

Top 14 Places Affected by Global Warming

By Albert Zhu and Tommy Simpson

VENICE, ITALY

Due to glaciers melting and sea levels rising, the places that have lower land are at risk of flooding. Sea levels rising also make Venice flood prone. It’s really bad because Venice has a lot of canals and just above those canals are homes. If the levels of the canals rise, then the homes next to the canals will flood.

GLACIER NATIONAL PARK, NORTHWESTERN MONTANA

Glacier National Park is known for its glaciers, but Global Warming is responsible for melting the glaciers. The glaciers have shrunk by 85%(!) due to Global Warming.

THE DEAD SEA, ISRAEL

The Dead Sea in Israel is at risk because rising temperatures are making the water evaporate. It will become a salt flat if anything isn’t done by 2050. Then the Dead Sea will be like the Salar De Uyuni salt flat in Bolivia.

ALASKA, USA

Alaska is in danger because rising temperatures can melt all of the ice and flood the mainland. Also the animals that are already living there (moose, etc..) can all die because they can’t adapt to that climate quickly.

THE GULF STREAM

The Gulf Stream is a current that runs along the Mid-Atlantic Ridge. Along the stream there are eddies and meanders. Eddies are like whirlpools(underwater hurricanes) that carry hot water to the north and cold water to the south. Eddies are formed by meanders (where the current is bending), and soon the connection may snap. The eddie may go north. The Gulf Stream is affected because the freshwater from Iceland’s glaciers are mixing into the Stream’s saltwater, slowing down the circulation. The flow has slowed down by 15% to 20%. The Gulf Stream is our planet’s cooling system. Without it, the Earth will be hot like Venus.

THE GREAT BARRIER REEF, AUSTRALIA

The Great Barrier Reef currently has coral bleaching due to rising ocean water temperatures. Coral Bleaching is when the coral turns white and then die. More than 50% of coral in the 2016-2017 period died.

THE AMAZON RAINFOREST

The Amazon has been experiencing severe drought due to Global Warming. Tree species are at risk because they need a lot of water in elevated areas. Due to droughts, the Amazon is now prone to wildfires. If a wildfire occurs, then thousands of species’ habitats are going to be destroyed. The trees

of the Amazon are going to die if the dry season lasts more that 5-7 months. Currently, the season duration is just a few weeks off of that threshold.

YAMAL PENINSULA, RUSSIA

The people of this area have adapted to herding reindeer in Climate Change. Permafrost is the layer of soil that stays frozen all year in polar areas, and the permafrost is melting due to Global Warming and the weather is getting unpredictable. The winter of 2013 was very abnormal because warm temperatures led to rain and then the water froze and the reindeer couldn’t dig through the ice to scavenge for food. A lot of reindeer died of starvation.

THE MALDIVES, INDIAN OCEAN

The Maldives are highly affected by Global warming because rising tides can lead to flooding homes because homes are built on islands and they’re really close to the water.

THE MAINLAND UNITED STATES

Key West florida is a group of islands off the tip of Florida. In 2017, Hurricane Irma was a catastrophe to most southern states (including Key West) and almost reached Indiana!

NAPA VALLEY, CALIFORNIA

Napa Valley is known for its winemaking. Rising temperatures are disrupting the industry and Napa Valley might lose its fame soon because grapevines can’t grow or sustain in such high temperatures.

THE RHONE VALLEY, FRANCE

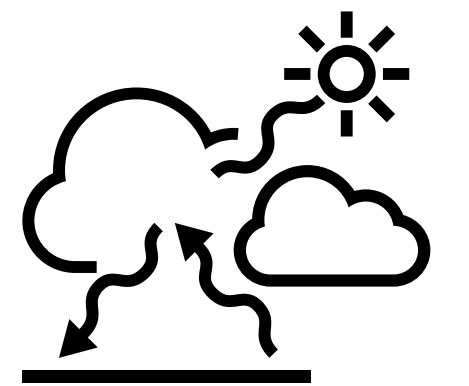

It is also a winemaking tourist stop but rising temperatures make the grapevines’ habitat inhabitable. Wine prices may rise due to this.

