARGET PROPERTY COORDINATES**

Latitude (North): 41.867375 - 41° 52' 2.55" Longitude (West): 72.443213 - 72° 26' 35.57"

Universal Tranverse Mercator: Zone 18 UTM X (Meters): 712199.8 UTM Y (Meters): 4637999.0

Elevation: 489 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map: 5642449 ROCKVILLE, CT

Version Date: 2012

North Map: 5642417 ELLINGTON, CT

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

#### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

NWI Quad at Target Property
Data Coverage

ROCKVILLE YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
Δ1	1/4 - 1/2 Mile West	F

A1 1/4 - 1/2 Mile West E 1G 1/4 - 1/2 Mile West E

For additional site information, refer to Physical Setting Source Map Findings.

### **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information								
Boundary Classification Saturated hydraulic								
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)	
1	0 inches	5 inches	material	Not reported	Not reported	Max: 141 Min: 0.07	Max: Min:	

#### Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

#### **Soil Layer Information** Saturated **Boundary** Classification hydraulic conductivity **Unified Soil Soil Reaction** Layer Upper Lower Soil Texture Class **AASHTO Group** micro m/sec (pH) 1 0 inches 5 inches loam Silt-Clay COARSE-GRAINED Max: 703 Max: 7.8 Materials (more SOILS, Sands, Min: 0.01 Min: 4.5 than 35 pct. Sands with fines, passing No. Silty Sand. 200), Silty Soils. 2 5 inches 21 inches gravelly loam Silt-Clay COARSE-GRAINED Max: 703 Max: 7.8 Materials (more SOILS, Sands, Min: 0.01 Min: 4.5 than 35 pct. #### PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Tidal Wetlands

Source: Department of Energy & Environmental Protection

Telephone: 860-424-4054

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Community and Non-Community Water System Wells

Source: Department of Public Health, Water Supplies Section

Telephone: 860-509-7333

Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

#### OTHER STATE DATABASE INFORMATION

Connecticut Leachate and Wastewater Discharge Sites

Source: Department of Environmental Protection

Telephone:

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut

Source: EPA Telephone:

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

# **EDR Environmental Lien and AUL Search**

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

Prepared By and Return To: William E. Breslau Kahan Kerensky & Capossela, LLP 45 Hartford Turnpike Vernon, CT 06066

#### **QUIT CLAIM DEED**

TO ALL PEOPLE TO WHOM THESE PRESENTS SHALL COME, GREETING:

KNOW YE, THAT, HIDVC-PROPERTY 1, INC., a Connecticut non-stock corporation with office in the Town of Manchester, County of Hartford and State of Connecticut (hereinafter referred to as the "Releasor")

for the consideration of ONE DOLLAR (\$1) AND OTHER VALUABLE CONSIDERATION, BUT LESS THAN ONE HUNDRED (\$100)

received to its full satisfaction of the TOWN OF VERNON, a municipal corporation authorized by the laws of the State of Connecticut, with its principal office at 14 Park Place, Vernon, Connecticut 06066 (hereinafter referred to as the "Releasee")

do remise, release, and forever QUIT CLAIM unto the said TOWN OF VERNON and unto its successors and assigns forever, all such right, title, interest, claim and demand whatsoever as the said Releasor, have or ought to have in or to a certain piece or parcel of land, with the buildings and improvements thereon, situated in the Town of Vernon, County of Tolland and State of Connecticut, known as 104 East Main Street and 5 Brooklyn Street and being more particularly bounded and described on SCHEDULE A attached hereto and made a part hereof.

It is the intention of the Parties that there not be a merger of title and to preserve the easements, agreements and restrictions recited in SCHEDULE B which this conveyance remains subject to.

And being the same premises as were described in a Quit Claim Deed from BRIDGEPOINT FUNDING ALLIANCE, LLC to HIDVC-PROPERTY 1, INC. dated January 17, 2014 and recorded in the Vernon Land Records.

