

Instruction

Student Wellness

The New London Board of Education is committed to the optimal development of every student. The District believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes.

This policy outlines the New London Public Schools' approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Students in the District have access to healthy foods throughout the school day – both through reimbursable school meals and other foods available throughout the school campus – in accordance with Federal and state nutrition standards;
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active before, during and after school;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of the District in creating continuity between school and other settings for students and staff to practice lifelong healthy habits; and
- The District establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives.

This policy applies to all students, staff and schools in the District. Specific measureable goals and outcomes are identified within each section below.

I. School Wellness Committee

Committee Role and Membership

The District will convene a representative district wellness committee (hereto referred to as the DWC or work within an existing school health committee) that meets at least two times per year to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of this district-level wellness policy (heretofore referred as “wellness policy”).

Instruction

Student Wellness

I. School Wellness Committee

Committee Role and Membership (continued)

The DWC membership will include (to the extent possible), but not be limited to: parents and caregivers; students; representatives of the school nutrition program (e.g., Child Nutrition Program Manager); physical education teachers; health education teachers; school health professionals (e.g., health education teachers, school health services staff [e.g., nurses, physicians, dentists, health educators, and other allied health personnel who provide school health services], and mental health and social services staff [e.g., school counselors, psychologists, social workers, or psychiatrists]; school administrators (e.g., superintendent, principal, vice principal), school board members; health professionals (e.g., dietitians, doctors, nurses, dentists); and the general public.

Leadership

The Superintendent or designee(s) will convene the DWC and facilitate development of and updates to the wellness policy, and will ensure each school's compliance with the policy. The designated official for oversight is the Child Nutrition Program Manager.

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

The District will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions and timelines specific to each school and includes information about who will be responsible to make what change, by how much, where and when; as well as specific goals and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity, physical education and other school-based activities that promote student wellness. It is recommended that the school use the [Healthy Schools Program online tools](#) to complete a school-level assessment based on the Centers for Disease Control and Prevention's School Health Index, create an action plan that fosters implementation and generate an annual progress report.

Instruction

Student Wellness

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Recordkeeping

The District will retain records to document compliance with the requirements of the wellness policy in the Child Nutrition Program office, and/or on the New London Public School's central computer network. Documentation maintained in this location will include but will not be limited to:

- The written wellness policy;
- Documentation demonstrating that the policy has been made available to the public;
- Documentation of efforts to review and update the Local Schools Wellness Policy; including an indication of who is involved in the update and methods the district uses to make stakeholders aware of their ability to participate on the DWC;
- Documentation to demonstrate compliance with the annual public notification requirements;
- The most recent assessment on the implementation of the local school wellness policy;
- Documentation demonstrating the most recent assessment on the implementation of the Local School Wellness Policy has been made available to the public.

Annual Notification of Policy

The District will actively inform families and the public each year of basic information about this policy, including its content, any updates to the policy and implementation status. The District will make this information available via the district website and/or district-wide communications. The District will provide as much information as possible about the school nutrition environment. This will include a summary of the District's (or schools') events or activities related to wellness policy implementation. Annually, the District will also publicize the name and contact information of the District/school officials leading and coordinating the committee, as well as information on how the public can get involved with the school wellness committee.

Triennial Progress Assessments

At least once every three years, the District will evaluate compliance with the wellness policy to assess the implementation of the policy and include:

- The extent to which schools under the jurisdiction of the District are in compliance with the wellness policy;

Instruction

Student Wellness

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Triennial Progress Assessments (continued)

- The extent to which the District's wellness policy compares to the Alliance for a Healthier Generation's model wellness policy; and
- A description of the progress made in attaining the goals of the District's wellness policy.

The Superintendent, or designee, will be responsible for managing the triennial assessment. The DWC, in collaboration with individual schools, will monitor schools' compliance with this wellness policy.

The District will actively notify households/families of the availability of the triennial progress report.

Revisions and Updating the Policy

The DWC will update or modify the wellness policy based on the results of the annual School Health Index and triennial assessments and/or as District priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. **The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment.**

Community Involvement, Outreach and Communications

The District is committed to being responsive to community input, which begins with awareness of the wellness policy. The District will actively communicate ways in which representatives of DWC and others can participate in the development, implementation and periodic review and update of the wellness policy through a variety of means appropriate for that district. The District will also inform parents of the improvements that have been made to school meals and compliance with school meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in School nutrition standards.

The District will use electronic mechanisms, such as email or displaying notices on the district's website, as well as non-electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to the wellness policy, as well as how to get involved and support the policy. The District will ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that the district and individual schools are communicating important school information with parents.

Instruction

Student Wellness

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Community Involvement, Outreach and Communications (continued)

The District will actively notify the public about the content of or any updates to the wellness policy annually, at a minimum. The District will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

III. Nutrition

The Committee should create and review school practices in the following areas to support the Wellness Policy:

School Meals

Our school district is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk; that are moderate in sodium, low in saturated fat, and have zero grams trans fat per serving (nutrition label or manufacturer's specification); and to meeting the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns, and support healthy choices while accommodating cultural food preferences and special dietary needs.