MUMBAI, INDIA

Mumbai is a city that’s near the coastline so rising sea levels could be potentially flood Mumbai.

THE ALPS

Rising temperatures melt the snow, which shortens the winter sports every year. Last year, the games were shortened by 38 days!

Mayor Hagerty

By Chaya Duarte and Liv Hammer

How much time do you get off work?

I have 50 hours a week of being Mayor and 10 hours a week with Hagerty Consulting.

What is your favorite book?

Leadership and Tribute.

What is your favorite sport?

I like playing baseball and watching football.

Do you have any pets?

Yes, a dog named Chester.

What is your name?

Stephen H. Hagerty.

What is your favorite animal?

Dogs or goats.

What do you do at your job?

I represent the people of Evanston. I help city roads, parks, and water.

What is your favorite thing to do for fun?

Bike ride and paddle board.

If you could eat only one food for your whole life, what would it be?

Apples

Where did you grow up?

Attleboro, Massachusetts!

Where did you go to school?

Attleboro High School, Syracuse University, and Oakton Community College.

What is your favorite color?

Purple.

If a kid wants to be a mayor when they grow up, what should they do?

They should have a strong character & be willing to do what is right, not what is popular (that depends)

How long have you been a mayor?

Two and a half years.

What is your favorite type of music?

Female folk music.

Are kids allowed to visit you?

Yes! Of course.

If you could pick anywhere in the world to live where would it be?

Evanston, Illinois!

Is being mayor hard?

Sometimes.

Do you speak other languages besides English?

I wish.

What is the craziest thing you have done?

In high school I was the only boy on the girls field hockey team.

Once there were a couple of dads that liked to tease me about being the only boy on the girls field hockey team. Then a girl on my team stood up for me and showed the dads who is boss.

One thing you will never forget in your life are the people who stand up for you and I still remember that to this day!

Note: This interview happened before Halloween.

Are you going to dress up for halloween and if yes what are you going to be?

I am going to dress myself in tinfoil and let people tell me what I am. 🐾

Climate Change

By Louisa Welch, Lyra Rivera, and Sophia Moreno Solis

Did you know that warmer climates means serious problems in the future? Well that’s happening right now!!! We’re here to tell you that you can change the world, before it’s too late!

This is causing glaciers to melt in the polar regions. Did you know that in Greenland, a whole ice bridge collapsed? In ONE year eleven billion tons of ice collapsed and we don’t want that to happen any more. This is affecting polar bears and penguins, and is causing oceans to rise. This causes cities to flood, which means houses flooding on the coasts.

Gases mostly cause climate change because they block the heat from bouncing back into the atmosphere, so the earth gets hotter and hotter. Greenhouse gases are one of the many problems in climate change. Greenhouse gases are bad for the environment because they kill trees and plants by not giving them the natural things they need: wind and a natural amount of water and light. We need plants because they give us oxygen and shade. in a rainforest the heat is very powerful so we need trees to keep shade to live (and oxygen).

Did you know that burning fuels such as oil, coal, running cars (idling) and heating homes are bad for the environment? That’s why you should use solar panels instead of gas to heat your home. The greenhouse gases get caught in the air causing the climate to change which brings us serious problems. Including rising oceans, ice caps melting, and polar bears losing their homes. As in Greenland, the ice caps disappear.

Did you know that science says that we have 8 years to save the planet? Spread the word and help the planet! Recycling, reusing, and reducing (also known as the 3 R’s) help the planet. Just please don’t hurt the Earth. To help save the planet, we can try not to turn on the lights when we don’t need them and go on strike to stop NASA from killing the planets by using gas to get a rocket into space.

NOW PLEASE TRY TO HELP US SAVE THE PLANET!!!!!!!!!!!!

THE EARTH ROCKS!!!!!!!!!!!! 🐾

How Climate Change Affects Animals

By Elena Skeaff

What Animals Climate Change Affects:
The animals affected most are Polar Bears, Frogs, Coral, Monkeys, and also African Elephants. There are many other animals that are endangered.

Why We Need To Help:
We keep using things like coal, we are cutting down trees, and we pollute the ocean. The trees and ocean are the animals’ natural habitat. When we cut down the trees in the rainforest, we take away their home. If we keep sending harmful gasses into the air, more animals will be endangered.

