Appendix B – Individual Secondary School Enrollments

## **EXECUTIVE SUMMARY**

The purpose of the annual class size report is to provide information on the number of students in individual classrooms and the average class sizes in schools and the district. This report presents the average number of students enrolled in elementary, middle, and high school classes in the fall semester. Appendix A presents individual elementary school enrollments in regular classes. Appendix B presents enrollment data for each period of the day in middle and high schools.

### ***Notable Facts:***

Class sizes are important for making staffing adjustments as enrollments fluctuate within schools and across the district. The school district makes every attempt to keep class sizes as low as funding will allow. This report does not present total enrollment figures, but rather the average class size for regular education classrooms. Class size averages in this report are based on enrollment data extracted from the district's student records system on October 1, 2013. It is important to note that the actual size of individual classes may vary considerably.

### ***What is Being Measured:***

For the purpose of this report, class size is measured as the number of students instructed by a teacher during a period. Class size averages for each school are derived by dividing the number of students enrolled in regular classes by the number of regular classes. In elementary schools, students generally remain together in the same class with the same teacher throughout the day. Therefore, a single number represents the class size for each elementary teacher, by grade level. In secondary schools, class sizes vary from period to period. Average class sizes do not include students enrolled in preschool programs, self-contained special education classes, English as a Second Language classes, charter schools, alternative programs (such as the Fairbanks Youth Facility school), advisory periods, or homeroom periods. Where comparable statistics are available, historical data for the previous five years are provided.

### ***What the Results Show:***

Class size data for 2013 shows:

- 7,210 K-6 students in elementary schools, with an average class size of 23.6
- 1,781 students in middle and junior high schools, with an average class size of 22.0
- 3,486 students in high schools, with an average class size of 23.0

## ELEMENTARY SCHOOLS

At the elementary schools, the average class size on October 1, 2013 was 23.6 students. This calculation is based on 306 regular education classrooms with a total enrollment of 7,210 students (see Table 1). All elementary school class size averages include students who are integrated into the regular education classroom for at least a portion of the academic day. These averages do not reflect students enrolled in preschool programs or self-contained special education classes.

Individual school averages vary, ranging from 18.3 at Salcha to 27.1 at Crawford. Historical data for the past five years is also included in Table 1; the current class size average of 23.6 students is slightly higher than the previous year.

\* Excludes 103 7<sup>th</sup> and 8<sup>th</sup> graders in 5 classrooms at Barnette and Two Rivers.

Average class sizes at each grade level are presented in Table 2. The grade levels with the lowest and highest average class sizes are, respectively, kindergarten classrooms with 23.1 and 5<sup>th</sup> grade classrooms with 24.5 students per class. Class sizes for kindergarten represent the total enrollments in the classroom for both morning and afternoon classes which generally

overlap for two and a half hours, during which time an aide is present. Historical averages for the past five years are also included in Table 2.

\*Includes 11 6<sup>th</sup> graders from a 6-7-8 Multiage classroom at Two Rivers.

## MIDDLE SCHOOLS

At the middle schools, the overall class size average for 7<sup>th</sup> & 8<sup>th</sup> grade classes on October 1, 2013 was 22.0 students. This represents an increase from last year, when the average class size was 21.2. See Appendix B for class enrollments by period at each middle school. Students also may earn grades for the following courses which are excluded in computing class size averages: study halls, advisories, connections, student assistants, stand-alone special education classes, and courses held during nonstandard periods (periods 7-8).

Table 3 lists the average number of students enrolled at each middle school by department and Table 4 lists the average number of students enrolled at each middle school by period. Randy Smith Middle School has the largest average class size at 24.4, and Ben Eielson Junior High School has the smallest average class size with 17.6 students. Average class sizes in the core subject areas of language arts, math, science, and social studies vary by school, between 15.0 and 29.3 students. Not reflected in the class size averages for middle schools are enrollments of seventh and eighth graders at K-8 schools. Additionally, on October 1, 2013, there were 90 students in grades 7 and 8 at Barnette Magnet School and 13 at Two Rivers School. Enrollments for charter schools and the district's correspondence school are reported separately, on page 5 of this report.

\*NPM averages only include 7<sup>th</sup> - 8<sup>th</sup> grade classes. 6<sup>th</sup> grade classes have an average class size of 23.4.

## HIGH SCHOOLS

At the high schools, the overall class size average on October 1, 2013 was 23.0 students. This was an increase from last year, when the average class size was 21.2 students. See Appendix B for class enrollments by period at each high school. Students also may earn grades for the following courses which are excluded in computing class size averages: study halls, advisories, English as a Second Language courses, outside credit, university classes, distance delivery, aides (library, office, teacher, etc), assistants (classroom, lab, and tutor), stand-alone special education classes, and courses held during nonstandard periods (periods 7-10).

Table 5 lists the average number of students enrolled at each high school by department and Table 6 lists the average number of students enrolled at each high school by period. North Pole High School has the largest average class size this year at 26.0, and Ben Eielson Senior High School has the smallest average class size with 16.3 students. Average class sizes in the core subject areas of language arts, math, science, and social studies vary by school, between 14.9 and 29.2 students. Not reflected in the class size averages for high schools are enrollments of 9<sup>th</sup>-12<sup>th</sup> graders at schools other than traditional high schools. Enrollments for charter schools and the district's correspondence school are reported separately, on page 5 of this report.

\*Standard periods across the district. Some schools have additional periods with additional classes.

## **CHARTER SCHOOLS & B.E.S.T.**

In addition to nineteen elementary and ten secondary schools, the district includes four charter schools as well as Fairbanks B.E.S.T. (Building Educational Success Together) correspondence school, with online learning and homeschool programs. Table 7 presents enrollments at these schools. As of October 1, 2013, the four charter schools had a total enrollment of 706 and B.E.S.T. had a total enrollment of 281 students.

# Appendix A

## Individual Elementary School Enrollments Fall 2013

**KINDERGARTEN NOTE:** Class sizes indicated for most schools' kindergarten classes show the number in the morning session plus the number in the afternoon session, as well as the total enrollments in the classroom. The total enrollments indicate the number of students present during the 2 ½ hours they overlap, when an aide is also present.

**INTEGRATED SPECIAL EDUCATION NOTE:** Adjustments have been made to include special education students who are integrated into a regular education teacher's classroom for a portion of the academic content. These integrated students are indicated by numbers in parentheses.