All schools within the District participate in USDA child nutrition programs, including the National School Lunch Program (NSLP), the School Breakfast Program (SBP), the Afterschool Snack Program (ASP), the Fresh Fruit & Vegetable Program (FFVP), Summer Food Service Program (SFSP), and the Child and Adult Care Feeding Program (CACFP). The District also operates additional nutrition-related programs and activities. All schools within the District are committed to offering school meals through the NSLP and SBP programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
- Ensure menus will be posted on the District Website;
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations (The District offers reimbursable school meals that meet [USDA nutrition standards](#));
- Ensure students will be allowed at least 10 minutes to eat breakfast and at least 20 minutes to eat lunch;
- Ensure students are served lunch at a reasonable and appropriate time of day, which is between 10:00 am and 2:00 pm.;

Instruction

Student Wellness

III. Nutrition (continued)

School Meals (continued)

- Promote healthy food and beverage choices using at least five of the following [Smarter Lunchroom techniques](#):
 - Whole fruit options are displayed in attractive bowls or baskets
 - Sliced or cut fruit is available daily
 - Daily fruit options are displayed in a location in the line of sight and reach of students
 - All staff members, especially those serving, have been trained to politely prompt students to select and consume the daily vegetable options with their meal
 - A reimbursable meal can be created in any service area available to students (e.g., salad bars, snack rooms, etc.)
 - Student surveys and taste testing opportunities are used to inform menu development, dining space decor and promotional ideas
 - Daily announcements are used to promote and market menu options

The District will implement at least four of the following five Farm to School Activities

- Local and/or regional products are incorporated into the school meal program
- Messages about agriculture and nutrition are reinforced throughout the learning environment
- School hosts a school garden, that is accessible to all students in the school
- School hosts field trips to local farms
- School utilizes promotions or special events, such as tastings, that highlight the local/regional products

Lunchroom Climate

A lunchroom environment that provides students with a relaxed, enjoyable climate shall be developed. It is encouraged that the lunchroom environment be a place where students have:

- space to eat and pleasant surroundings;
- appropriate supervision; and
- convenient access to functioning hand washing facilities before meals.

Instruction

Student Wellness (continued)

Teacher-to-Student Incentives and Punishments

Teachers and staff shall not use foods or beverages as rewards for academic performance or good behavior, unless this practice is allowed by a student's individualized education plan (IEP). The use of sugar-sweetened beverages or candy as a classroom reward at any school is not appropriate. Alternative rewards shall be developed and promoted. Schools shall not withhold foods or beverages (including food served through school meals) as a punishment.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day and throughout every school campus. The District will make drinking water available where school meals are served during mealtimes.

- Water cups/jugs will be available in the cafeteria if a drinking fountain is not present.
- All water sources and containers will be maintained on a regular basis to ensure good hygiene and health safety standards. Such sources and containers may include drinking fountains, water jugs, hydration stations, water jets and other methods for delivering drinking water.
- Students will be allowed to bring and carry (approved) water bottles filled with only water with them throughout the day.

Competitive Foods and Beverages

“Competitive foods” include all foods and beverages sold in schools except for meals provided through the National School Lunch Program and School Breakfast Program. The USDA interim final rule groups competitive foods into three categories: (1) Entrée Items (sold only a-la-carte), (2) Side Dishes; and (3) Beverages. Pursuant to federal regulations and state statutes and regulations, the sale of competitive foods is restricted as follows:

1. Foods that do not meet the Connecticut Nutrition Standards cannot be sold to students on school premises, including, but not limited to:
 - Water ices (any frozen, sweetened water such as “...sicles” and flavored ice with the exception of products that contain fruit, fruit juice, milk, milk ingredients or egg ingredients other than egg whites)
 - Candy/sugarless candy
 - Chewing gum/sugarless chewing gum
 - Cupcakes, Brownies, etc.
 - Fried Foods

Instruction

Student Wellness

Teacher-to-Student Incentives and Punishments

Competitive Foods and Beverages (continued)

2. Foods and Beverages that do not meet the requirements of state statute and federal regulations can only be sold to students on school premises at the location of an event that occurs after the school day or on the weekend, provided they are not sold from a vending machine or school store. (*Note: Board vote is required annually to allow this exemption.*)
3. During the period of 30 minutes before any meal program up until 30 minutes after the end of the program, competitive foods and beverages may only be sold anywhere on school premises if they meet the Connecticut Nutrition Standards or state beverage statute and the income they generate accrues to the nonprofit school food service account.

Schools shall use the Connecticut State Department of Education's "List of Acceptable Foods and Beverages" to determine whether commercial food and beverage products meet the USDA's competitive foods standards. Listed beverages will meet both federal and state requirements.

Fundraising

Fundraising activities are encouraged to support healthy eating and wellness. Schools will promote the sale of non-food items for school-sponsored fundraising and the District shall make available to students, parents, teachers and school groups a list of ideas for acceptable fundraising activities, such as healthy foods and beverages or alternate nonfood fundraisers.

