FOOD WASTE FAST FACTS

- > **Food Waste is the LARGEST component of discarded waste, by weight.**
- > **Each person throws out over 200# of food waste each year.**
- > **In the landfill, food waste emits methane, a GHG 80 times more potent than CO₂**
- > **Over 32% of disposed waste is food or other organics.**
- > **Composting now diverts about 800,000 tons of waste, up from nearly nothing in 1985.**