TO HAVE AND TO HOLD the premises, with all the appurtenances thereof, unto the said Releasee, its successors and assigns forever, to its and their own proper use and behoof, so that neither it, the Releasor, nor any other person or persons in its name and behalf, shall or will hereafter claim or demand any right or title to the premises or any part thereof, but it and its successors shall by these presents be excluded and forever barred.

## **EDR Environmental Lien and AUL Search**

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

## VOL 1886PGO 191

## TAX COLLECTOR'S DEED TOWN OF VERNON

Know all men by these presents, that whereas the Town of Vernon, Connecticut did on the 1<sup>st</sup> day of October in the years 1995 through 2004 inclusive, lay taxes on its grand lists next to be or last perfected, rate bills for which and for a personal tax, if such be the fact, in all respects made out according to law with a warrant thereto attached, were placed in my hands, I being the duly appointed and qualified collector thereof, for collection; which taxes and sewer user fees became due, respectively, on the 1<sup>st</sup> day of July in the years 1996 through 2005, and whereas

**Joan B. Simon**, upon demand made, neglected and refused to pay the tax set opposite his/her name in said rate bills, and thereupon, on the 27<sup>th</sup> day of March 2006, I levied upon the parcel of real estate hereinafter described for the amount of said taxes to wit: \$10,203.15 and sewer user fees, 39,351.26, and accrued interest and gave notice thereof to said taxpayer and to all others as by law provided, which real estate so levied upon is situated in the Town of Vernon, County of Tolland, State of Connecticut, and bounded and described as follows:

14 Laurel Street, Parcel ID #41-0119-00009

more particularly described in the Vernon Land Records, Vol. 378 Page 24

#### and in the attached Schedule A

and on the 17<sup>th</sup> day of June, 2006, no one having previously tendered to me said tax and sewer user fees, with interest and my fees, in pursuance of said levy, and in accordance with the terms of said notice, **I sold at public auction** the whole of said real estate of said

Joan B. Simon, to

CONVEYANCE TAX RECEIVED

Bernice K. Dixon, VERNON TOWN CLERK

TOWN CLERK OF VERNON

#### **TOWN OF VERNON, Connecticut,**

and inasmuch as there were no other bidders at the public auction, for the bid of \$60,131.88, being the amount of the tax levied and sewer user fees for, with interest and my fees.

Now, therefor, in consideration of the premises, and of the sum of \$1.00, received to my full satisfaction, of said

**TOWN OF VERNON, Connecticut**, I hereby bargain and sell unto it the premises last above described, with the appurtenances to have and to hold the same to it and its heirs, successors and assigns forever, subject only to taxes laid by the Town of Vernon which were not yet due and payable when I first published notice of levy and sale, if

## VOL 1886 PGO 192

any; and subject to easements, covenants, and restrictions in favor of other parcels of land; and to interests exempt from levy and sale under the Constitution and laws of the United States; and to such other interests, hereinafter described, if any;

And also I, the said Collector, acting in the name of and for the Town of Vernon, Connecticut, do by these presents bind said Town, forever to warrant and defend the above granted and bargained premises to the said grantee, its heirs, successors and assigns, against all claims and demands arising from any necessary act omitted, or unlawful act done by me in connection with the aforesaid levy or sale which impairs the same.

In witness whereof, I have hereunto set my hand and seal this 30th day of June, 2006.

Collector of Revenue, Town of Vernon, CT

Signed, sealed and delivered in the presence of

Bernie K. Defon Bernice K. Dixon

Fires E Kristowski

State of Connecticut, County of Tolland, Town of Vernon:

Personally appeared Carol S. Nelson, CCMC, Collector of Revenue of the Town of Vernon, Connecticut, signed and sealer of the foregoing installment, and acknowledged the same to be her free act and deed as such Tax Collector before me.

