

What processes are responsible for creating river features?

What are the features of landscapes and how do humans impact them?

What is the link between globalisation and the development of global cities?

What are the links between rural and urban spaces?

How can we use a range of skills to understand the complex subject that is geography?

What are the strength and limitations of Russia? What is conflict and how does this apply to Russia?

What features and processes are associated with glaciers, rivers and coasts?

What are the processes associated with rivers?

What are distinctive landscapes?

How have global cities evolved?

How does population and economic growth link?

What is the built-up world?

How can you think like a geographer?

Year 9

What is the geography of Japan?

Why is Russia a global force?

How do glaciers, rivers and coasts influence the landscape?

Locational knowledge	
Place knowledge	
Human Geography	
Physical Geography	
Geographical skills and fieldwork	

How is the population changing and what pressure is this placing on the economy and green spaces?

How can we use a range of skills to understand the complex subject that is geography?

Where is Japan and what are its human and physical features?

What tectonic hazards, where do they occur and how do they impact people and places?

Do we live in a hazardous world?

Who are the world's superpowers? What makes a country a superpower?

Who is the ultimate global superpower?

What are the impacts of tourism?

Year 8

How do ecosystems vary around the world?

How has globalisation impacted world development

What is development and how globalisation influenced it?

How do we influence weather and climate?

How is world population changing and what pressures does this create?

What is tourism and how does it impact places?

What are ecosystems and what processes operating in them. What are the threats to them?

What are ecosystems and what processes operating in them. What are the threats to them?

Assessment
Students will have formerly assessed pieces of work over the year, as well as ILTs. Additionally, there will be reape and spelling tests in lessons on a regular basis.

What is the difference between weather and climate?
What is extreme weather and how does it impact us?
How does climate change link to extreme weather?

How and why is the population growing and what challenges does this create?

What is life like in Africa?
What are the human and physical characteristics of east Africa?
How does life vary between rural and urban east Africa and what challenges does this create?

How can we find places?

What is geography?

Year 7

Key Stage 3 Geography curriculum map

How and why is the population growing and what challenges does this create?

What are the human and physical characteristics of east Africa?
How does life vary between rural and urban east Africa and what challenges does this create?

What do all maps need?
How can we use different geographical skills to interpret maps?

How can geography be categorised?
What fieldwork skills can be used to show the types of geography?
What types of geography can be found around KHS?
