

CHARTERHOUSE

IT Online Technical Security Policy

DEFINITION OF THIS POLICY

Effective technical security depends not only on technical measures but also on appropriate policies and procedures and on good user education and training. This is informed by the Department of Education (DfE) guidance, Keeping Children safe in Education, and the Digital and Technology Standards and therefore applicable for schools and colleges in England. This policy outlines the steps that the school has taken in order to ensure the safety of pupils, staff and the School's network and infrastructure. The School will be responsible for ensuring that:

- Users can only access data to which they have right of access
- Access to personal data is securely controlled in line with the school personal data policy.
- System logs are maintained and reviewed to monitor user activity
- There is effective guidance and training for staff
- There are regular reviews and audits of the safety and security of the school's computer systems, including filtering and monitoring provision.

Responsibilities

Education settings are directly responsible for ensuring they have the appropriate level of security protection procedures in place in order to safeguard their systems, staff and learners and review the effectiveness of these procedures periodically to keep up with evolving cyber-crime technologies. The management of technical security is the responsibility of Governors and Senior Leaders, supported in this by the Designated Safeguarding Lead, Online Safety Lead and IT Service Provider.

Policy statements

The school is responsible for ensuring that their infrastructure/network is as safe and secure as is reasonably possible and that policies and procedures approved within this policy are implemented. It will also need to ensure that the relevant people receive guidance and training and will be effective in carrying out their responsibilities:

- School technical systems will be managed in ways that ensure that the school meets recommended technical requirements.
- Cyber security is included in the school risk register.
- There will be regular reviews and audits of the safety and security of the school's technical systems
- Servers, wireless systems and cabling must be securely located and physical access restricted.
- There are rigorous and verified back-up routines, including the keeping of network-separated (air-gapped) copies off-site or in the cloud,
- Appropriate security measures (including updates) are in place to protect the servers, firewalls, switches, routers, wireless systems, work stations, mobile devices etc from accidental or malicious attempts which might threaten the security of the school's systems and data.
- The school's infrastructure and individual workstations are protected by up-to-date software to protect against malicious threats from viruses, worms, trojans etc.
- Responsibilities for the management of technical security are clearly assigned to appropriate and well-trained staff.
- All users will have clearly defined rights to the school's technical systems and accounts are deleted when the user leaves.
- Users will be made responsible for the security of their username and password and must not allow other users to access the systems using their login details and must immediately report any suspicion or evidence that there has been a breach of security.

- The IT Dept., in partnership with Governors/SLT/DSL, regularly monitors and records the activity of users on the school technical systems and users are made aware of this in the acceptable use agreement
- Mobile device security and management procedures are in place for pupil devices and the school uses JAMf School as its MDM.
- An appropriate system is in place (CHAPPS helpdesk system) for users to report any actual/potential technical incident to the IT Support team who will in turn report this to the SLT/DSL/Online Safety Lead (OSL)/ (Direct of Finance and Operations).
- The IT Dept is responsible for ensuring that software licence logs are accurate and up to date and that regular checks are made to reconcile the number of licences purchased against the number of software.
- Remote management tools (JAMf School) are used by staff to control pupil devices and view users' activity.
- Guest users are provided with appropriate access to school systems based on an identified risk profile.
- By default users do not have administrator rights to any school-owned devices.
- Personal data cannot be sent over the internet or taken off school site unless safely encrypted or otherwise secured (see School personal data policy).

PASSWORD SECURITY

A safe and secure username/password system is essential if the above is to be established and will apply to all School technical systems, including networks, devices, email and learning platforms.

- The password policy and procedures reflect NSCSC and DfE advice/guidance.
- Security measures are in place to reduce brute-force attacks and common passwords are blocked.
- School networks and systems will be protected by secure passwords.
- The use of passwords is reduced wherever possible for example using multifactor authentication or single sign on.
- Passwords are encrypted by systems to prevent theft.
- Password have a long expiry date (100 days) to stop frequent changes and password managers are recommended.
- Users are able to reset their passwords themselves.
- Passwords must be immediately changed in the event of a suspected or confirmed compromise.
- No defaults passwords are used, all passwords provided out of the box are changed to a unique password by the IT dept.
- Where it is possible all systems which hold sensitive or personal data have 2fa in place.
- All users have the responsibility for the security of their username and password and must not allow others to access systems using their details and must report any suspicion or evidence that there has been a breach of security.
- Passwords must not be shared with anyone.

