SAFEGUARDING NEWSLETTER

Autumn 2023

In addition to the useful resources on a variety of matters concerning your childs well-being, this edition focuses on social media and mental health provides resources you may find helpful to support you and your child.

The Safeguarding Team have made two displays located in the Reception area of Bilton School.

One display offers advice and support relating to online safety, covering social media and gaming. The information is predominantly for parents to offer specific support in keeping your children safe online. There are leaflets available for you to take away, so please help yourself if you are visiting.

The second board is for Hats on For Mental Health 2023. Teachers and students were encouraged to wear hats on 10th October to raise money for Coventry & Warwickshire Mind. The board covers useful information on support services and advice lines so please have a read. 1 in 4 of us will experience a mental health issue of some kind each year and no one should face a mental health issue alone.

What parents need to know about

EXPOSING YOUR CHILD'S EXACT LOCATION The 'Snap Map' lets you share your EXACT location in real-time through a map on the app. The user's

location updates when the app has been opened on the device. There is a warning on the Snapchat website about uploading images and videos to 'Our Story' stating that "snaps you submit to 'Our Story' can still show up on the Map, no matter which location setting you choose!." When uploading to 'Our Story' your child's image or video could appear in "Search results and Stories on or off Snapchat today or in the future."

LENS EXPLORER

The 'Lens Studio' on Snapchat gives users the freedom to use their imagination to design their own filters for themselves and others to use. Snapchat states that the lenses users create "must comply with our Lens Studio Submission Guidelines and Community Guidelines and must be appropriate for Snapchatters ages 13+." The 'Lens Explorer' in the app now enables users to choose from thousands of these creations to alter their snaps. Anyone can create a lens for Snapchat, which gives opportunities for age-inappropriate content to be uploaded.

SCREENSHOTS & SAVED MESSAGES While Snapchat's gimmick is that all photos, videos

and text disappear eventually, users still have the capability to screenshot or record anything which has been sent to them. Users may sometimes forget that screenshotting is possible and send a compromising image or message to somebody who they think they trust. They may also accidentally send an image or message to somebody who they

do not trust. Simply by pressing and holding a message, the user is able to save a message they have received, which can be screenshotted or used against them at a later date.

SNAPSTREAKS & ADDICTION

'Snap Streaks' are gained when snaps have been sent back and forth consecutively between friends. The longer that snaps are sent between users, the longer the streak becomes. Furthermore, Snapchat rewards users who have achieved high Snap

Streaks, by gifting emojis, adding incentives for users to keep the streaks. Children invest time into making their streaks as long as possible, which can put an incredible amount of pressure on both themselves and their friendships.

SEXTING

GERES

110/

Due to 'Snaps' disappearing, (users can even send a one-second photo or video), Snapchat has become the chosen platform for children and young people to send sexually explicit images or 'selfies.' Once a photo/video has been screenshotted, or recorded using another device or software, this can lead to further dangers, such as blackmail and cyberbullying. It is illegal to make, possess, download, store and share sexual images, photos and videos of a person under the age of 18. This also includes any sexual images, photos and videos that a child may have taken of themselves. However, if a young person is found creating or sharing images, the police can choose to record that a crime has been committed, but taking formal action isn't in the public interest.

SNAP ORIGINALS

Through 'Snap Originals', users can watch content which has been created by Snapchat on the app, including comedy shows, drama, news and more. Additionally, there are new lenses and filters available, inspired by the 'snap originals' shows. This is another feature to encourage addiction.

What parents need to know about

LIVE STREAMING TO STRANGERS

LIVE STREAMING TO STRANGERS The live stream feature on instagram allows users to connect with their friends and followers in real-time. Followers can comment on the video during the broadcast (which can be turned off in the settings). If your child has a private account, only their approved followers can see their story. It is important to note that they still may have followers that they do not know, which means they could be live streaming to strangers. A public account allows anybody to view their story. We suggest that your child goes through their followers list and blocks people they do not know. An additional risk with live streams is that your child may do something that they regret. This could be captured by a viewer taking a screenshot and further shared around the internet.

DAMAGE TO CONFIDENCE, BODY IMAGE & MENTAL HEALTH

When influencers, celebrities or peers use filters on their photos or videos on instagram, it can set unrealistic expectations of their own appearance and create feelings of inadequacy and low self-esteem. Children may try to strive for a comparable number of likes on their own photo to an image or video that has been edited heavily.

