0

Staffing

Total full-time equivalent positions for all personnel in the most recently completed fiscal year:

739.10

Narrative: Summarize in the space provided your entity's recent efforts to increase transparency in the area of Traditional Finances. Be sure to:

- a) provide explanations for any terminology that appears in the summary,
- b) describe any benchmarks, standards or best practices your entity uses to gauge its progress in this area, and
- c) detail any historical analysis used to track its efforts to improve transparency in this area.

a. The Texas Student Data System (TSDS) is a process whereby school districts submit required data to Texas Education Agency (TEA) about public education, including student demographics, personnel, financial and organizational data. TSDS replaced PEIMS and improved quality of data collected and reported.

b. The district gages its progress in transparency by continuing to increase the amount and quality of data posted on the districts website. The district goal is to be transparent in all areas.

c. The district website includes various historical analysis, such as ten year history of revenue and expenditures, a ten year history of tax rates, and multiple years of adopted budgets and annual financial reports. We have recently expanded the districts financial transparency website and will continue to add information to achieve the goal of total transparency.

Note: To complete your application, see the specific criteria page for the Traditional Finances Transparency Star which details visualizations, documents, downloadable data and other required information.
