Monitoring at home is the big challenge

Having a more robust cloud based monitoring system for student devices would be ideal.

We would love to have necessary updates (e.g. zoom automatically push out without needing to touch each computer.

teachers working from home this year had trouble downloading updates themselves (no admin password as a teacher)

N/A.

New WiFi Password

I like team viewer /need to improve website/hard to find information and not user friendly

Creating content on our website is difficult. Is there another platform that we can use?
