

# iFive Technology Initiative

## Welcome to the iFive Technology Initiative

The goal of the iFive Initiative is to use technology to strengthen the growth of curriculum and competencies for work, citizenship and life-long learning. District Five will prepare students for academic success and beyond. Teachers will prepare students to demonstrate not only what they know, but show what they know, by actively promoting communicators, creators, critical thinkers and collaborators of information.

District 5 is committed to preparing students for the 21st century and wants students to be highly successful as they graduate and pursue goals for further education, training, and careers.

Providing teachers and students with powerful tools is an important part of 21st century teaching and learning. The iFive Initiative will equip classrooms with interactive technologies which will allow teachers to deliver innovative and integrative lessons to promote collaboration and communication in teaching and learning.
