

PowerSchool Single Sign-On Account Creation

Noblesville Schools uses a feature in PowerSchool called Single Sign-On which allows parents/guardians to create their own unique username and password to access the PowerSchool parent portal. It also allows parents or guardians with multiple children enrolled in Noblesville Schools to use their account to view each of their children's information in PowerSchool using this single login.

In order to create a parent account, you will need an Access ID and Access Password for each child. This information can be obtained from your child's school office.

The PowerSchool parent portal link is:

<https://noblesville.powerschool.com/public>

On the login page, you will need to click the Create Account button to first setup your account. Once your account has been created, you should sign in with your username and password.

On the Create Account screen, enter your first name, last name, email address, username desired, and a password.

Enter your child's name (capitalize the first letter of the their first and last name), enter the Access ID and Access Password for your child, and select your relationship to the child. ***Be sure to capitalize any letters that are shown as capitals in the Access ID or password.**

If you have more than one child, you will need a separate Access ID and Access Password for each child. You may add your other children to this account now or at a later time. Click the Enter button to create the account.

Once you have successfully created your parent account, you can login with the username and password you specified and view all of the children you attached to the account with this single login. Be sure to check your account preferences to enable email notifications from PowerSchool otherwise you will not receive PowerSchool emails.

A video tutorial on how to create your Single Sign-On account is available at:
