**To ensure a valid test, please follow these instructions. It is very important that you are able to concentrate during the entire test. Poor performance will result in an invalid test and require a re-take!**

- No cell phone or headphone use during the test.
- Turn off any televisions, radios, laptops, etc. that may produce background noise.
- Tell siblings and family members the importance of the test to avoid interruptions and distractions.
- The test will begin by asking you background questions for the “demographics” section
- There are 6 test sections called modules. These include word memory, design memory, X’s and O’s, symbol match, color word match, and three letters.
- Read each section’s instructions carefully. Each module is self-explanatory.
