Appendix B: District Report from National Student Clearinghouse: StudentTracker for High School Classes of 2007-2014

## **EXECUTIVE SUMMARY**

### **CLASS OF 2014**

This report presents the results of the 527 opinion polls taken by the senior class in April and May 2014, as well as data on the postsecondary enrollment of the 816 graduates in the Class of 2014.

#### ***Notable Facts:***

- There were 816 graduates in the Class of 2014, compared to 817 in the Class of 2013.
- Approximately 65% of the Class of 2014 participated in the senior survey.
- When asked to rate the overall quality of the education they received, 80% of the responding seniors gave their school an A or a B.
- Data from the National Student Clearinghouse indicates that 50% of the Class of 2014 enrolled in college in the semester following graduation.

#### ***What is Being Measured:***

This report provides the results of the graduating senior surveys completed at each high school. These results provide insight into students' future plans, general experiences in high school, participation in extracurricular activities as well as Advanced Placement and Career Technical Education courses, support received from school staff, preparation for college and career, influences on career choices, and overall satisfaction with their schools. While the survey gathered student opinions and information about their plans, the StudentTracker data reported what students actually did in terms of postsecondary enrollment after graduation.

#### ***What the Results Show:***

Approximately 90% of the students who completed the survey stated they plan to complete further education beyond high school, and half of them indicated an intention to attend a four-year college or university. The majority of students indicated that their experiences in high school improved their abilities in basic life skills. The majority of students reported receiving some or a lot of staff support in selecting courses needed for graduation requirements, employment, and admission to college. More than half of the students indicated they had decided on a trade or career field, and roughly half had taken at least one Career Technical Education course. Approximately 60% of students who planned to pursue education beyond the high school level indicated they were likely or very likely to leave Alaska to pursue educational opportunities. StudentTracker data indicates approximately 33% of 2014 graduates enrolled in a college in Alaska and 17% enrolled outside Alaska in the first semester after graduation.

## **INTRODUCTION**

There were 816 graduates in the Class of 2014. Beginning in the 2008-09 school year, the district has administered an in-depth graduating senior survey to solicit feedback on a variety of topics. Members of the 2014 senior class were given time during the school day to complete the survey online via a web link, and 65% of the graduating class participated in the survey. Student responses to each question are disaggregated by school in this report, and a two-year comparison of key survey responses is provided in Appendix A.

Beginning in the 2009-10 school year, the school district contracted to receive StudentTracker data from the National Student Clearinghouse. StudentTracker is designed to help high schools and school districts gauge the college success of their graduates by providing information about how many high school graduates enroll in college, which colleges they attend, how many persist and graduate from college, and the time it takes them to complete their degree.

## **SENIOR SURVEY RESULTS**

In the 2008-09 school year, the school district began administering a new survey to all graduating seniors; the survey was revised slightly in Spring 2012. The questions addressed a variety of specific topics including plans and preparation for the future, experiences in Advanced Placement and Career Technical Education courses, support services provided by school staff, and overall satisfaction with the schools. Additional open-ended questions provided a forum for other student input.

### ***Response Rates***

Table 1 presents response rates for each participating high school. Response rates are calculated by dividing the number of completed surveys by the number of graduating seniors at each high school. There were a total of 816 students in the graduating class of 2014, including 3 at Alternative Learning Systems (ALS) and 4 at Golden Heart Academy, the two schools not included in the senior survey. The overall response rate for the survey was 65%, with individual schools' response rates ranging from 21% to 100%.

**Table 1  
Response Rates by School**

High School	Graduating Class	Surveys Completed	Response Rate
Ben Eielson	52	51	98%
BEST	35	35	100%
Effie Kokrine	17	15	88%
Hutchison	80	47	59%
Lathrop*	203	208	100%*
North Pole High	150	90	60%
Star of the North (CEC & NPA)	73	15	21%
West Valley	199	66	33%
<b>District**</b>	<b>816**</b>	<b>527</b>	<b>65%</b>

\*Lathrop had more surveys completed than students who graduated. This is due to 12<sup>th</sup> graders who completed the survey but did not graduate with the rest of their 12<sup>th</sup> grade class.

