

## II. Infection Control Measures

- Practicing regular hand washing and utilizing sanitizers.
- Employing Personal Protective Equipment (PPE) like disposable gloves and aprons to minimize the risk of blood or bodily fluids exposure, particularly in cases involving student bleeding.
- Conducting routine disinfection of the infirmary, including medical equipment.
- Ensuring the sterilization of medical instruments in an autoclave to eliminate harmful bacteria, viruses, and fungi effectively.
- Utilizing single-use items such as thermometer probe covers and promptly disposing of them.
- Properly disposing of sharps by placing them directly into a designated sharps container, which is then sent for incineration.