School fundraising activities shall not involve food or beverages or shall only use foods that meet the Connecticut Nutrition Standards and beverages that meet the requirements of state statute and federal regulations. However, food items that do not meet the Connecticut Nutrition Standards and beverages not meeting the requirements of state statute and federal regulations can be sold as fundraisers on school premises if they are sold at the location of an event occurring after the end of the regular school day or on the weekend, provided they are not sold from a vending machine or school store. Schools shall encourage fundraising activities that promote physical activity.

Foods Brought Into School

The District shall encourage families to pack healthy lunches and snacks and to refrain from including beverages that do not meet the requirements of state statute or foods that do not meet the District's nutrition standards. Classroom snacks if provided to all children, are encouraged to only include healthy choices that meet the state requirements for allowable beverages and the District's nutrition standards.

Instruction

Student Wellness

Foods Brought Into School (continued)

If food is brought from home to be shared with other students, the District shall develop procedures to ensure that all food is safe.

Marketing

Any foods and beverages marketed or promoted to students on the school campus during the school day will meet or exceed the USDA “Smart Snacks in School” nutrition standards. Food and beverage marketing is defined as advertising and other promotions in schools. Food and beverage marketing often includes oral, written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller or any other entity with a commercial interest in the product. As the District/School Nutrition Services/Athletic Department/PTA/PTO reviews existing contracts and considers new contracts, equipment and product purchasing (and replacement) decisions should reflect the applicable marketing guidelines established by the District wellness policy.

IV. Student Nutrition Education and Promotion

Nutrition Education

The District will teach, model, encourage and support healthy eating by all students. Schools will provide nutrition education and engage in nutrition promotion that:

- Is designed to provide students with the knowledge and skills necessary to promote and protect their health including but not limited to healthy eating, the importance of taking time to eat, etc.;
- Is part of not only health education classes, but also integrated into other classroom instruction through subjects such as math, science, language arts, social sciences and elective subjects;
- Includes enjoyable, developmentally-appropriate, culturally-relevant and participatory activities, such as cooking demonstrations or lessons, promotions, taste-testing, farm visits and school gardens;
- Promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products and healthy food preparation methods;
- Emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise);
- Links with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, other school foods and nutrition-related community services;
- Teaches media literacy with an emphasis on food and beverage marketing; and
- Includes nutrition education training for teachers and other staff.

Instruction

Student Wellness

IV. Student Nutrition Education and Promotion

Nutrition Education (continued)

Nutrition Promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents, students and the community.

The District will promote healthy food and beverage choices for all students throughout the school campus, as well as encourage participation in school meal programs. This promotion will occur through at least:

- Implementing at least ten or more evidence-based healthy food promotion techniques through the school meal programs using [Smarter Lunchroom techniques](#); and
- Ensuring 100% of foods and beverages promoted to students meet the USDA Smart Snacks in School nutrition standards. Additional promotion techniques that the District and individual schools may use are available at <http://www.foodplanner.healthiergeneration.org/>.

Consistent Health Messages

Students shall receive positive, motivating messages, both verbal and nonverbal, about healthy eating and physical activity throughout the school environment. All school personnel shall help reinforce these positive messages. Foods and beverages sold or served at school shall not contradict healthy eating messages. The school district shall not use practices that contradict messages to promote and enjoy physical activity; for example, withholding recess or using physical activity as punishment (e.g., running laps, doing pushups).

Parent/Guardian/Staff Information

Nutritional information should be provided to parents and staff members through newsletters, publications, and other activities focusing on, but not limited to:

- Healthy Snacks
- Healthy Lunch Ideas
- Healthy Breakfast Ideas
- Non-food Birthday/Holiday Celebration Ideas

Instruction

Student Wellness

Parent/Guardian/Staff Information (continued)

- Calcium Needs of Children
- Healthy Portions
- Food Label Reading Guidelines
- Fun Activities to encourage increased physical activity inside and outside of school

V. Physical Activity Education and Promotion

- Schools will support and promote an active lifestyle for students.
- Physical education will be taught in all grades K-8 and high school grades as it fulfills graduation requirements, and shall include a standards-based, developmentally planned and sequential curriculum that fosters the development of movement skills, enhances health-related fitness, increases students' knowledge, offers direct opportunities to learn how to work cooperatively in a group setting, and encourages healthy habits and attitudes for a healthy lifestyle.
- Unless otherwise exempted, all students will be required to engage in the District's physical education program.
- Recess and other physical activity breaks; before and after school activities, and walking and bicycling to schools, where safe to do so, are supported by the Board.
- Grades K-8 Schools will work toward providing sixty minutes of physical activity daily for students (as a best practice).

Daily Recess

All elementary school students shall have at least 20 consecutive minutes a day of supervised recess, preferably outdoors, during which schools should encourage moderate to vigorous physical activity and provide space, equipment and an environment that is conducive to safe and enjoyable activity. Districts shall ensure that students with special physical and cognitive needs have equal physical activity opportunities, with appropriate assistance and services. Districts shall not permit extended periods (i.e., periods of two or more hours) of inactivity.

When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools shall give students periodic breaks during which they are encouraged to get up from their chairs and be moderately active.