Notary Public

My commission expires

Grantee's address: 14 Park Place, Vernon, CT 06066 DIANE P. BULLIVAN NOTARY PUBLIC My Commission Expires Nov. 30, 2007

#### Schedule A

a certain piece or parcel of land, together with the buildings thereon, situated in the Town of Vernon, County of Tolland and State of Connecticut, known as 14 Laurel Street, being bounded and described as follows:

Beginning at a point on the northerly side of Laurel Street, which point is the southwest corner of the premises herein described and the southeast corner of land now or formerly of Regan Manufacturing Company; thence N 49°32' E One Hundred (100) feet along land now or formerly of said Regan Manufacturing Company to an iron pin; thence S 48°45' E Seventy-Five (75) feet to an iron pin; thence S 18°18' E Fifty-Nine and seven-tenths (59.7) feet along land now or formerly of Jack K. Dunn et ux to an iron pin; thence S 32°0' W Sixty-Five and ninety one-hundredths (65.90) feet along land now or formerly of Orrin White to an iron pin on the northerly side of Laurel Street; thence N 53°07' W a distance of One Hundred Fifty-Five and three-tenths (155.3) feet along said Laurel Street to the point and place of beginning.

Being the same premises conveyed to the Grantors herein by Warranty Deed of Richard J. Mitzkovitz et ux, dated January 31, 1977 and recorded in the Vernon Land Records in Volume 305, Page 172.

Said premises are conveyed subject to building, building line and zoning restrictions of the Town of Vernon and to a possible retaining wall agreement dated November 29, 1904 and recorded in the Vernon Land Records in Volume 45, Page 12.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

### **EXECUTIVE SUMMARY**

### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

"Reoccupancy Testing at a
Residential Facility – Regulatory
Requirements and Achieving
Compliance."

EBC Seminar on PCB Air Sampling

Malcolm has 30 years of experience in project management and environmental engineering. He specializes in remedial site investigations, remedial design and implementation, remediation site management, and facility renovation and decommissioning. Malcolm has expertise in PCB regulations, addressing PCBs in the environment, managing PCB-containing equipment, and with PCBs in building materials.

### SPECIFIC PROJECT EXPERIENCE

Site Investigation and Remediation, Solid Waste Facility, Fairfield, Connecticut. Project manager for a PCB-, PAH, and metals impacted site, responsible for designing site investigation/remediation activities and preparing remedial plans/specifications/bid documents for the site.

Building Materials Survey and Soil Remediation, Former Manufacturing Facility, Meriden, Connecticut. PCB technical lead/project engineer responsible for planning/directing survey of potentially hazardous building materials, designing PCB investigation/remediation activities, negotiations with federal/state regulators, and preparing remedial plans/specifications/bid documents for a four-building demolition project at a city-owned Brownfield site. Developed innovative building remediation sampling procedures to allow for safe performance of demolition activities and removal of PCB-contaminated building materials from condemned structures.

Site Investigation and Remediation, Ryan Park, Norwalk, Connecticut. Prepared remedial action plans and negotiated approval from federal and state regulatory agencies for implementation. Aided the city in preparing bid documents, reviewing bids, and interviewing contractors prior to selection. Provided oversight for remediation and prepared and submitted the remedial action report following the completion of remedial actions. Aided the city in payment applications to EPA and closing out the grant.

Site Investigation and Remediation, Former Auto Salvage Yard, Springfield, Massachusetts. Served as PCB technical lead in designing site investigations to fill PCB data gaps. Aided the city in remedial discussions with federal and state regulators regarding site remediation. Prepared cost estimates for the city to use in evaluation of remedial alternatives. Performed remedial planning activities

that will include the removal of PCB impacted soil and preparation of bids and specifications and regulatory remedial action reports as part of project completion.

Remediation, Daniel's Mill, Vernon, Connecticut. Working with the Town of Vernon and the property developer to prepare Brownfields grant applications and preparing remedial action plans to address PCBs in site soil and building materials. Developed cost estimates for overall site remediation and redevelopment to support the application.