PASSWORD REQUIREMENTS FOR PUPILS AND STAFF

- Passwords should be long and complex, using three random words and numbers.
- Passwords should be different for different accounts, to ensure that other systems are not put at risk if one is compromised and should be different for systems used inside and outside of School.
- Passwords should not include names or any other personal information about the user that might be known by others.

PUPIL PASSWORDS

Pupils will be taught the importance of password security, this should include how passwords are comprised, and why these password rules are important.

APPROPRIATE FILTERING FEATURES

The filtering of internet content provides an important means of preventing users from accessing material that is illegal or is inappropriate in an educational context. The filtering system cannot provide a 100% guarantee that it will do so, because the content on the web changes dynamically and new technologies are constantly being developed. It is important therefore to understand that filtering is only one element in a larger strategy for online safety and acceptable use. It is important that the school has a filtering policy to manage the associated risks and to provide preventative measures which are relevant to the situation in this school. The school's filtering system is operational, up to date and is applied to the following:

- Users, including guest accounts
- School owned devices
- Devices using the school broadband connection

The firewall / web filtering is provided by WatchGuard Technologies Inc., who are a member of the IWF (Internet Watch Foundation). The web-filtering element has a feed, which incorporates 'the police assessed list of unlawful terrorist content, produced on behalf of the Home Office'.

The schools filtering system:

- Filters all internet feeds, including backup connections
- Filters staff and pupils & guests appropriately and it is suitable for use in the educational setting.
- Handles multilingual web content, images common misspelling and abbreviations
- Identifies technologies and techniques that allows users to get round filtering such as VPN's and proxy services and to block them.
- Provides alerts when any web content has been blocked

Mobile and app content is often presented in a different way to web browser content. The schools firewall provides filtering on applications to reduce this risk of harm.

Certain categories of websites are blocked at all times (see Appendix A for restricted categories) with additional restrictions such as social networking, 'Freeware', software downloads and online games during hashes and banco.

APPROPRIATE MONITORING FEATURES

The schools monitoring strategy is informed by regular filtering and monitoring reviews.

The school monitoring systems:

- Sends real time alerts for blocked categories, appendix A
- Involves physical supervision by staff both in person in lessons and by means of a Mobile device management system
- Includes monitoring network logs of internet traffic and web access, with additional reporting and follow up

Filtering and Monitoring responsibilities

Role	Responsibility	Name / Position
Responsible Governor	Strategic responsibility for filtering and monitoring and need assurance that the standards are being met.	Pete Malcolm Governor
Senior Leadership	<p>Team Member Responsible for ensuring these standards are met and:</p> <ul style="list-style-type: none"> • procuring filtering and monitoring systems • documenting decisions on what is blocked or allowed and why • reviewing the effectiveness of your provision • overseeing reports <p>Ensure that all staff:</p> <ul style="list-style-type: none"> • understand their role • are appropriately trained • follow policies, processes and procedures • act on reports and concerns 	Phil Grainge Director of Finance and Operations
Designated Safeguarding Lead	<p>Lead responsibility for safeguarding and online safety, which could include overseeing and acting on:</p> <ul style="list-style-type: none"> • filtering and monitoring reports • safeguarding concerns • checks to filtering and monitoring systems 	Alex Colclough DSL
IT Service Provider	<p>Technical responsibility for:</p> <ul style="list-style-type: none"> • maintaining filtering and monitoring systems • providing filtering and monitoring reports • completing actions following concerns or checks to systems 	Julie Clements Head of IT
<p>All staff</p> <p>need to be aware of reporting mechanisms for safeguarding and technical concerns. They should report if:</p>	<ul style="list-style-type: none"> • they witness or suspect unsuitable material has been accessed • they can access unsuitable material • they are teaching topics which could create unusual activity on the filtering logs • there is failure in the software or abuse of the system • there are perceived unreasonable restrictions that affect teaching and learning or administrative tasks • they notice abbreviations or misspellings that allow access to restricted material 	

Policy Statements

Internet access is filtered for all users. Differentiated internet access is available for staff and customised filtering changes are managed by the school. Illegal content is filtered by the broadband or filtering provider by actively employing the Internet Watch Foundation URL list and other illegal content lists. Filter content lists are regularly updated and internet use is logged and frequently monitored. The monitoring process alerts the school to breaches of the filtering policy, which are then acted upon. There is a clear route for reporting and managing changes to the filtering system. Where personal mobile devices are allowed internet access through the school network, filtering will be applied that is consistent with school practice.

