

Students

Student Photographs

The New London Board of Education permits student photographs to be taken on school premises by a commercial photographer selected by the Principal of the building or his or her designee. Principals will ensure that the price of the photographs does not preclude any student from participating in the student photograph program.

Arrangements should be made by the Principal so that children who cannot afford to pay for school pictures will still be able to receive them.

Photographs of students may be taken by school personnel for inclusion in the student's records.
