## Class of 2024

**From:** Midtown West

**First Year at HM:** 6<sup>th</sup> Grade

**Favorite Class:** HM truly has classes that match everyone's academic and personal interests, however, one class I really enjoyed was Global Environmental History. In this class, we explored humans' relationship with non-human nature from the beginning of our existence up until today and traced fascinating trends.

**Activities:** Run and Founded STAMPS, a tutoring program that supports students in math virtually, Black Student Union, STEPS Mentor, Mock Trial, and Green HM.

**Favorite Cafeteria Food:** Definitely a Mozzarella, Tomato, and Basil Ciabatta Panini with Pesto Sauce and Grilled Chicken. Don't forget the sweet potato fries!

**Why HM?:** I love HM because there is a community for every type of individual here. Often there is this idea that every school has a specific student type, but at HM that doesn't exist. There are no limits to the kind of student you can be here but the resources and the support to invest in and explore your passions. Everyone here wants to see you exceed and be your most authentic self and I believe that is something very special.

**Favorite Things about HM:** The people are what make HM so special! Not only are the students here kind, curious, and dedicated to creating an incredible academic environment but the faculty are amazing. Every faculty member is committed to getting to know each and every student and is passionate about their curriculum and the school. Loving to learn here is so easy.

**Favorite HM Event:** Homecoming! Go Lions and Girls Varsity Soccer!!!