\*\* District results include 7 graduates from ALS and Golden Heart Academy.

**Limitations**

The interpretation of these results is limited by the degree to which the completed surveys are representative of the entire graduating senior class. Although the majority of graduating seniors (65%) completed the survey, their opinions may be different than those who did not complete it.

**Longevity at Graduating School**

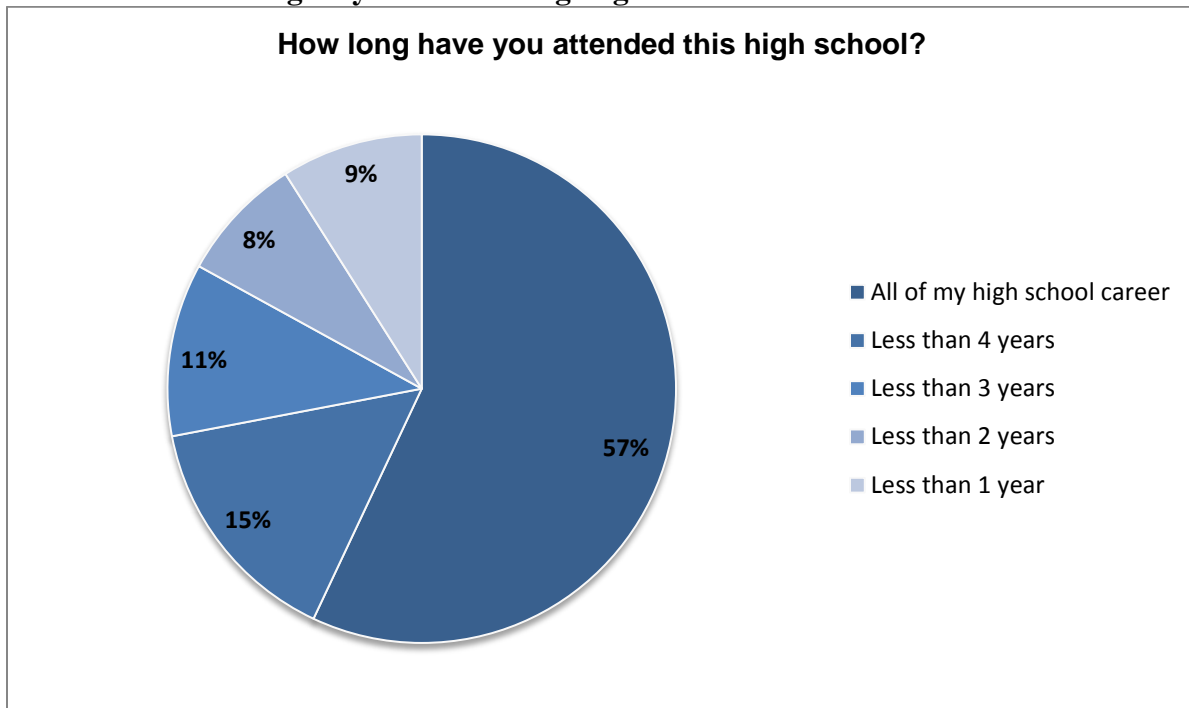

Table 2 and Graph 1 report the length of time students reported attending their graduating high school. The majority of students who participated in the poll indicated that they had been attending their current high school for their entire high school career. Longevity varied by school, with North Pole High having the highest percentage of students completing all four years of high school there.

**Table 2  
Longevity at Graduating School**

<i>How long have you attended this high school?</i>	DISTRICT	Ben Eielson	BEST	Effie Kokrine	Hutchison	Lathrop	North Pole	SON	West Valley
All of my high school career	57%	61%	3%	27%	52%	58%	73%	47%	72%

\*Totals may not equal 100% due to rounding.