- There is a filtering and monitoring system in place that safeguards staff and learners by blocking harmful, illegal and inappropriate content.

- There is a monitoring system that enables the prompt investigation of a potential safeguarding incident and outcomes are logged.
- Roles and responsibilities for the management of filtering and monitoring systems have been defined and allocated.
- The filtering and monitoring provision is reviewed at least annually and checked regularly.
- There is a defined and agreed process for making changes to the filtering or monitoring system that involves a senior leader in the agreement of the change.
- Mobile devices that access the school's internet connection (whether school or personal devices)

Filtering and Monitoring Review and Checks

To understand and evaluate the changing needs and potential risks of the school, the filtering and monitoring provision will be reviewed at least annually. The review will be conducted by members of the senior leadership team, the designated safeguarding lead (DSL), and the IT Dept. Additional checks to filtering and monitoring will be informed by the review process so that governors have assurance that systems are working effectively and meeting safeguarding obligations.

Reviewing the filtering and monitoring provision

A review of filtering and monitoring will be carried out to identify the current provision, any gaps, and the specific needs of learners and staff.

The review will take account of:

- the risk profile of learners, including their age range, pupils with special educational needs and disability (SEND), pupils with English as an additional language (EAL)
- what the filtering system currently blocks or allows and why
- any outside safeguarding influences, such as county lines
- any relevant safeguarding reports
- the digital resilience of learners
- teaching requirements, for example, the RHSE and PSHE curriculum
- the specific use of chosen technologies, including Bring Your Own Device (BYOD)
- what related safeguarding or technology policies are in place
- what checks are currently taking place and how resulting actions are handled

To make the filtering and monitoring provision effective, the review will inform:

- related safeguarding or technology policies and procedures
- roles and responsibilities
- training of staff
- curriculum and learning opportunities
- procurement decisions
- how often and what is checked
- monitoring strategies

The review will be carried out as a minimum annually, or when:

- a safeguarding risk is identified
- there is a change in working practice, e.g., remote access or BYOD
- new technology is introduced

Checking the filtering and monitoring systems

Checks to filtering and monitoring systems are completed and recorded as part of the filtering and monitoring review process. How often the checks take place will be based on the context, the risks highlighted in the filtering and monitoring review, and any other risk assessments. Checks will be undertaken from both a safeguarding and IT perspective.

When filtering and monitoring systems are checked this should include further checks to verify that the system setup has not changed or been deactivated. Checks are performed on a range of:

- school owned devices and services, including those used off site
- geographical areas across the site
- user groups, for example, teachers, pupils and guests

Logs of checks are kept so they can be reviewed. These record:

- when the checks took place
- who did the check?
- what was tested or checked
- resulting actions

STAFF TRAINING

Several key staff, including the Head of IT Services, have attended online safety courses including CEOP and NSPCC 'Keeping Children Safe Online' and short briefing sessions for Beaks and support staff will be run on a regular basis to ensure that they are aware of the most up to date information.

Training/Awareness:

Those with specific responsibilities for filtering and monitoring (Responsible Governor, DSL, OSL or other relevant persons) will receive enhanced training to help them understand filtering and monitoring systems and their implementation and review.

Audit/Monitoring/Reporting/Review:

Governors/SLT/DSL/OSL will ensure that full records are kept of:

- Training provided
- Security incidents related to this policy
- Annual online safety reviews including filtering and monitoring
- Changes to the filtering system
- Checks on the filtering and monitoring systems

APPENDIX A: FIREWALL CATEGORIES

Categories highlighted in yellow are blocked at all times in compliance with the UK Safer internet Centre list. Those highlighted in green are blocked only during hash times.

Categories not highlighted are available at all times, although there are some websites which fall within the unblocked categories that are also blocked. For a list of these websites, please contact the IT Department.

Abortion

Sites with neutral or balanced presentation of the issue.

- Pro-Choice: Sites that provide information about or are sponsored by organizations that support legal abortion or that offer support or encouragement to those seeking the procedure.
- Pro-Life: Sites that provide information about or are sponsored by organizations that oppose legal abortion or that seek increased restriction of abortion.

Adult Material

Parent category that contains adult-oriented categories; may also contain age-restricted content.

