

# Board Meeting

Wednesday, September 13, 2023

**The community spoke, and the schools listened, responding with a revised building plan to benefit our students and community.**

# **Bond Issue Update**

## You Spoke - We Listened

- With the failure of our former facilities bond, our community expressed concerns about the proposed location of the buildings on a single campus and the project cost.
- In January 2023, our community-driven Facility Planning Committee began meeting to discuss the bond and the building project publicly. Approximately 60 individuals from across our district attended a series of 11 meetings to create an updated plan that addresses the present and future needs of our community.

## Bond Issue Update

# The Updated Plan

## **Construct A New Middle School**

At the current Canfield Village Middle School site

## **Construct A Consolidated Elementary School**

C.H. Campbell Elementary and Hilltop Elementary will consolidate into one new K-4 elementary building at the Hilltop Elementary School site

## **Renovation of Canfield High School**

Maintains continued use of the current building

# Bond Issue Update

## Safety, Security and Access

- Multiple entry points, old door/window hardware, not designed with security in mind, many spaces not ADA accessible

## Aging Buildings and Costly Repairs

- Old buildings require more work to maintain them properly. This often exceeds the cost to replace them.

## Limited Educational Space

- The current schools aren't arranged for modern education. This includes having flexible collaborative spaces with modern technology.

**Challenges with our elementary  
and middle school buildings**

**Challenges with our elementary  
and middle school buildings**

Mrs. Altiero

“Two years ago, I returned to school after a break to find ceiling tiles from a section of the room had fallen as a result of being saturated, exposing the original water stained wood. With the tiles fell heavy chunks of deteriorating plaster. The weight and water had destroyed books and furniture but, thankfully, no children were in the room at the time. While the children were at Gym, the custodians worked to clean and secure the area. Without warning a very large piece of plaster fell directly onto a desk just missing one of the custodians. I was overwhelmed with emotion at the thought of what could have resulted had a child been seated there.

I was quickly relocated into the special education tutoring room thus displacing two other teachers. The domino effect negatively impacted a large population of students for the remainder of the school year, many who needed consistency and quiet but were instead faced with a tumultuous upheaval. The years-long problem called to question the physical safety of the space and raised both health and educational concerns.”

# Challenges with our elementary and middle school buildings

**What are the possibilities in new facilities?**

**New K-4 Rendering**

**New MS Rendering**

# School Safety

Secure vestibule, Surveillance cameras, Door access systems, Fire suppression, Fire alarms, PA system, HVAC - air quality, Lighting, Bus traffic, Parent drop-off/pick-up

**Flexible Classrooms for Younger Learners**

# Flexible Classrooms for Younger Learners

**Space for Collaboration**

**Furniture Designed for Learning**

**Technology for all Grade Levels**

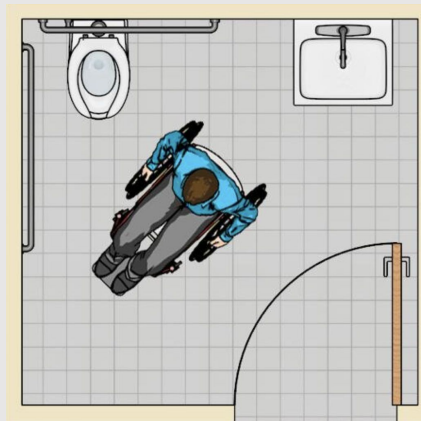

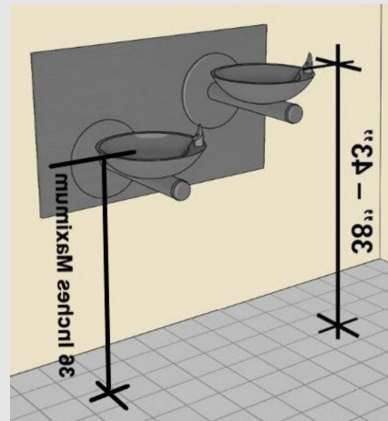

Cafetorium

**Gymnasium**

**STEM room**

**ADA Compliant**

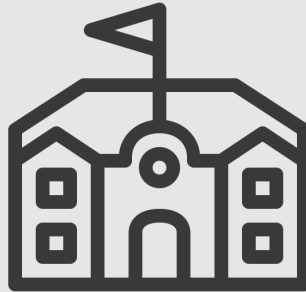

**Integrated Outdoor Learning Spaces**

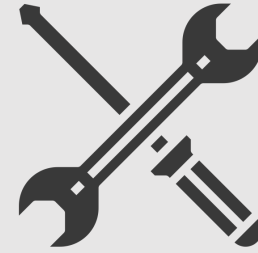

# Integrated Outdoor Learning Spaces

- A new **K-4 elementary school** on the Hilltop site
- 997 students
- Road updates and improvements
- Repurpose the Hilltop school

- A new **5-8 middle school** on the CVMS site
- 841 students
- Includes a second gym for student use

- Select **high school renovations**
- Replace roof
- New storm water drainage
- Replace all site parking
- Windows/lighting
- Fix foundation

**The developed master plan satisfies facility needs in Canfield**

## **Safety, Security and Access**

- A modern, safe, environment that provides access to all students on the same school sites the community is familiar with.

## **Aging Buildings and Costly Repairs**

- New building structures, systems and site work to last for the next 70 years.

## **Limited Educational Space**

- Flexible collaborative spaces that enhance the students experience and allow them access to better opportunities.

**The Selected Master Plan Addresses the  
Canfield Schools Facility Challenges**

Community Informational Meeting  
to be held in early October.

**Next Steps**

Thank you!!