Site Remediation, Buffalo River Sediments, Buffalo, New York. PCB technical lead responsible for planning remediation activities and negotiations with federal and state regulators as part of the GLNPO project. Responsible for finalizing the remedial plan and for aiding in the preparation of project documents.

Site Remediation, Hudson River Sediments, Rensselaer, New York. PCB technical lead responsible for planning remediation activities and negotiations with federal and state regulators as part of this sediments remediation project. Responsible for finalizing the remedial plan and for aiding in the preparation of project documents.

High School Site Investigation and Remediation, Greenwich, Connecticut. Project manager and PCB technical lead for investigation and remediation tasks for a 57-acre high school site impacted by PCBs, metals, petroleum hydrocarbons, and SVOCs. PCB-related tasks for soil/groundwater include investigation/remedial design for a 12-acre area of impacted fill (a source of groundwater contamination). Also conducted investigation/risk assessment for impacted sediments and surface water. Performed soil investigation and designed remediation for a major construction project on the property. Responsible for planning investigation/remediation activities, negotiations with federal/state agencies, securing contractors, and overseeing remediation work. Performed remedial activities for PCBs under §761.61(a), (b), and (c).

Site Investigation and Remediation, Town-Operated Active Pump Stations, Greenwich, Connecticut. PCB technical lead/project engineer for investigation and remediation tasks associated with seven active municipal waste water pump stations with regulated PCB-containing paint and other building materials. Responsible for planning investigation and remediation activities, negotiations with federal and state agencies and for securing contractors, and overseeing remediation work. Remedial activities for PCBs performed under §761.62 and continued use authorizations under 761.30(u).

Building Materials Survey and Remediation, Multi-Building Demolition, Windsor, Connecticut. PCB technical lead/project engineer responsible for planning and directing survey of potentially hazardous building materials, PCB investigation, and remediation activities for a multi-building demolition project at ABB Commercial Property (large commercial site). Responsible for preparing remedial plans, negotiations with federal/state agencies, managing and directing investigation/remediation tasks, and preparing final remedial action reports. Developed innovative pre-demolition verification sampling procedures to allow for safe performance of demolition activities and removal of PCB-contaminated building materials.

### **HONORS & AWARDS**

2011 Teaching Assistant of the Year, Geology Steve has 15 years of geology and management experience. His skills include conducting site investigations, developing remediation strategies, and communicating results to regulatory agencies and the public. Steve has expertise in assessing properties, as well as conducting and managing environmental investigations. His experience includes working with numerous types of contaminated media, including indoor air, subslab soil vapor, groundwater, soil, and marine/freshwater sediment. In addition, Steve routinely provides services that include public presentations, estimation of project costs, budget maintenance, and management of field personnel.

### SPECIFIC PROJECT EXPERIENCE

16–20 Park Street, Springfield, Vermont. Lead scientist for the evaluation of potential contaminant source areas funded utilizing a VTDEC Brownfields Grant. Contaminants of concern included chlorinated solvents, volatile organic compounds, polycyclic aromatic hydrocarbons, and metals. Responsibilities included coordination with stakeholders to perform the Phase II Environmental Site Assessment, Site Specific Quality Assurance Project Plan generation for VTDEC and EPA approval, soil boring advancement, vapor intrusion testing, and sample collection. The property was being considered for redevelopment as multi-family residential. Also instrumental in generation of the Phase II ESA report including data evaluation and interpretation, conclusions, and recommendations.

Mower's News Service, White River Junction, Vermont. Lead scientist for the evaluation of potential contaminant source areas funded utilizing Two-Rivers Ottauquechee Regional Commission Brownfields Grant. Contaminants of concern at the former vehicle repair facility included chlorinated solvents (from on- and off-site), volatile organic compounds, polycyclic aromatic hydrocarbons, and metals. Responsibilities included oversight of ground penetrating radar survey of the site to identify UST locations and buried infrastructure. Oversaw and reported on the removal and assessment of 5 underground storage tanks. Generation of Site Specific Quality Assurance Project Plan for VTDEC and EPA approval. Coordinated and oversaw staff activities and communications with stakeholders. Also instrumental in generation of the Phase II ESA report including data evaluation and interpretation, conclusions and recommendations.

