

Beaufort County School District (BCSD)

Supplement not Supplant Policy for Title I

Local Education Agencies (LEA's) may use Title I funds only to supplement or increase the level of funds that would, in the absence of Title I funds, be made available from non-federal sources for the education of students participating in Title I programs. Title I funds are not used to supplant funds received from the state and local sources.

The following steps have been put in place to make sure Title I funds are supplemental:

- Beaufort County School District meets the state defined minimum program for staffing and program offerings (SC Code SECTION 59-20-20).
- Schools are funded with non-federal funds using a standardized staffing formula that is weighted to provide additional resources for students with disadvantages (EFA of 1977 - Act 163).
- Comparability is completed annually to make sure Title I schools are receiving their "fair share" or more.
- Maintenance of Effort (MOE) is calculated annually to prove that the school district is spending additional funds each year with non-federal funds.
- School plans are reviewed on two levels before being submitted to the state:
 - Finance - to ensure that funds are supplemental and allowable and
 - Administrative Services - to ensure activities are in alignment with district and state goals and standards to ensure that the plans support students in meeting the state's challenging performance standards

Description of Salaried Budgets & Staffing Formula

The projected enrollment is used, in conjunction with the **staffing formula**, for allocating funds for staff positions. The teacher/student ratio is also taken into consideration. The staffing formula is used to define the staff resources that are believed to be necessary to achieve the Board's goals. The staffing model represents what a typical elementary, middle, and high school should have for staffing based on the state's defined minimum program and accreditation standards. This model is designed to provide equity among the schools based on population and individual school needs and is reviewed each year for potential changes.

District administrators meet with principal's annually to discuss the staffing needs of the school. These meetings provide the principal an opportunity to express staffing needs in the supplemental and intervention programs based on data analyses. These needs are reviewed by district administrators for equity, appropriateness, and availability of funds.

Certified staff are assigned based on different formulas for elementary, middle, and high school (see staffing formula). For budget purposes, the Finance Office assigns a unit value for staff positions. A unit of certified staff is valued at the average teacher's salary plus benefits. Units are valued annually during budget development. The 15th day membership report will be used to determine the differential between the projected and actual enrollment. Staffing and supply allocations may be adjusted by the administration based on this information.

Projections of pay increases for certified staff are determined by the mandatory salary schedule established by the South Carolina Department of Education. The mandatory increase is placed into a formula, and a local supplement is added to the state's base. Any pay increases for certified staff in addition to those mandated by the South Carolina Department of Education must be approved by the Board. The state sets the tone of pay increases by mandating cost of living adjustments (COLA) for teachers. The administration proposes increases for other staff based on industry data, the consumer price index (CPI) and historical data.

Per Pupil Supply Allocation

The non-salaried budget is derived using an average per pupil cost for elementary, middle and high schools. The average per pupil allocation is multiplied by the number of students from the enrollment projection to generate a school's budget. A lump sum figure along with historical data is distributed to the principals to help them formulate their budget for the upcoming year.

	Budget
High School PPA	\$165
Middle School PPA	\$141
Elementary School PPA	\$131

The 15-day membership report is used to determine any differential in the projected to actual enrollment. Schools exceeding the enrollment projection are given an additional allocation based on PPA multiplied by the number of students above the projected amount.
