

## EDUCATIONAL OPPORTUNITIES

The purpose of this program is to provide educational and work experience for the students to move from the classroom to the work force and to promote enrollment in post-secondary programs to earn an Associate's Degree from a Community College and/or a Bachelor's Degree from a University in the areas of Horticulture, Landscape Design, Turf Management, Greenhouse Management, and Agricultural Studies.

Students earning a "B" or higher in all Landscaping & Horticulture Technology courses may receive articulated college credit.

### *Program Course Sequence*

*Junior Year, First Semester*

Principles of Plant, Animal & Environmental Science

*Junior Year, Second Semester*

Foundations of Horticulture

*Senior Year, First Semester*

Plant Production

*Senior Year, Second Semester*

Landscape Design & Management

***Students who successfully complete all courses in the Landscaping and Horticulture***

## CERTIFICATION TESTING

Students are required to take the exam to become a Certified Professional Horticulturalist by the Maryland Nursery and Landscape Association.

Students will also take the Maryland Pesticide Applicators test to become a private applicator.

## LEADERSHIP

All students will become members of the National Student Organization - FFA.

Students can compete in Career Development Events, Landscape and Nursery production and Floral Design.

## PROGRAM FEES

Cost of trade appropriate clothing, tools, and license/certification exams.

Uniform approximately \$45.00

Certification \$40.00

Cecil County Public Schools does not discriminate in admissions, access, treatment or employment in its programs and activities on the basis of race, color, gender, age, national origin, religion, sexual orientation, or disabling condition.

*Expect Success at CCST  
Certifications, Citizenship, Skills & Technology*

## GREENHOUSE PRODUCTION

Working in the school's greenhouse, the students will raise crops of poinsettias, a spring crop of annuals and perennials along with hanging baskets, herbs, and hydroponic vegetables.

Plant identification, propagation, and fertilizers will also be studied.

## EQUIPMENT OPERATION

The safe operation and maintenance of many types of landscaping and nursery equipment will be studied, such as tractors, aerators, over-

seeders, mowers, dethatchers, and chain saws.

## FLORAL DESIGN

The principles of floral Design will be studied as the students construct corsages, seasonal arrangements and specialty arrangements. Proper storage, conditioning, and flower identification is included in the content.

## CAREER & TECHNICAL EDUCATION

The Landscaping & Horticulture Technology program is only offered at CCST. Students from five county high schools have the opportunity to begin the program during their junior year through an application process.

Students will complete their programs during their senior year.

## HYDROPONICS

Students use hand on skills to learn how to grow vegetables and herbs in nutrient solutions without soil. They learn how to construct, operate, and maintain this specific type of growing system.

## LANDSCAPE AND TURF MANAGEMENT

The students will install lawns, plant trees and shrubs and learn how to maintain them. The students will understand basic

soil types and how to improve them. They will work with pesticides and fertilizers.

Students will also construct walls and walkways with hardscaping materials.

## PESTICIDES

Students will study pesticides including safe handling, application techniques, formulations, and environmental concerns to prepare for certification.