NEW FOR MAY 2018

IN-APP PAYMENTS

Instagram is rolling out in-app payments for products and services directly through the app. It will operate under the same rules as Facebook Payments, which state if you are under the age of 18, you can only use Facebook Payments with the involvement of a parent or guardian.

PHOTO / VIDEO SHARING

RESTRI,

Posting photos and videos is instagram's biggest selling point, so with sharing images comes risks. A photo which includes landmarks in the area, their school uniform, street name, house and even tagging in the location of the photo uploaded to instagram can expose the child's location making it easy to locate them. If their account is not set to private, anyone can access their account and see their images.

HIJACKED HASHTAGS

Like Twitter, hashtags are also an extremely prominent tool in instagram and with that comes potential risks for your child.One person may use a seemingly innocent hashtag with one thing in mind and before you know it, hundreds of people could be using the same hashtag for something inappropriate or dangerous that your child certainly shouldn't be exposed to.

LOCATION TAGGING

Public locations can be added to a users photos/videos and also to their stories. While this may seem like a good idea at the time, it can expose your childs location; this is particularly more of a risk if it is on their story, as it is in

National Online Safety

REMOVE PAYMENT METHODS

If you are happy for your child to have a card associated with their Instagram account, we suggest adding a PIN which needs to be entered before making a payment; this will also help prevent unauthorized purchases. This can be added in the payment settings tab.

RESTRICT MESSAGES

If your child's account is not private, anybody can message them and reply to their stories. If they do wish to keep their account public, we strongly recommend changing the message reply settings to restrict who can message them.

NEW FOR MAY 2018

FILTER INAPROPRIATE COMMENTS

Instagram announced on 1st May Instagram announced on 1st May that they now have an 'anti-bullying' filter on the app. The new filter hides comments containing attacks on a person's appearance or character, as well as threats to a person's well-being or health. The filter will also alert Instagram to repeated problems so they can take action on the user if necessary. This is an automatic filter necessary. This is an automatic filter, but it can be turned off. Make sure this is turned on in the apps settings.

!#{?

TURN OFF SHARING

for Parents

٩

Even though this feature will not stop people from taking screenshots, it will stop others being able to directly share photos and videos from a story as a message to another user. This feature can be turned off in the settings. We also recommend turning off the feature which automatically shares photos and videos from a story shares photos and videos from a story to a Facebook account.

USE A PRIVATE ACCOUNT

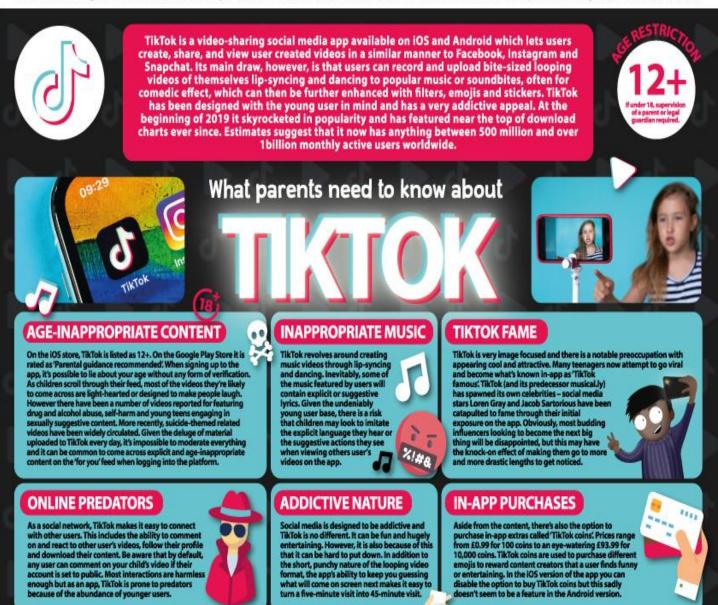

By default, any image or video your child uploads to Instagram is visible to anyone. A private account means that you have to approve a request if somebody wants to follow you and only people you approve will see your posts and videos.

What parents need to know about Vhats

AGE LIMIT CHANGE

Since May 2018, the minimum age for using WhatsApp is 16 years old if you live in the European Union, including the UK. Prior to this, the minimum age was 13, which still applies for the rest of the world. WhatsApp has not yet stated whether it will take action against anyone aged between 13 and 16 who already hold accounts under the old terms and conditions, such as closing their account or seeking parental permission.

