

JUNIORS – OCTOBER NEWSLETTER

Julie Sitko, College and Career Counselor
jsitko@moonarea.net
412-264-9440, ext. 2038

My name is Julie Sitko and I am the College and Career Counselor. This is the time to think about life after high school. My role is to advise and support students and families in the college search and to help identify “best fit” colleges and universities, and to assist students in realizing their post-secondary goals. This monthly newsletter will keep you on track for post-secondary planning. Please reach out to me with any questions or concerns.

Here are some things to think about as we go through your child’s junior year:

FALL - Post-Secondary Timeline for juniors

- Begin the college and career exploration process with Naviance
- Register for the SAT and/or ACT beginning in the winter (February/March)
- If your child is thinking of testing – do test prep
- Encourage your child to register to attend college visits at Moon
- An updated copy of your child’s transcript has been uploaded into the Portfolio section of Skyward. I encourage you to look over the transcript and save a copy for your records. If there are any questions or concerns about the transcript, please reach out to your child’s school counselor.

COLLEGE FAIRS

During the first week of October, there are college fairs all over Allegheny County.

Monday, October 2

North Pittsburgh College Fair

LaRoche University

6-8 PM

Kerr Fitness Center

Tuesday, October 3, 2023

South Pittsburgh College Fair

Bethel Park High School

6-8 PM

Thursday, October 5, 2023

West Pittsburgh College Fair

Robert Morris University

6-8 PM

UMPC Complex

Please register for a barcode at www.StriveFair.com

Show your barcode to colleges who will scan it to send you more information about their schools. The day after the fair, you will receive a report with information about each college with whom you scanned.

HBCU (Historically Black Colleges and Universities) College Fair

Thursday, October 26, 2023

PNC Park

Over 40 HBCU’s will be there to talk with students and answer questions about the schools. Students are invited to attend. This fair is during the school day and transportation will be provided. More information will be given to students the week of October 9.

College fairs are a great opportunity to explore options, gather information, ask questions, get a feel for campus culture, learn about scholarship opportunities, and compare options. They could also be an opportunity for overwhelmed or unsure students to start thinking about what type of post-secondary education is best for them. The schools will be arranged alphabetically and the best way to approach the college fair is just to wander around, gathering information

and asking basis questions like:
How many students are at your school?
What are you most unique majors?
Why do students like your school?
What is the campus culture like?

ASVAB:

The ASVAB is a multiple-aptitude battery that measures developed abilities and helps predict future academic and occupational success in the military. It is also an excellent assessment for general career guidance. It is administered annually to more than one million military applicants, high school, and post-secondary students. The test will be administered on Wednesday, November 1. Students can register [here](#). The test will also be administered in March 2024.

FINANCIAL AID AWARENESS

PHEAA Virtual Financial Aid Night

Wednesday, November 15

6:30 PM

Please join a representative from PHEAA (the Pennsylvania Higher Education Assistance Agency) for a virtual Financial Aid Night from the comfort of your home. This presentation will provide an early understanding of the financial decisions students need to make concerning higher education. Participants will have the opportunity to enter questions in the Q & A section at any time, as well as at the end of the presentation. [Register here](#)

Scholarships:

All scholarships that come through our office are listed in Naviance. To find the scholarships, log in to your Naviance account, go to Colleges>Scholarships and money>Scholarship list. The scholarships we get in the counseling center are listed on the 'Scholarship list' page. That site is updated regularly, so be sure to check back regularly as new scholarships are posted. Your child should be checking this site regularly. My favorite scholarship search sites are: www.fastweb.com, www.goingmerry.com, and www.pittsburghfoundation.org/scholarship_search#hs. The last site is local (Pittsburgh) scholarships. You do have to search through the scholarships, but there is a lot of money available to students.

College Representatives Visiting Moon Area High School:

Colleges come to Moon to talk to students about their schools. This is a good opportunity to get general information about schools, but also a great opportunity to meet the admission counselors. Often, the counselors who do these visits are also the same people who will read your child's college application and can be a first line resource for all questions about that school.

All visits are listed on the Naviance homepage, under "What's New." Students sign up for visits in Naviance. Registration will close one hour prior to the visit. All visits are also on the announcements. Most visits are in person, but a few are virtual. To register for a visit, your child will go to the main page of their Naviance account, go to the of visits, under "What's New," click on more info beside the name of the school and on the next page, "register me." Once registered students will stop by the Counseling Center to get a pass to attend the visit.

This list will change and additional schools will be added. The most current list is in Naviance.

<u>College</u>	<u>Date</u>	<u>Time</u>
<u>Ohio Northern University</u>	Mon October 2, 2023	10:11 AM
<u>Worcester Polytechnic Institute</u>	Mon October 2, 2023	11:03 AM

<u>Rosedale Technical College</u>	Wed November 1, 2023	11:20 AM
<u>Saint Francis University</u>	Thu November 2, 2023	8:27 AM

Visiting schools:

If you have a chance to visit schools, here what you should think about when you're on campus:

- Talk to people in the department of anticipated study. If your child is totally undecided, talk to the schools about what they do to help pick a major. Colleges have robust career centers and advising programs which help students pick a major, find internships and eventually jobs and graduate schools.
- Ask what is the four-year graduation rate? Colleges report a six-year graduation rate, due to financial aid. Ask about the four year rate— schools should try to get students in and out in four years – make sure the school is going to help your child make the best use of their time and get the classes needed to get out in time.
- Ask what is the retention rate for returning sophomores? This number can tell you a lot about what schools are doing to make students happy and keep them enrolled. If a number is low, ask why students are leaving – what's going on? If the number is high, it's safe to assume students are generally happy and the college is doing a good job of educating students and keeping them happy.
- College is not just about getting a degree. It's about so much more. Is your child going to be challenged at each school? Are they going to have to put in more effort than they ever have? That's a good thing!
- Learn the middle 50% SAT/ACT scores and GPA of admitted students at the schools that interest you. This can serve as a guide to schools that will be a good academic fit for you. Also – remember if board scores are lower than the middle 50%, but the GPA fits in the middle 50%, in most cases, students do not need to submit test scores, if they could potentially hurt an application.