How We Can Help:
We can help by not cutting down natural habitats, and stopping burning coal to get energy. Also, try not to ride in planes, because it makes pollution and the animals breathe that air pollution. We need to help as much as we can.

How It Affects Animals (and Us):
Climate Change is affecting animals most in the ocean and the rainforest. It is affecting animals by doing things like taking away their habitats, and sometimes, endangering them, when wood is chopped down to make things like boats and houses. At the same time, the animals in the rainforest are losing their homes. We must help them so they won’t go extinct. More than 700 mammals and birds are hurt by climate change. Humans really need to start helping! We are also endangering ourselves! Climate Change is affecting just about everything on this planet.

So that explains why we need to help animals...and ourselves... and nature. 🐾

Guinea Pig vs. Hamster Who Would Win?

By Samanaa Manur and Kennedy Liddell

GUINEA PIGS

Have you ever wanted a cute and furry pet that wasn’t a dog or a cat? A guinea pig is the pet for you! Guinea pigs make very good pets. You can train them to do tricks easily with lots of love and treats. A lot of people love guinea pigs more than other pets.

- Pros:**
- They are very lovable.
 - They are very timid. If you forget to close the cage door or forget to lock it, they most likely won’t escape.

- Cons:**
- Well... they do poop a lot, and you have to clean it up (though it’s very easy).
 - The food is expensive and so is buying them.
 - They eat a lot which is bad since the food is expensive.

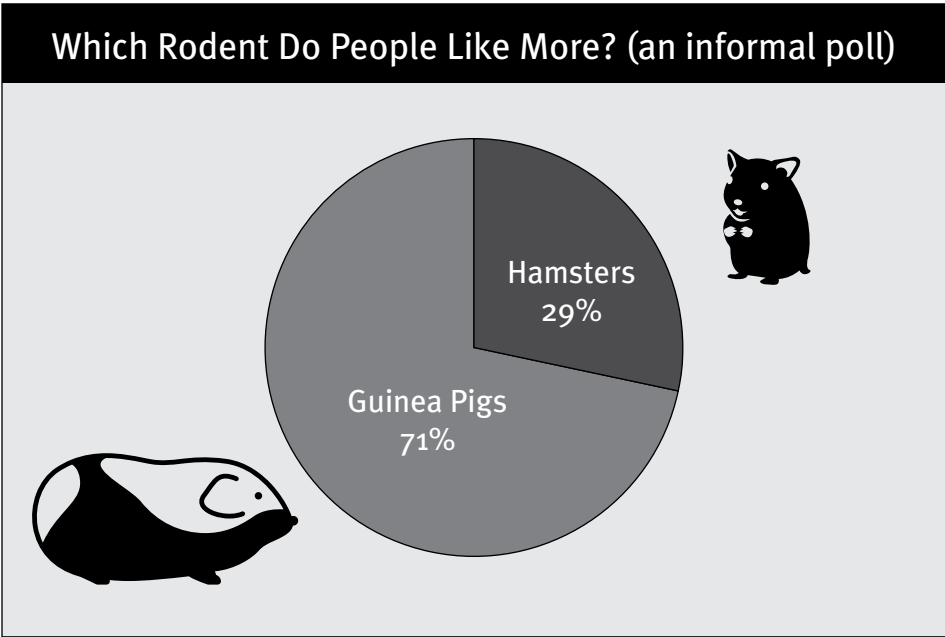

HAMSTERS

Hamsters hamsters hamsters! How could you hate these cute and furry pets? Hamsters are very social and energetic.

- Pros:**
- They can be tamed and are very loving.
 - They love to play parkour and are fun to watch.
 - They are nocturnal: if not bothered by the noise,
 - Children report they feel more secure with a hamster in their room.
 - They bite very rarely.

- Cons:**
- Hamsters are expensive pets. The food, bedding, and buying them is expensive.
 - Food, water, cage, warmth, wheel, ball, bedding, treats, a water bottle, and most of all... Love!!!!
 - When they bite, it’s super hard and it hurts!
 - They only live 2-3 years!
 - They might poop and pee on you when you pick them up!
 - They are difficult to find when they escape and must be kept away from dogs and cats.
 - They are only active at night.

