Procedure - Plan Evaluation		

In preparing its report to the Board of Directors the leadership and planning team engages in the following process:

1. Review the data collected since the last annual evaluation;
2. Review the goals, objectives, strategies and action plans; assess to what degree they have been implemented successfully; and analyze the reasons for success or failure in implementation;
3. In odd numbered years, review the visions, beliefs and mission of the district's plan for a fundamental evaluation of the district's progress and direction; and
4. Draft recommendations to the Board to proceed, modify, realign or end specific activities undertaken to implement the plan. Identify budget implications flowing from those recommendations. Draft recommended changes in the plan, if any.