SCAM MESSAGES

Occasionally on WhatsApp, people receive spam messages from unauthorised third parties or from fraudsters pretending to offer prizes to 'lucky people,' encouraging recipients to click on a link to win a prize. A common scam involves messages warning recipients that their WhatsApp subscription has run out with the hope that people are duped into providing their payment details. Other scam messages include instructions to forward the message in eturn for a reward or gift from WhatsApp or another person

FAKE NEWS AND HOAXES WhatsApp has been linked to enabling the spread of dangerous viral rumours. In India, for example, a number of attacks appear to have been sparked by false rumours shared on WhatsApp.

THE 'ONLY ADMIN' FEATURE AND CYBERBULLYING Cyberbullying is the act of sending threatening or taunting text messages, voice messages, pictures and videos, with the aim to hurt and humiliate the receiver. The group chat and group video call features are great for multiple people to hart simultaneously, but there is the potential for people to hart others with their comments or jokes. The 'only admin' feature gives the admin of a group chat greater control over who can send messages. Whilst this can be good for one-way announcements, the group admin has the power to block somebody from responding to an offensive message in a chat, which could result in a child being upset and unable to reply

CONNECTING WITH STRANGERS

00

To start a chat in WhatsApp, you need to know the mobile number of the contact you want to speak to and they also need to have the app downloaded. WhatsApp can find contacts by accessing the address book of a device and recognising which of those contacts are using WhatsApp. If your child has shared their mobile number with some-body they don't know, they can use it to get in touch via WhatsApp.

use it to get in touch via WhatsApp. LIVE LOCATION SHARING WhatsApp's 'Live Location' feature enables users to share their current location in real time to their contacts in a chat, allowing friends to show their movements. The feature, which can be found by pressing the 'attach' button, is described by WhatsApp sa a "simple and secure way to let people know where you are." Location-sharing is already a common feature on other social apps, including Snapchat's Snap Map and Facebook Messenger and can be a useful way for a child to let loved ones know they are safe. However, if your child is in a group chat with people they do not know, they will be exposing their location.

CREATE A SAFE PROFILE

Even though somebody would need your child's phone number to add them as a contact, as an extra security measure we suggest altering their profile settings to control who can see their profile photo and status. The options to choose from are 'Everyone,''My Contacts' and 'Nobody.'We suggest selecting 'My Contacts' or 'Nobody' to ensure their profile is protected.

EXPLAIN HOW TO BLOCK PEOPLE

If your child has received spam or offensive messages, calls or attachments from a contact, they should block them. Messages and status updates sent by a blocked contact will not show up on the phone and will stay undelivered. Blocking someone will not remove this contact from the contact list -they will need to be removed from the phone's address book. To block a contact, your child needs to open the person's chat stream and tap on the settings.

REPORT SCAM MESSAGES

Advise your child not to tap, share or forward any message that looks suspicious or sounds too good to be true. When your child receives a message from an unknown number for the first time, they will be given the option to report the number as spam directly inside the chat. They can also report a contact or a group as spam using the following steps: 1) Open the chat. 2)Tap on the contact or group name to open their profile information. 3) Scroll to the bottom and tap 'Report Spam.'

LEAVE A GROUP

If your child is part of a group chat that makes them feel uncomfortable or has been added to a group they don't want to be part of, use the group's settings to show them how to leave. If someone exits a group, the admin can add them back in once, If they leave again, they cannot be added again.

USING LIVE LOCATION SAFELY

If your child needs to use the 'Live Location' feature to share vith you or a friend, advise them to only share it for the amount of time they need to. WhatsApp gives the options of either 15 minutes, one hour or eight hours. However, your child can choose to stop sharing at any time.

DELETE ACCIDENTAL MESSAGES

for arei

If your child has sent a message to the wrong chat or if a message they sent has contained a mistake, they can delete it. To do this, simply tap and hold on the message, choose 'Delete' and then 'Delete for everyone.' The app allows seven minutes to delete the message after it has been sent, but it is important to remember that recipients may have seen and screenshot a message before it was deleted.

SET TIME LIMITS

A 2017 study found that by the age of 14 the average child will have sent more than 35,000 texts, 30,000 WhatsApp messages and racked up more than three solid weeks of video chat. Although it is inevitable that your child will use technology, you can still set boundaries. This is not easy, especially since teens use their devices for both schoolwork and free time, often simultaneously.
