High Schools 4

Charter Schools 5

Appendix A – Individual Elementary School Enrollments

Appendix B – Individual Secondary School Enrollments

EXECUTIVE SUMMARY

The purpose of the annual class size report is to provide information on the number of students in individual classrooms and the average class sizes in the schools and district. This report presents the average number of students enrolled in elementary, middle, and high school classes in the fall semester. Appendix A presents individual elementary school enrollments in regular classes. Appendix B presents enrollment data for each period of the day in middle and high schools.

Notable Facts:

Class sizes are important for making staffing adjustments as enrollments fluctuate within schools and across the district. The school district makes every attempt to keep class sizes as low as funding will allow. This report does not present total enrollment figures, but rather the average class size for regular education classrooms. Class size averages in this report are based on enrollment data extracted from the district's student records system from October 1, 2012. It is important to note that the actual size of individual classes may vary considerably.

What is Being Measured:

Class size averages for each school are derived by dividing the number of students enrolled in regular classes by the number of regular classes. In elementary schools, students generally remain together in the same class with the same teacher throughout the day. Therefore, a single number represents the class size, by grade level, for each elementary teacher. In secondary schools, class sizes vary from period to period. Average class sizes do not include students enrolled in preschool programs, self-contained special education classes, bilingual classes, charter schools, alternative programs (such as the Fairbanks Youth Facility school), advisory periods, or homeroom periods. Where comparable statistics are available, historical data for the previous five years are provided.

What the Results Show:

Class size data for 2012 show:

- 7,309 K-6 students in elementary schools, with an average class size of 23.3
- 1,855 students in middle and junior high schools, with an average class size of 21.2
- 3,561 students in high schools, with an average class size of 21.2

ELEMENTARY SCHOOLS

At the elementary schools, the average class size on October 1, 2012 was 23.3 students. This calculation is based on 314 regular education classrooms with a total enrollment of 7,309 students (see Table 1). All elementary school class size averages include students who are integrated into the regular education classroom for at least a portion of the academic day.

Individual school averages vary, ranging from 18.0 at Two Rivers to 25.5 at Denali. Historical data for the past five years are also included in Table 1. The current class size average of 23.3 students is slightly higher than the previous year.

District*	7,309	314	23.3	23.1	22.9	23.6	23.5	22.1

* Excludes 106 7th and 8th graders in 5 classrooms at Barnette and Two Rivers.

Average class sizes at each grade level are presented in Table 2. The grade levels with the lowest and highest average class sizes are, respectively, multiage classrooms with 18.8 and 4th grade classrooms with 25.9 students per class. Class sizes for kindergarten represent the total enrollments in the classroom for both morning and afternoon classes which generally overlap for two and a half hours, during which time an aide is present. Historical averages for the past five years are also included in Table 2.

MIDDLE SCHOOLS

At the middle schools, the overall class size average for 7th & 8th grade classes on October 1, 2012 was 21.2 students. This represents an increase from last year, when the average class size was 20.6. See Appendix B for class enrollments by period at each middle school. Students also may earn grades for the following types of courses which are excluded in computing class size averages: study halls, advisories, connections, Reach, homeroom period, and student assistants.

Table 3 lists the average number of students enrolled at each middle school by department and Table 4 lists the average number of students enrolled at each middle school by period. North Pole Middle School has the largest average class size at 22.9, and Ben Eielson Junior High School has the smallest average class size with 16.3 students. Average class sizes vary by school between 13.3 and 26.8 students in the core subject areas of language arts, math, science, and social studies. Not reflected in the class size averages for middle schools are enrollments of seventh and eighth graders at K-8 schools. Additionally, on October 1, 2012, there were 91 students in grades 7 and 8 at Barnette Magnet School and 15 at Two Rivers School. Enrollments for charter schools and the district's correspondence school are reported separately, on page 5 of this report.

*NPM averages only include 7th - 8th grade classes. 6th grade classes have an average class size of 24.1.

HIGH SCHOOLS

At the high schools, the overall class size average on October 1, 2012 was 21.2 students. This was a slight decrease from last year, when the average class size was 21.6 students. See Appendix B for class enrollments by period at each high school. Students also may earn grades for the following types of courses which are excluded in computing class size averages: study halls, Advisories, English as a Second Language, outside credit, university classes, aides (library, office, teacher, etc) and assistants (classroom and lab).

Table 5 lists the average number of students enrolled at each high school by department and Table 6 lists the average number of students enrolled at each high school by period. Both tables only include enrollments for standard periods across the district, though some schools have classes during additional periods. North Pole High School has the largest average class size this year at 23.5, and Ben Eielson High School has the smallest average class size with 13.6 students. Average class sizes vary by school between 12.5 and 26.4 students in the core subject areas of language arts, math, science, and social studies. Not reflected in the class size averages for high schools are enrollments of 9th-12th graders at schools other than traditional high schools. Enrollments for charter schools and the district's correspondence school are reported separately, on page 5 of this report.

CHARTER SCHOOLS & BEST

In addition to nineteen elementary and ten secondary schools, the district includes four charter schools as well as Fairbanks BEST (Building Educational Success Together) correspondence school, an online learning and homeschool program. Table 7 presents enrollments at these schools. As of October 1, 2012, the four charter schools had a total enrollment of 696 and BEST had a total enrollment of 278 students.

Appendix A

Individual Elementary School Enrollments Fall 2012

KINDERGARTEN NOTE: Class sizes indicated for most schools' kindergarten classes show the number in the morning session plus the number in the afternoon session, as well as the total enrollments in the classroom. The total enrollments indicate the number of students present during the 2 ½ hours they overlap, when an aide is also present.

INTEGRATED SPECIAL EDUCATION NOTE: Adjustments have been made to include special education students who are integrated into a regular education teacher's classroom for a portion of the academic content. These integrated students are indicated by numbers in parentheses.
