

## About the Cecil County School of Technology

Our students are trained in food sanitation and safety. They receive the ServSafe and Prostart certifications. After completing the program, many students go directly into the restaurant and food service industry. Others choose to attend culinary schools to further train for their career.

## Catering Services

The Cecil County School of Technology Culinary Department is now providing catering services to the public. Our students work very hard to prepare excellent appetizers, fruit and vegetable trays, wraps, and desserts. Other dishes are available upon request. All of our foods are beautifully displayed and only the best ingredients are used in preparation.