- Adult Content: Sites that display full or partial nudity in a sexual context, but not sexual activity; erotica; sexual paraphernalia; sex-oriented businesses including clubs, nightclubs, escort services; and sites supporting the online purchase of such goods and services.
- Lingerie and Swimsuit: Sites that offer images of models in suggestive but not lewd costume, with semi nudity permitted. Includes classic 'cheesecake,' calendar and pinup art and photography. Includes sites offering lingerie or swimwear for sale.
- Nudity: Sites that offer depictions of nude or seminude human forms, singly or in groups, not overtly sexual in intent or effect.
- Sex: Sites that depict or graphically describe sexual acts or activity, including exhibitionism; sites offering direct links to such sites.
- Sex Education: Sites that offer information about sex and sexuality, with no pornographic intent.

Advocacy Groups

Sites that promote change or reform in public policy, public opinion, social practice, economic activities and relationships.

Bandwidth

Sites that use a large amount of bandwidth.

- Educational Video: Sites that host videos with academic or instructional content.
- Entertainment Video: Sites that host videos with entertainment-oriented content.
- Internet Radio and TV: Sites that provide online radio or television programming.
- Internet Telephony: Sites that enable users to make phone calls via the Internet or to obtain information or software for that purpose.
- Peer-to-Peer File Sharing: Sites that provide client software to enable peer-to-peer file sharing and transfer.
- Personal Network Storage and Backup: Sites that store personal files on web servers for backup or exchange.
- Streaming Media: Sites that enable streaming of media content.
- Surveillance: Sites that enable real-time monitoring of various operations via network cameras, webcams and other video recording devices.
- Viral Video: Sites that host videos with high or rapidly rising popularity.

Business and Economy

Sites sponsored by or devoted to business firms, business associations, industry groups or general business.

- Financial Data and Services: Sites that offer investment advice and news and quotations on stocks, bonds and other investment vehicles, but not online trading. Includes banks, credit unions, credit cards and insurance.

- Hosted Business Applications: Sites that provide access to business-oriented web applications and allow storage of sensitive data, excluding those for web collaboration.

Collaboration – Office

Office Category used to manage the Office domain, and includes these functions:

- Office - Apps: Office function that enables a user to collaborate via various applications.
- Office - Documents: Office function that enables a user to collaborate via document applications.
- Office - Drive: Office function that enables a user to collaborate via virtual storage.
- Office - Mail: Office function that enables a user to collaborate via email and messaging.

Drugs

The parent category that contains the following categories:

- Abused Drugs: Sites that promote or provide information about the use of prohibited drugs, except marijuana, or the abuse or unsanctioned use of controlled or regulated drugs; also, paraphernalia associated with such use or abuse.
- Marijuana: Sites that provide information about or promote the cultivation, preparation or use of marijuana.
- Nutrition: Sites that provide information about nutrition.
- Prescribed Medications: Sites that provide information about approved drugs and their medical use.

Education

The parent category that contains the following categories:

- Cultural Institutions: Sites sponsored by museums, galleries, theaters (but not movie theaters), libraries and similar institutions; also, sites whose purpose is the display of artworks.
- Educational Institutions: Sites sponsored by schools and other educational facilities, by non-academic research institutions, or that relate to educational events and activities.
- Educational Materials: Sites that provide information about or that sell or provide curriculum materials or direct instruction; also, learned journals and similar publications.
- Reference Materials: Sites that offer reference-shelf content such as atlases, dictionaries, encyclopedias, formularies, white and yellow pages, and public statistical data.

Entertainment

Sites that provide information about or promote motion pictures, non-news radio and television, books, humor and magazines.

- Media File Download: Sites that enable download of media content.

Extended Protection

The parent category that contains the following categories:

- Dynamic DNS: Sites that mask their identity using Dynamic DNS services, often associated with advanced persistent threats (APTs).
- Elevated Exposure: Sites that camouflage their true nature or that include elements suggesting latent malicious intent.
- Emerging Exploits: Sites found to be hosting known and potential exploit code.
- Newly Registered Websites: Scans for newly registered websites on an ongoing basis. The default criteria for classification under the associated category Newly Registered Websites involves unknown (Uncategorized) websites registered within the last 41 days. Exception is given to websites known to pose a live security risk; such websites are assigned security classification regardless of the registration attribute. A website classified under the category Newly Registered Websites may acquire a granular content-based category at any time.
- Suspicious Content: Sites found to contain suspicious content.

Gambling

Sites that provide information about or promote gambling or support online gambling, involving a risk of losing money.

Games

Sites that enable a user to play or download a game.

Government

Sites sponsored by branches, bureaus or agencies of any level of government, except for the armed forces.

- Military: Sites sponsored by branches or agencies of the armed services.
- Political Organizations: Sites sponsored by or providing information about political parties and interest groups focused on elections or legislation.

