

DRINKING WATER NOTICE

Monitoring requirements not met for Knox Elementary West Branch PWS

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the 6-Month January – June 2023 time period we did not complete all of the required monitoring for the lead and copper and therefore cannot be sure of the quality of our drinking water during that time.

What Should I Do?

This notice is to inform you that Knox Elementary West Branch PWS did not monitor and report the required number of tap samples for the presence of lead and copper in the public drinking water system during the 6-Month (January – June 2023) time period, as required by the Ohio Environmental Protection Agency. You do not need to take any actions in response to this notice.

What Is Being Done?

Upon being notified of this violation, the water supply was required to resume sampling for lead and copper every six months until it is determined by Ohio EPA that the system can return to annual sampling. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.

Additional information may be obtained by contacting Knox Elementary West Branch PWS at:

Contact Person: JEREMY GOSSIAUX