***General High School Experiences***

Table 3 contains results from the questions concerning students’ general experiences in high school. The majority of students across the district indicated they had often or always worked to the best of their abilities during high school. The majority of students indicated they had often or always received help when they asked for it, felt safe in school, and had at least one adult at school to whom they could talk. About 34% indicated that they had often or always felt bored in class. Only 5% indicated that they had often or always thought about dropping out. About 9% indicated they had often or always skipped classes, and 18% said their learning was often or always disrupted by the behavior of their classmates. The majority of students indicated that their experiences in high school improved their abilities in basic life skills such as taking responsibility, being on time, following directions, working well with adults, using time effectively, asking questions or asking for help, taking initiative, completing tasks, having confidence in their ability to get work done, planning time wisely, meeting high standards, following rules and norms, working on a team, interacting with people from diverse backgrounds, identifying and improving strengths and weaknesses, and resolving conflicts.

### *Future Plans of Students*

Table 4 contains results from the questions concerning students' plans for the future. When asked about their plans for the fall, about 63% of the students across the district indicated an intention to pursue further education (including apprenticeships), while 14% stated they would most likely work full-time. Approximately 90% of students stated they plan to complete further education beyond their high school diploma. Approximately 61% of the students who indicated an intention to pursue further education also indicated that they had already been accepted into a post-secondary educational program, and 60% of students stated that they were likely or very likely to leave Alaska to pursue educational opportunities.

**Table 4**

***Student Preparations for the Future***

Table 5 contains information about the academic and vocational endeavors students had completed or were planning to complete. Eighty-eight percent indicated that they had completed, were completing, or planned to complete a college entrance exam. Sixty-six percent stated they had gained or currently were gaining experience through paid employment or volunteer work experiences. Nine percent had already enlisted or were in the process of enlisting in the military, while an additional 10% stated they were planning to do so.

***Influences on Student Career Choices***

Table 6 contains information about who and/or what influenced student selection of career fields or trades. Family members were the most commonly cited influences in career choices, followed closely by things learned in a high school class. Approximately 23% of the students indicated they had not decided on a trade or career field.

**Table 6  
Influences on Student Career Choices**

<i>If you have chosen a trade or career field to pursue, did any of the following influence your decision?</i>	DISTRICT	Ben Eielson	BEST	Effie Kokrine	Hutchison	Lathrop	North Pole	SON	West Valley

\*Totals may not equal 100% due to rounding and ability to choose more than one answer.

### ***Participation in Career Technical Education***

Table 7 contains information about student involvement in the district's Career Technical Education program. About 50% of students across the district reported having taken at least one Career Technical Education (CTE) course during their high school years.

**Table 7**  
**Career Technical Education**

<b><i>Did you take any Career Technical Education courses during your high school career? (Courses like Drafting, Accounting, Job Co-op, etc)</i></b>	<b>DISTRICT</b>	<b>Ben Eielson</b>	<b>BEST</b>	<b>Effie Kokrine</b>	<b>Hutchison</b>	<b>Lathrop</b>	<b>North Pole</b>	<b>SON</b>	<b>West Valley</b>

\*Totals may not equal 100% due to rounding.

### ***Participation in Advanced Placement***

Table 8 contains information about student involvement in the district's Advanced Placement program. Thirty-seven percent of students across the district reported having taken at least one Advanced Placement (AP) class or exam. The online survey provided an additional set of survey questions to those students who indicated having taken at least one AP course, thus the percentages reported in this section are for the 193 students answering the questions, not all 527 students who took the survey. Of the 193 students who had been involved in the AP program, the majority indicated being influenced by the desire for a challenge (61%), teacher encouragement (59%), and getting a head start on college credits (57%). Students who had not been involved in the AP program cited being too busy with other activities (47%) and thinking that the class or exam would be too difficult (34%) as the most common reasons for not participating.

