

Loss Control Inspection

A loss control/safety inspection shall be used to check facilities, operations, and actions throughout the District. The purpose of these inspections shall be to reveal overall conditions and to suggest corrective actions necessary to bring operations or facilities up to appropriate safety standards. Employee concerns shall be thoroughly investigated and reviewed, and employees commended for their effort to promote safety. Appropriate positive corrective actions shall be taken to eliminate potential accident causes. Inspections shall be performed by personnel trained in loss control and survey techniques. An insurance company or association Loss Control Representative can assist in training appropriate employees.

Recommendations and/or Corrections

The following guidelines apply to recommendations and/or corrections suggested as a result of a loss control/safety inspection:

1. Recommendations or suggested corrections regarding conditions that pose a life-safety risk shall be acted upon immediately.
2. All identified unsafe conditions and practices shall be listed and described in sufficient detail to be easily interpreted. Recommendations shall be developed to correct an adverse condition or unsafe practice.
3. All recommendations shall be reviewed by District management, supervisors and/or committees for approval or rejection.
4. If approved, recommendations to correct identified conditions or acts shall be followed as specified.
5. If rejected, reasons for rejection shall be provided in writing so that recommendations can be revised and resubmitted for review and approval.

Friable and Nonfriable Asbestos - Containing Materials Inspection

All school buildings shall be inspected for friable and nonfriable asbestos-containing materials according to federal and state regulations.

Notification

Employee, parent, and teacher organizations shall be notified according to law when friable asbestos-containing materials are found on a particular campus. (See DI) Notification shall include location of affected area, a guide for reducing asbestos exposure, and laboratory reports.

Control

The District shall develop and implement a program of asbestos abatement that appropriately reduces and controls the risk of exposure to asbestos fibers.

Records

Asbestos-related activities performed by the District shall be recorded by the appropriate administrator and maintained in both the applicable school and the Central Support Facility. The records shall be retained in accordance with applicable federal and state regulations. (See CKA)
