

## Google account creation with non-Gmail account.

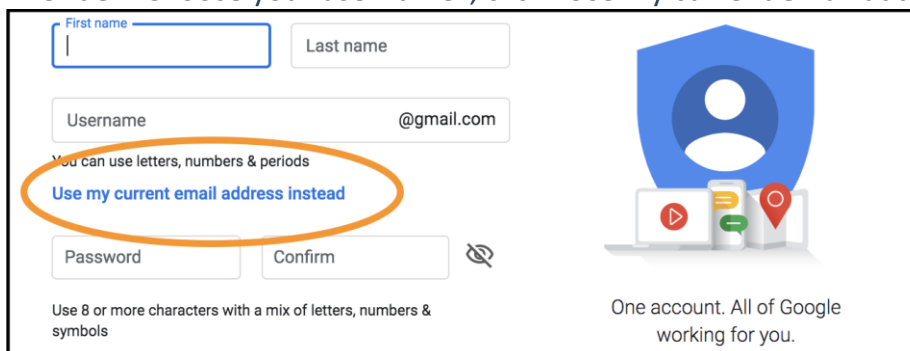

Follow below steps to create a Google account that is associated with your existing non-Gmail/Google-mail, email address:

1. Go to the Google sign-up page (<https://accounts.google.com/SignUp>):

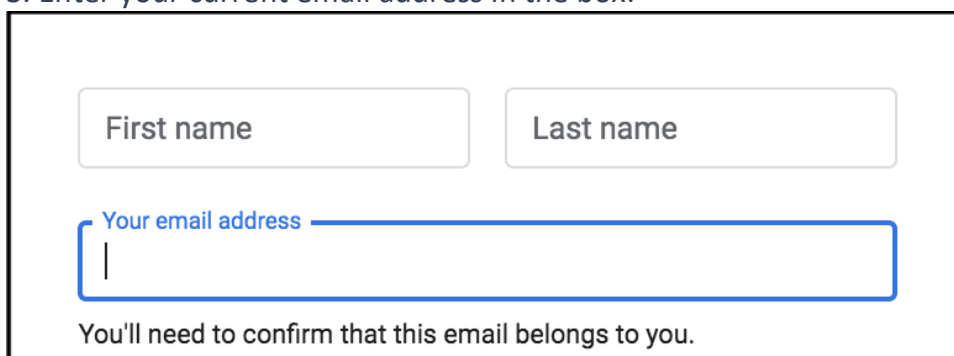

The screenshot shows the Google account creation page. At the top is the Google logo and the heading "Create your Google Account". Below this are input fields for "First name", "Last name", and "Username" (with a placeholder "@gmail.com"). A link "Use my current email address instead" is highlighted in blue. Below the username field is a note: "You can use letters, numbers & periods". There are also fields for "Password" and "Confirm" with an eye icon for toggling visibility. At the bottom left is a link "Sign in instead" and a blue "Next" button. On the right side, there is a graphic of a blue shield with a white person icon, and below it, icons for YouTube, Gmail, and Maps. Text at the bottom right says "One account. All of Google working for you."

2. Under "Choose your username", click "Use my current email address instead":

This screenshot is similar to the previous one, but the link "Use my current email address instead" is circled in orange to indicate it should be clicked. The rest of the page elements, including the input fields, buttons, and graphics, are the same.

3. Enter your current email address in the box:

This screenshot shows the next step in the account creation process. It features input fields for "First name" and "Last name". Below these is a large input field labeled "Your email address" with a blue border and a cursor. At the bottom, a text prompt reads: "You'll need to confirm that this email belongs to you."

4. Follow the prompts to complete your Google account setup.
