March 12, 2020

RWHS Students and Parents,

Plans for attending school, Monday March 16th, to initiate and discuss what our new NTI days and schedule would look like changed with Governor Beshear's latest announcement. We now have to alter this plan with an agenda that looks like this:

1. Any student/family can make arrangements to pick up their chromebook/charger from school on the Monday the 16th. We will have someone here from 9:00 AM- 6:00 PM to allow for this pickup. School Chromebooks have been altered to allow for non-district wi-fi usage. **Students can also continue to access google classrooms via the same method they have been using throughout the year at home for homework, assignments, etc and waive Chromebook pickup.** If anyone already has a school issued Chromebook mistakenly taken home, they will need to bring it in and get it updated so it will work at home.
1. Packets will also be available for the 1st initial week of NTI days for those w/o the appropriate technology and will be available the ensuing weeks for pickup moving further. This will most likely be a limited number of students because we have worked via this technology for 139 school days already.
2. Teachers will be available every week day during this non face-to-face instructional time and the schedule will look like this:
 - 1st Pd 9:00-9:30
 - 2nd Pd 9:30-10:00
 - 3rd Pd 10:00-10:30
 - 4th Pd 10:30-11:00
 - **Lunch 11:00-12:30 Drive-up pickup at Campbell Elementary for all district students**
 - 5th Pd 12:30-1:00
 - 6th Pd 1:00-1:30
 - 7th Pd 1:30-2:00
3. Students, w/technology, will be required to check-in, at some point during that specific class time frame (or be considered absent), to verify that they are getting the assignment and required work. This requirement can be "tweaked" according to that specific teacher's expectation. Parents, a large portion of this initial work will be review of previous standards/units that have already been taught and will just be further reinforcement of the skills they have acquired to date. If you have questions about a specific class and expectations please contact that teacher via the google classroom chat/messaging system. This will be a fluid situation moving forward and we might move towards other visual communication medias as teachers see fit.

Obviously NTI instruction is new to our district and there will be some "hiccups" during this time frame but we hope to provide our grades 7-12 students the best version possible of this new non face-to-face instructional model. Fortunately, with our 1:1 Chromebook Initiative, we are more than equip to successfully head down this path with a certain confidence that we can educate our students and move forward in a positive manner with these "new to us" NTI days over the next 10-15 school days.

Thank you all,

Tom Collins
Principal, RWHS