ACT and SAT testing:

If your child wants to test, go to the testing websites for information about testing and open test sites. (**SAT: www.collegeboard.org** and **ACT: www.act.org**). A schedule of tests dates is in the class of 2024 Teams (under Post-Secondary Planning, then files). The same list is also on the High School Counseling Center webpage. For the graduating class of 2024, many colleges in the United States are test optional for both admission and scholarships. Before deciding if your child wants to test, check with the schools they are interested in and determine if they need to test. When students apply without test scores, schools are often examining the transcript much closer. For example, if your child is interested in studying business, colleges will look closely at the math classes they took and the grades earned in those math classes.

--Students on free/reduced lunch are eligible for a fee waiver. Have your child see their school counselor or Ms. Sitko
--Every college accepts either the SAT or ACT. There is no preference.
-- When registering for the ACT, I do not recommend taking the writing portion of the exam. I do not think it will be necessary for admission.
--Check out this site to see if schools your child is interested in have determined their testing policies
<https://www.fairtest.org/university/optional>.

ACT/SAT Prep:

Students taking ACT and SAT tests should do some sort of preparation prior to taking the tests. There are many resources available for test prep. All students have FREE access to Khan Academy – an online program that partners with College Board (owners of the SAT) to provide test prep to students. <https://www.khanacademy.org/sat>. ACT also has [online test prep here](#). [These are both fantastic resources](#).

-[Penn State Beaver](#) is offering in person SAT prep classes, starting October 14

-[Eaton Prep](#) offers SAT prep classes at the Mt. Lebanon Recreation Center

NCAA:

If your child is an athlete considering playing sports at a division I or II school, make sure to visit the NCAA Eligibility Center website www.eligibilitycenter.org. Student athletes need to submit an official high school transcript (requested through Naviance) and official test scores, if they are available. These scores must be sent directly from ACT or College Board. NCAA will not accept test scores from the high school transcript. *This registration does not apply to students attending division III or NAIA schools.*

Emails from Post-Secondary Schools:

If you have not yet, you will be getting inundated with emails from colleges. I have a few suggestions on how you can manage the emails.

1. Create an email address just for post-secondary planning. That way, all of the emails you get from colleges won't flood your regular inbox.
2. You can create a folder in your email and filter emails from the colleges you think you want to look at later. You can also create a folder of schools that you are interested in, so you don't miss any important messages from them.
3. Check this email account once a week or every few days. Delete messages you're not interested in. You're going to be overwhelmed with information from colleges and managing the emails is necessary, so you don't miss anything important.

If you are looking for good college resources, here are two of my favorites:

Georgia Tech Admission Blog has a lot of great information not specific about Georgia Tech, but about the college search and selection process in general. The blog is insightful, educational, and humorous.

<https://pwp.gatech.edu/admission-blog/>

The College Essay Guy – another great website for assistance in writing college essays, along with general information about the college search/selection process. He is witty and has awesome advice on essays. He charges a fee to review essays, but he also has a lot of free information on his website. <https://www.collegeessayguy.com/>

POST-SECONDARY PROGRAMS

[Pennsylvania Governor's School for the Sciences at Carnegie Mellon University](#) is now accepting applications from talented high school juniors for the summer 2024 program. The program runs June 23, 2024- July 27, 2024.

PGSS is an intensive, five-week summer residential program that emphasizes cooperative learning and hands-on laboratory research for high school juniors pursuing careers in science and mathematics. The goal of the program is to encourage Pennsylvania's youth to pursue careers in STEM-related fields.

Accepted applicants will receive a full scholarship to the program. Costs are underwritten through matching funds provided by PGSS Campaign, Inc., the school's alumni, Carnegie Mellon University, parents, and corporations.

Awarded scholarships will cover the costs of housing, meals, and all instructional materials. Families are responsible for transportation to and from the university, personal items, and spending money. Students must commit to living on campus at Carnegie Mellon University throughout the duration of the program. Application deadline is January 31, 2024.

The PA Youth Advisory Council (YAC) is accepting applications for **students who are interested in healthy policy and programming**. The YAC gives teens a voice to make a difference in health policy and programming that affects them and their peers. Teens will join the YAC for two years to provide feedback on youth-related healthcare, practices and policies impacting youth across PA. By participating in the YAC, teens will gain real-world experience collaborating with the Department of Health and other youth-serving agencies, add skills and volunteer experience to their resume, and receive a certificate of participation for college and job applications. Applications are due October 27, 2023.

Colleges and universities host open house and other visitation programs throughout the school year. Programs are both in person and online. Colleges are doing a great job of offering extensive online information sessions and visit opportunities. If you have any questions about a school, don't hesitate to reach out to an admission counselor. Counselors are a great resource to help students and their adults through the post-secondary planning process.
