## Growth and Innovation—Every school, every day

The beginning of the 2023-24 school year has already brought updates, change, and innovation. Here in the Steilacoom Historical School District #1 we have added to our program in significant ways. We've added equipment at Saltar's Point Elementary, creating even more hot lunch options and causing quite a buzz down the hallway as students walk by!

We've also added service stations, such as our new "Pick Two" station at the high school. High Schoolers can choose between salads, build-your-own sandwiches, and house-made soups— different options every day of the week! As the weather gets colder, soup hits the spot. Since it opened, we've had some students eat it every day to try them all!

### School Lunch Week is October 9-13, 2023

School Nutrition Programs are an integral part of supporting academic achievement, improving children's health, and combating childhood hunger.

Celebrate National School Lunch week by checking out your school lunch room. If you haven't eaten at your school's cafeteria before— Why don't you give it a try!