### ***Support Provided by School Staff***

Students were asked to think about the many school staff members with whom they had met throughout high school and indicate how much support they had received from them in

various areas. Sixty-two percent of students reported receiving a lot of help with being encouraged to continue education after high school. As Table 9 shows, the majority of students reported receiving some or a lot of support in selecting courses needed for graduation requirements, employment or admission to college, as well as in deciding what to do after graduation. The majority of students also reported receiving some or a lot of support from staff in the areas of employability skills and schools or training opportunities that matched their interests and abilities.

**Table 9

***Participation in Extracurricular Activities***

Students were asked to indicate which extracurricular activities they participated in during their high school careers and how important these activities were to their educational experience. As shown on Table 10, team and individual sports were the activities most students identified as having participated in and as being important in their learning experience. Approximately 69% of the Class of 2014 reported participating in team or individual sports, with 43% indicating they were very important to their learning experience. Art was the next most frequently identified category of extracurricular activities, with approximately 36% of students reporting participation. When students were asked, “How important to your academic learning were extracurricular activities and out of school experiences,” 46% indicated they were very important while another 39% indicated they were somewhat important. Seniors were also asked, “How important to your social development were extracurricular activities and out of school experiences?” Forty-nine percent said “very important?” and another 38% answered “somewhat important.”

**Grades Given to Schools**

The survey asked students to give an overall grade to their school. Results are summarized in Graph 2 and Table 11. When asked to rate the overall quality of the education they received, 80% of students gave their school an A or a B. Approximately 3% of students gave their school a D or an F, while 18% gave their school a C.

**Graph 2**

### **COMPARISON OF STUDENT PLANS AND ACTUAL ENROLLMENT DATA**

StudentTracker data summaries from the National Student Clearinghouse provide the district with information about the progression of each class of students through postsecondary education, including first enrollment, retention, graduation, dropout, and re-enrollment. The district receives a variety of reports from StudentTracker including data on the number of district graduates enrolled in college within the first two years after graduating high school, which colleges they enrolled in, how many enrolled at two- and four-year institutions both in and out of state, how many persisted in college, and what percentage of students obtained a college degree. The district's StudentTracker overview of the graduating classes of 2007-2014 is provided in Appendix B. Each high school principal will receive a comprehensive StudentTracker report on the postsecondary enrollment and achievements of the graduates from his or her school.

The StudentTracker report indicates that a lower percentage of the district's 2014 graduates enrolled in a 4-year degree program in the first semester after graduation (46%) than had indicated the intention to do so on the survey (50%). While 60% of the seniors who planned to pursue education beyond high school indicated that they would likely or very likely leave Alaska to pursue their post-secondary goals, the StudentTracker data indicate that, by the first semester after graduation, only 17% had enrolled in an institution outside Alaska.

**Table 12**  
**Survey Responses About College Enrollment Plans for Fall Following Graduation**

<i>Class of 2014</i>	<b>Senior Opinion Poll Results</b>			
	Total Surveys Completed	Planned to Enroll in 2 Year Program	Planned to Enroll in 4 Year Program	Likely or Very Likely to Leave AK to Pursue Educational Goals
<b>Ben Eielson</b>	51	2%	70%	68%
<b>BEST</b>	35	12%	35%	71%
<b>Effie Kokrine</b>	15	27%	13%	33%

<b>Effie Kokrine</b>	17	0%	29%	0%
<b>Hutchison</b>	80	4%	44%	10%
<b>Lathrop</b>	207	3%	47%	17%
<b>North Pole High</b>	155	5%	45%	16%
<b>Star of the North (CEC &amp; NPA)</b>	76	1%	16%	3%
<b>West Valley</b>	200	4%	60%	25%
<b>DISTRICT*</b>	831**	4%	46%	17%

*\*District results include data from schools that are not reported individually due to the low numbers of students (ALS and Golden Heart Academy).*

*\*\*The number of 2014 graduates reported by StudentTracker is different from the number of graduates reported by the district, due to coding differences and differing definitions of graduation year.*

## **CONCLUSION**

On a district level, results from graduating senior surveys were positive, with the majority of students indicating that they had often or frequently received help when they asked for it, felt

safe in school, and had at least one adult at school with whom they could talk. Results from the surveys of each graduating class provide district and school leadership teams with the opportunity to study and address areas that students did not rate as highly as others.

