

Enable Hotspot on iPhone

Setting up a hotspot on an iPhone is exceedingly easy. First, open **Settings**.

Near the top you'll see a tab called "Personal Hotspot." Tap on that.

You will only need to configure the password. The hotspot itself will be named after whatever you called your device.

To connect another device:

On the device that you want to connect, go to Settings > Wi-Fi and look for your iPhone or iPad in the list. Then tap the Wi-Fi network to join. If asked, enter the password for your Personal Hotspot.
