# Grading for Mastery Expectations

<p><b>Mastery Assessment Description</b></p>	<p><b>Mastery-Based Grading</b>  Mastery-based grading is a system for assessing students while promoting deeper learning. The focus of Mastery-Based Grading is to communicate a student’s mastery of standards, skills, or objectives. A student’s overall grade is based on his or her mastery of those elements. Master-based grading utilizes only assessments provided when a teacher deems that skill mastery should have been achieved to determine a student's grade.</p> <p><b>Mastery Assessments</b>  Mastery Assessments are activities conducted by a student to measure how well a student has mastered a specific skill taught. These assessments are often given to determine how well the student learned the material and acts as a gauge to determine the skill levels of a student in meeting a learning goal. Mastery Assessments can often be given multiple times to encourage continuous learning and internalization.</p> <p>Questions to Consider when entering grades for Mastery:</p> <ul style="list-style-type: none"> <li>● Does this assessment come at the end of a learning process?</li> <li>● Does this assessment evaluate student mastery of the learning goal?</li> </ul> <p><b>Formative Assessments</b>  Formative assessments, often thought of as practice, should be given, graded, and given feedback to enhance student learning. These assignments can be entered in the grade book to show students and parents how students are performing on skill-based assessments, but they will not count toward the student’s grades on their report cards.</p>