Beanville Road, Randolph, Vermont. Project scientist for performance of a Phase I Environmental Site Assessment and generation of a HUD required Environmental Review to obtain Community Development Block Grant Funding for construction of a large manufacturing facility in an existing business park. The Green Mountain Economic Development Corporation provided project funding. Environmental Review included collection of data and presentation in accordance with HUD and Vermont Agency of Commerce and Community Development requirements, including digital upload to Grant Electronic Application and Reporting System. Data presented included projected noise, traffic, stormwater, ecologic, and environmental justice related impact assessments.

Former Bennington Brush, Bennington, Vermont. Lead scientist for the evaluation of potential contaminant source areas funded utilizing Bennington County Regional Commission Brownfields Grant. Contaminants of concern at the former mill and textile manufacturing facility included chlorinated solvents, volatile organic compounds, polycyclic aromatic hydrocarbons, PCBs and metals. Responsibilities included performance of a Phase I ESA, oversight of ground penetrating radar survey of the site, and generation of Site Specific Quality Assurance Project Plan for VTDEC and EPA approval. Coordinated and oversaw staff activities and communications with stakeholders. Also instrumental in generation of the Phase II ESA report including data evaluation and interpretation, conclusions and recommendations.

Former Tuttle Hardware, Bennington, Vermont. Lead scientist for the evaluation of potential contaminant source areas funded utilizing Bennington County Regional Commission Brownfields Grant. Contaminants of concern at the former hardware store and gasoline distribution facility included polycyclic aromatic hydrocarbons and metals. Responsibilities included generation of Site Specific Quality Assurance Project Plan for VTDEC and EPA approval. Coordinated and oversaw staff activities and communications with stakeholders. Also instrumental in generation of the Phase II ESA report including data evaluation and interpretation, conclusions and recommendations.

Brownfields Area Wide Plan, Johnson, Vermont. Project scientist responsible for performance of a Phase I Environmental Site Assessment and brownfields site inventory of the Railroad Street corridor associated with the Lamoille County Planning Commission Brownfields Grant. Performed required database and local research regarding past and present uses of more than two dozen properties, potential high risk activities and compiled a comprehensive Phase I ESA report meeting ASTM, EPA and VTDEC requirements.

Blodgett Oven Factory, Burlington, Vermont. Completed Phase I and Phase II environmental site assessments funded by private sources and the Vermont Department of Environmental Conservation (VTDEC) Brownfields Reuse and Environmental Liability Limitation Program (BRELLA). Conducted the Phase I assessment in accordance with the EPA's all appropriate inquiries and ASTM E1527-13 standard. For Phase II, prepared and submitted a site-specific quality assurance project plan (SSQAPP) to VTDEC and the EPA for approval, conducted a thorough site assessment (which included sampling soil, groundwater, window caulking, and subslab soil gas), and reported the results to VTDEC and the EPA. Upon request of the regulatory agencies, conducted follow-up vapor intrusion assessment, including additional subslab soil gas and indoor air sampling.

Former Eveready/Energizer Battery Facility, Saint Albans, Vermont. Completed a Phase I ESA for a former battery manufacturing facility. Conducting operations and maintenance activities mandated by the VTDEC, including the O&M of a subslab depressurization system, monitoring and reporting for a groundwater interception trench, and site groundwater and surface water monitoring.

Blinn House Investigation and Remediation, Burlington, Vermont. Conducted vapor intrusion assessment and subslab depressurization system installation for the assessment and mitigation of vapors related to release of chlorinated solvents from a former laundry facility.
