

Signing into Home Devices with School Accounts

The following steps will be the easiest way for students to sign into their school accounts from home.

1. Make sure you have the Chrome browser installed. If you need help with this, go to: <https://support.google.com/chrome/answer/95346?hl=en&co=GENIE.Platform%3DDesktop>
2. Once you have Chrome opened, you will need to login to your school account. If you already have a personal account on Chrome, you can add other accounts by following these instructions:
 - On your computer, sign in to [Google](#).
 - On the top right, select your profile image or initial.
 - On the menu, choose Add account.
 - Follow the instructions to sign in to the account you want to use.
 - Make sure to select “Sync with Google” when prompted in order for your account to look like it does on your school device.

You are able to switch between your personal accounts and school accounts by selecting the profile image or initial and selecting the account you want to switch to from the menu.
