

## **SCHOOL SECURITY CAMERAS**

In an effort to continually maintain an environment where student, employee, community, and building safety is of paramount importance, the district may utilize security cameras within its buildings and grounds. Whereas not to replace the "human element," the security cameras will be used to complement the efforts made by school personnel involved in maintaining a safe environment. Security cameras have been installed to monitor the high school parking lot, cafeteria, hallways and all entrances, and the elementary/middle school main entrances, hallways, lunchrooms, back parking lot, and playground.
