

Businesses In Our Area

The following businesses are great for you to begin your job search. You should always research companies that you are interested in so that you can understand the purpose of the businesses, their goals, and their plans for the future. When searching for job opportunities, look for the “career” tab located on the website. Once you are in the job listing section of the website, search for “entry level” positions because you may not have any experience in that career area.

Employers are looking for graduates who are at least 18 years old with reliable transportation and a great work ethic. Work ethic means that you will be on time for work daily, show up for work everyday, work hard throughout the day, communicate well with your supervisors and co-workers, and be honest to everyone.

Once you are offered a job you will normally be required to have a drug screening and background check that the company may pay for. If the reports are both acceptable, then you will become an employee of the company.