The Class of 2014 had a response rate of approximately 65% on the senior survey. About 90% of the students who completed the survey stated they plan to complete further education beyond high school, and approximately 50% indicated an intention to attend a four-year college or university in the fall following graduation. The majority of students indicated that their experiences in high school improved their abilities in basic life skills. About 80% of the participating students rated the overall quality of the education they received as either “Good” or “Very Good.”

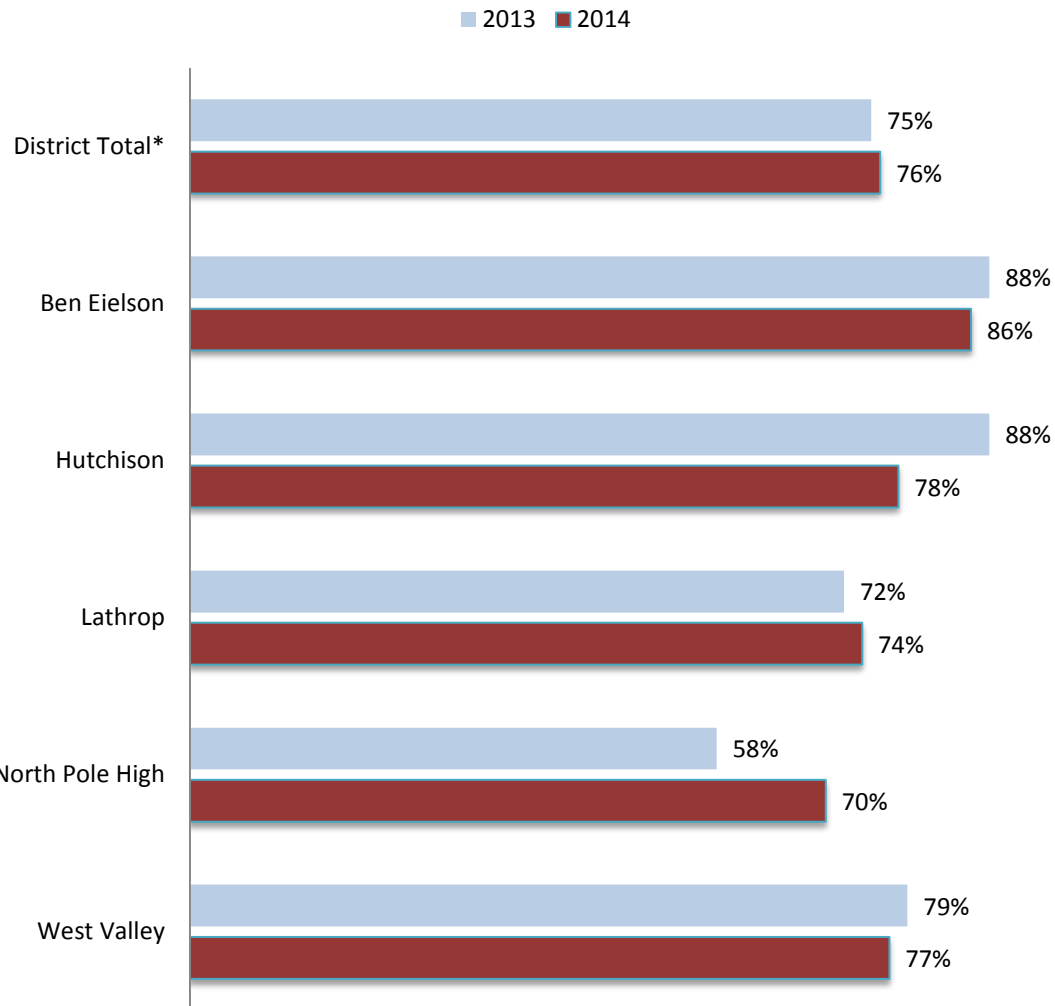

## Appendix A

### Summary of Survey Highlights

#### A Comparison of the Classes of 2013 and 2014

## Percent of students who reported they "often or always" felt safe in school

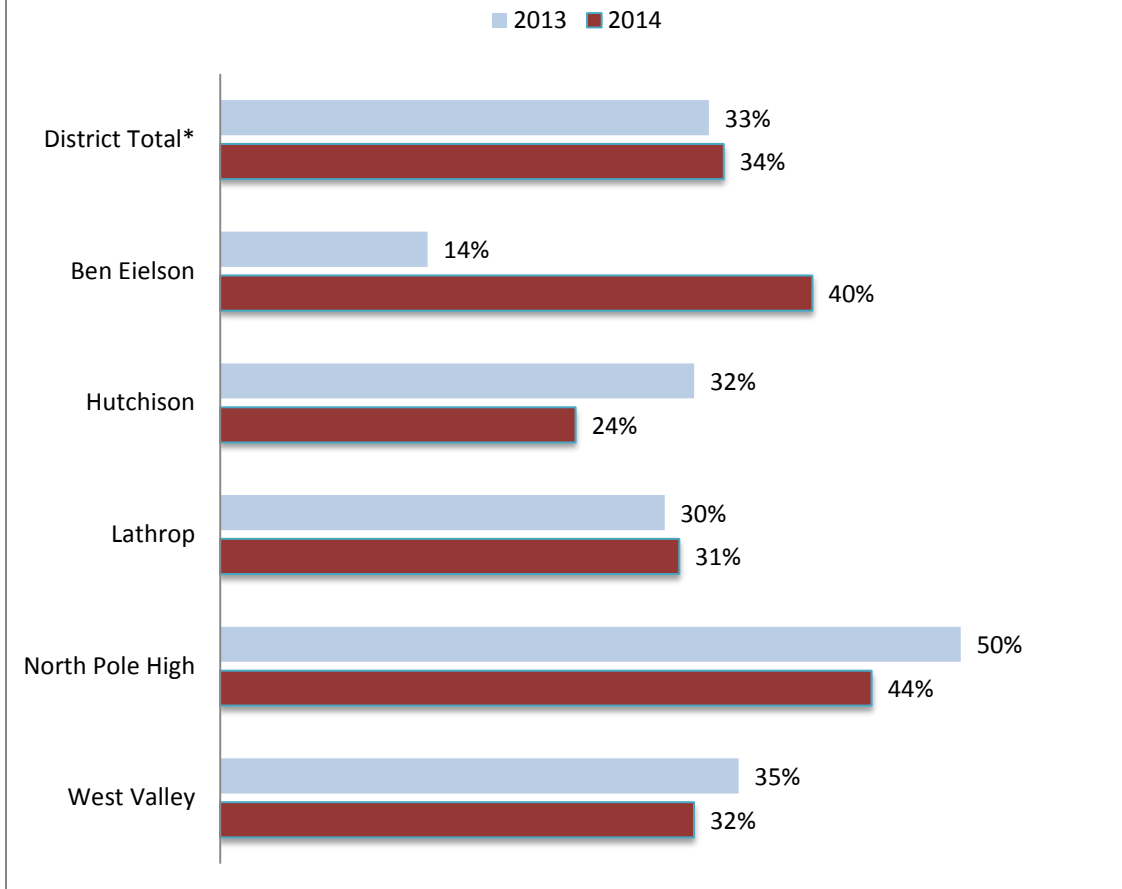

## 2013 & 2014

The total percent of seniors who reported they "often or always" felt safe at school increased from 75% to 76%

The biggest change was at North Pole High where the percent who reported they "often or always" felt safe in school increased from 58% to 70%.