Health

Sites that provide information or advice on personal health or medical services, procedures, or devices, but not drugs. Includes self-help groups.

Illegal or Questionable

Sites that provide instruction in or promote nonviolent crime or unethical or dishonest behavior or the avoidance of prosecution.

Information Technology

Sites sponsored by or providing information about computers, software, the Internet and related business firms, including sites supporting the sale of hardware, software, peripherals and services.

- Computer Security: Sites that provide information about or free downloadable tools for computer security.
- Hacking: Sites that provide information about or promote illegal or questionable access to or use of computer or communication equipment, software or databases.
- Proxy Avoidance: Sites that provide information about how to bypass proxy server features or to gain access to URLs in any way that bypasses the proxy server.
- Search Engines and Portals: Sites that support searching the web, news groups or indices or directories thereof.
- Unauthorized Mobile Marketplaces: Protects against websites that may distribute applications unauthorized by the mobile OS manufacturer, the handheld device manufacturer or the network provider. (Traffic visiting websites in this category may indicate jail-broken or rooted phones.)
- Web Analytics: Sites that are associated with web traffic analysis.
- Web and Email Marketing: Sites that are associated with online marketing.
- Web and Email Spam: Sites whose links are sent in unsolicited commercial email, either as part of campaigns to promote products or services or to entice readers to click through to surveys or similar sites. Also includes sites that display comment spam.
- Web Collaboration: Sites that provide virtual workspace for purposes of collaboration and conferencing, which may include sites that enable authorized access to a computer or network from a remote location.
- Web Hosting: Sites of organizations that provide hosting services, or top-level domain pages of web communities.
- Website Translation: Sites that enable translation of website text.

Internet Communication

The parent category that contains the following categories:

- General Email: Sites that provide email services open to general use.
- Organizational Email: Log in sites for corporate or institutional email systems.
- Text and Media Messaging: Sites that enable the sending of messages and other content via SMS, EMS, MMS or similar protocols.

- Web Chat: Sites that host web chat services or that support or provide information about chat via HTTP or IRC.

Intolerance

Sites that condone intolerance towards any individual or group.

Job Search

Sites that offer information about or support the seeking of employment or employees.

Militancy and Extremist

Sites that offer information about or promote or are sponsored by groups advocating anti-government beliefs or action.

Miscellaneous

The parent category that contains the following categories:

- Content Delivery Networks: Commercial hosts that deliver content to subscribing websites.
- Dynamic Content: URLs that are generated dynamically by a web server.
- File Download Servers: Web servers whose primary function is to deliver files for download.
- Network Errors: URLs with hosts that do not resolve to IP addresses.
- Private IP Addresses: IP addresses defined in RFC 1918, 'Address Allocation for Private Intranets.'
- Web Images: Sites that deliver image content.
- Web Infrastructure: Sites that are associated with website architecture.
-

News and Media

Sites that offer current news and opinion, including those sponsored by newspapers, general-circulation magazines or other media.

- Alternative Journals: Online equivalents to supermarket tabloids and other fringe publications.

Parked Domain

Sites that are expired, offered for sale, or known to display targeted links and advertisements.

Productivity

The parent category that contains the following categories:

- Advertisements: Sites that provide advertising graphics or other ad content files.
- Application and Software Download: Sites that enable download of software, applications.
- Instant Messaging: Sites that enable instant messaging.
- Message Boards and Forums: Sites that host message boards, bulletin boards and other unaffiliated discussion forums.
- Online Brokerage and Trading: Sites that support active trading of securities and investment management.
- Pay-to-Surf: Sites that reward users for online activity such as viewing websites, advertisements or email.

Religion

The parent category that contains the categories:

- Non-Traditional Religion: Sites that provide information about non-traditional religious beliefs and practices.
- Traditional Religions: Sites that provide information about or promote Bahai, Buddhism, Christian Science, Christianity, Hinduism, Islam, Judaism, Mormonism, Shinto and Sikhism, as well as atheism.

Security

Security-related website categories that allow you to develop policies to deny access to sites associated with spyware, phishing, keylogging and malicious mobile code.

