1. Stormwater Mission Statement

The Stormwater Management Program (SWMP), adopted by the Hendrick Hudson Central School District (HHCS D), complies with the United States Environmental Protection Agency (USEPA) regulations, pertaining to the control of stormwater discharges from the following school properties:

- The District Office, 61 Trolley Road, Montrose, NY 10548
- Frank G. Lindsey Elementary School, 57 Trolley Road, Montrose, NY 10548
- Hendrick Hudson High School, 2166 Albany Post Road, Montrose, NY 10548
- Furnace Woods Elementary School, 239 Watch Hill Road, Cortlandt Manor, NY 10567
- Blue Mountain Middle School, 7 Furnace Woods Road, Cortlandt Manor, NY 10567

2. Minimum Control Measures

Under Phase II Stormwater Regulations, the SPDES General Permit (GP-0-10-002) was issued by the New York State Department of Environmental Conservation (NYSDEC). The new permit, which became effective on May 1, 2010, lasts for five (5) years until April 30, 2015.

The new permit requires HHCS D to implement six (6) Minimum Control Measures (MCMs) to curb pollutant runoff from stormwater discharges. The six (6) Minimum Control Measures (MCMs) include:

1. **MCM1** - Public Education and Outreach
2. **MCM2** - Public Involvement/Participation
3. **MCM3** - Illicit Discharge Detection and Elimination

4. **MCM4** – Construction Site Stormwater Runoff Control
5. **MCM5** – Post-Construction Stormwater Management
6. **MCM6** – Pollution Prevention/Good Housekeeping

3. Continual Implementation Progress

HHCSO is required to develop its Stormwater Management Program (SWMP), containing the above MCM requirements, within the first three (3) years of coverage. The permit requires the district to demonstrate that continual progress is being made to reduce stormwater pollutant discharges over the duration of the three (3) year permit.

Accordingly, HHCSO will be promoting public education and public participation as well as establishing a stormwater steering committee. In addition, the District will be developing policies/procedures to address illicit discharges, construction and post-construction stormwater management, and pollution prevention. For further details on the Phase II Stormwater Regulations, please refer to the SWMP Guidance Manual.

4. Stormwater Website

HHCSO will be establishing a specific Stormwater Website for the purpose of listing contact persons, fact sheets and newsletters related to stormwater management.

5. Stormwater Coordinator

The Stormwater Coordinator for the District shall act as the local point of contact for all concerns regarding the stormwater management and compliance with the NYSDEC Stormwater General Permit for stormwater discharges from the District.

The current stormwater permit falls under the jurisdiction of Buildings, Grounds and Transportation Office under the direction of:

Anthony Merlini, P.E.

Director of School Facilities, Operations & Maintenance

61 Trolley Road

Montrose, NY 10548

5. Stormwater Steering Committee

The District shall establish a Steering Committee to:

- Oversee the current and ongoing stormwater program activities
- Develop a District Budget for the SWMP
- Foster District Community Participation
- Ensure representatives from each of the permitted facilities participate in the development and implementation of the SWMP
- Adopt Policies and Procedures that will curb stormwater pollution

The **Stormwater Steering Committee** shall be established by the Stormwater Coordinator, **prior to the next Stormwater Management Progress Meeting**, to be held in early March 2012. The steering committee will consist of key representatives from each of the five (5) permitted facilities and will include a superintendent representative, the website development manager, head custodian, a student and an environmental teacher.