\*District totals include data from schools not reported individually due to the low number of students.

## Percent of students who reported they "often or always" felt bored in class

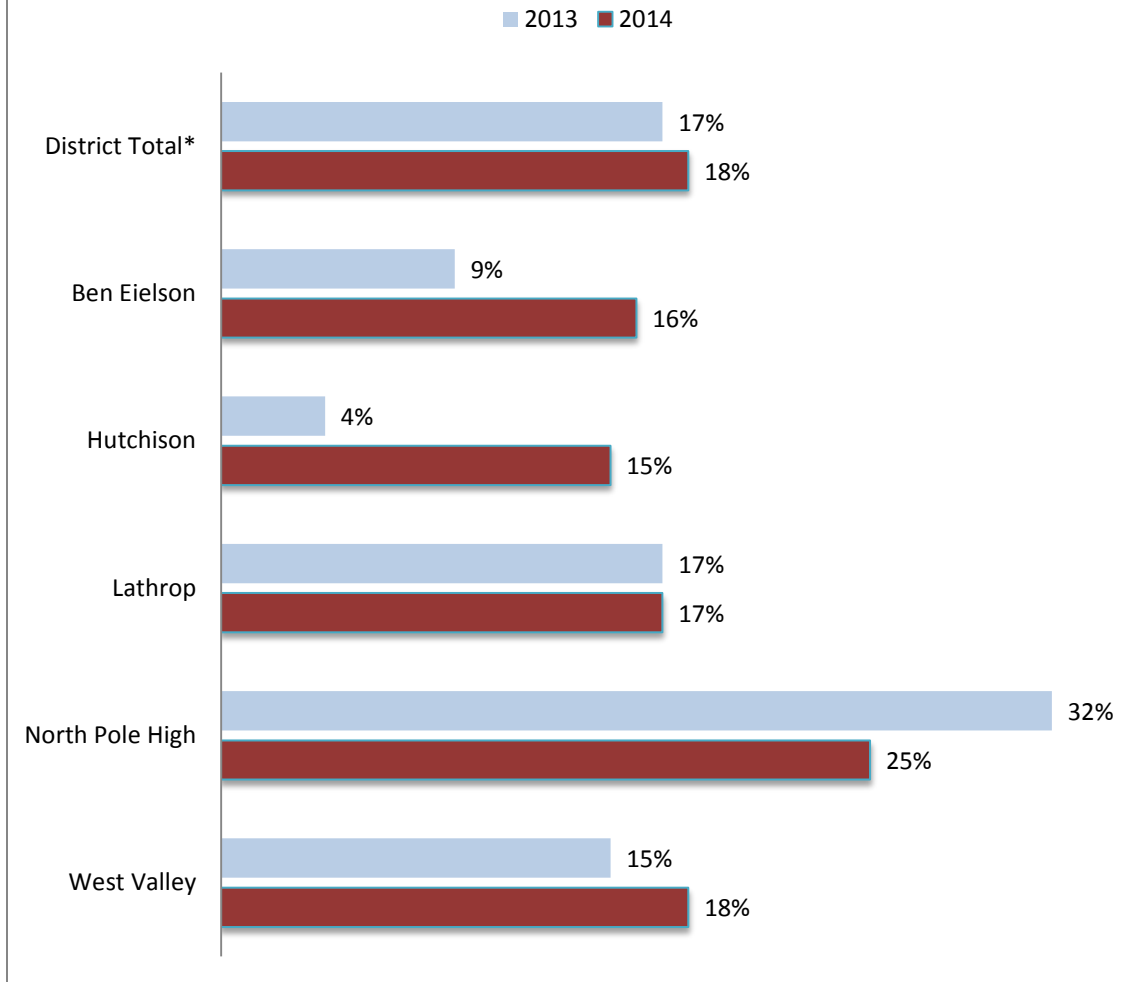

\*District totals include data from schools not reported individually due to the low number of students.