- Advanced Malware Command and Control: Protects against outbound transmissions from a compromised machine to a malicious command-and-control center.
- Bot Networks: Sites that host the command-and-control centers for networks of bots that have been installed onto users' computers. (Excludes web crawlers.)
- Compromised Websites: Sites that are vulnerable and known to host an injected malicious code or unwanted content.
- Keyloggers: Sites that download programs that record all keystrokes, and which may send those keystrokes (potentially including passwords or confidential information) to an external party.
- Malicious Embedded Link: Sites infected with a malicious link.
- Malicious Embedded Iframe: Sites infected with a malicious iframe.
- Malicious Websites: Sites containing code that may intentionally modify users' systems without their consent and cause harm.
- Mobile Malware: Protects against malicious websites and applications designed to run on mobile devices.
- Phishing and Other Frauds: Sites that counterfeit legitimate sites to elicit financial or other private information from users.
- Potentially Unwanted Software: Sites using technologies that alter the operation of a user's hardware, software or network in ways that diminish control over the user experience, privacy or the collection and distribution of personal information.
- Spyware: Sites that download software that generate HTTP traffic (other than simple user identification and validation) without a user's knowledge.
- Suspicious Embedded Link: Sites suspected of being infected with a malicious link.

Shopping

Sites that support the online purchase of consumer goods and services except: sexual materials, lingerie, swimwear, investments, medications, educational materials, computer software or hardware, alcohol, tobacco, travel, vehicles and parts, weapons.

- Internet Auctions: Sites that support the offering and purchasing of goods between individuals.
- Real Estate: Sites that provide information about renting, buying, selling or financing residential real estate.

Social Organizations

The parent category that contains the following categories:

- Professional and Worker Organizations: Sites sponsored by or that support or offer information about organizations devoted to professional advancement or workers' interests.
- Service and Philanthropic Organizations: Sites sponsored by or that support or offer information about organizations devoted to doing good as their primary activity.
- Social and Affiliation Organizations: Sites sponsored by or that support or offer information about organizations devoted chiefly to socializing or common interests other than philanthropy or professional advancement.

Social Web - Facebook

Category used to manage the Facebook domain.

Social Web - LinkedIn

Category used to manage the LinkedIn domain.

Social Web - Twitter

Category used to manage the Twitter domain.

Social Web - YouTube

Category used to manage the YouTube domain.

Society and Lifestyles

Sites that provide information about matters of daily life, excluding entertainment, health, hobbies, jobs, sex and sports.

- **Alcohol and Tobacco:** Sites that provide information about, promote, or support the sale of alcoholic beverages or tobacco products or associated paraphernalia.
- **Blogs and Personal Sites:** Sites that host blogs and personal sites.
- **Gay or Lesbian or Bisexual Interest:** Sites that provide information about or cater to gay, lesbian, or bisexual lifestyles, but excluding those that are sexually or issue oriented.
- **Hobbies:** Sites that provide information about or promote private and largely sedentary pastimes, but not electronic, video or online games.
- **Personals and Dating:** Sites that assist users in establishing interpersonal relationships, excluding those intended to arrange for sexual encounters.
- **Restaurants and Dining:** Sites that list, review, advertise or promote food, dining, or catering services.
- **Social Networking:** Sites of web communities that provide users with means for expression and interaction.

Special Events

Sites devoted to a current event that requires separate categorization.

Sports

Sites that provide information about or promote sports, active games, and recreation.

- **Sport Hunting and Gun Clubs:** Sites that provide information about or directories of gun clubs and similar groups, including war-game and paintball facilities.

Tasteless

Sites with content that is gratuitously offensive or shocking, but not violent or frightening. Includes sites devoted in part or whole to scatology and similar topics or to improper language, humor or behavior.

Travel

Sites that provide information about or promote travel-related services and destinations.

Vehicles

Sites that provide information about or promote vehicles, including those that support online purchase of vehicles or parts.

Violence

Sites that feature or promote violence or bodily harm, including self-inflicted harm; or that gratuitously display images of death, gore or injury; or that feature images or descriptions that are grotesque or frightening and of no redeeming value.

Weapons

Sites that provide information about, promote, or support the sale of weapons and related items.

Date and time, pupil internet name, source IP address, destination IP address, port ID, internet line used, firewall policy and protocol, filtering category, application name, web destination, whether access was allowed or denied, total bytes used and total hits on that site by that user.

This data can then compiled to produce the following sorts of reports by pupil:

This data will be kept on the Firewall for up to 1 month.

APPENDIX C – EXAMPLE OF A COMPILED REPORT HELD ON THE DEPT.SHARES FOLDER

Blocked website report

26/06/2021 19:39	GYTFREGEM01	Alcohol and Tobacco	www.thedrinksbusiness.com
26/06/2021 10:03	GYTFREGEM02	Illegal or Questionable	b-ok.cc
