

*ADDITIONS TO CO-CURRICULAR ACTIVITIES*

It is the policy of the Lyon County School District that in order for a school to add another athletic activity to the current program the following information must be collected:

1. The enrollment of the school requesting the additional activity.
2. The current NIAA league alignment of the school and whether the sport is currently being offered within the school's league alignment.
3. The number of students interested and/or the number of students that have participated in the sport in the previous three years, (i.e., where several students were cut from a team, adding J.V. or freshman teams).
4. Available competition.
5. Available facilities and/or impact on current facilities and possible impact on current programs.
6. Estimate expenses, including coaching staff, uniforms, equipment, officials, and transportation.

Upon completing this research the Principal and interested parties must review all information with the Superintendent.

Upon review the Superintendent shall present this request to the Board of School Trustees with a recommendation.