Fun Fact:
A group of hamsters is called a horde.

THE AMAZING CONCLUSION
As you can see... GUINEA PIGS ARE MORE POPULAR THAN HAMSTERS WHICH MEANS GUINEA PIGS WIN!

We only surveyed a few people, so we don’t know that much, but most people in our school and in our class, according to the list, like guinea pigs. Which one do you like better? Hamsters or guinea pigs? 🐾

Sperm Whales Are Close to Extinction

By Evan Wang and Leo Sabey

Welcome to the world of sperm whales! Sperm whales are endangered animals so we need to help them to live. People who harpoon sperm whales are called whalers. At one time, millions of sperm whales lived in our oceans. In the 1800s, people began to hunt these magnificent creatures in a big way.

By 1900,whalers had killed three-fourths of the world’s sperm whales. Early whalers hunted mostly females and calves, which were easier to find and catch than male sperm whales.With bigger and faster ships, modern whalers could catch and kill the bigger males.Scientists worry there may be too few males left for the species to survive.

Sperm whales breed slowly,producing only one calf every five years.Females must be 9 years old and males must reach 20 before they can mate.

Does all this math mean that the sperm whale’s days on the planet are numbered? Some whales are called tooth whales a sperm whale is one of them.But not all whales are called tooth whales,some whales are called baleen whales.Toothed whales eat much bigger prey than baleen whales. For example, sperm whales eat squid and deep water fish. Baleen whales eat only plankton on the top of the water.

Sperm whales also have another enemy, called the giant squid: a razor sharp animal with a large beak.This squid has also caused the near extinction for sperm whales, but usually the sperm whales win the battle. A sperm whale can grow up to 58 feet long and a giant squid can grow up to 48 feet long. However, it still takes a long time to grow a sperm whale, so that’s why males are quite rare.

These whales can live in every ocean in the world but in very deep places. A sperm whale weighs about 57 tons or 578,897,890lbs so that is why they eat about 9 tons of food every day.

Well that is all to this topic for now! 🐾

Palm Oil Is Very Bad

By Chloe Le-Rodriguez

What we are commonly using is causing forest fires every day. This is about the palm oil company and palm oil made in Africa which “helps” ice cream not melt, cookies be tasty and can be found in body wash. Palm oil is oil that causes many forest fires and pollutes the air.

Everyone I know LOVES animals. I told my classmates about palm oil.They hate palm oil SO much now. Some people won’t eat it! That’s one way to save the world! REMEMBER: CHECK THE LABEL!

Did you know that orangutan numbers dropped by 30%?! So have forest numbers! Guess who did this? PALM OIL! Help by not buying anything with palm oil!!

Please research more about PALM OIL to understand how dangerous it is. I think by not eating palm oil so there will be fewer problems with pollution.

If you still say: meh, what’s your point? Well if so think of it this way: we need trees to breathe right? Well... yeah. And the palm oil company sets forest fires for palm trees. Remember how we need trees to breathe, right? And with no clean air to breathe we are just killing ourselves by eating palm oil!

So you get what I’m saying right? Yeah? Yeah. So do you think you could stop eating palm oil? Well, would you? Yeah? Well okay! 🐾

The New Robert Crown

By Zach Rhodes

Have you ever been to Robert Crown Community Center? It is Evanston’s most popular recreational and community center, with over 150,000 people visiting each year. Whether you went to pressschool there, to to explore the gym or ice skate, or have even just been outside to play sports or at the park? Many of us have at some point stepped foot on the property.

While some Evanston residents feel like the old Robert Crown Center could’ve been renovated to save money, due to the fact that the building is from 1974 and was looking nice then, the facility is not looking like current modern-day structures. The decision was made by the city to build a brand new center that is better for this era. The new Robert Crown will open very soon, but that does not include the outdoor fields, which are expected to open later in the summer of 2020.

Are you curious what the new Center will have? The new building is going to have more up-to-date benefits like a library and two NHL sized hockey rinks. It will also have many more outdoor fields, and that also includes more space to run and play. I have also always thought that the currently running building looked old, but now, I realize that it is actually a really old facility, following the design standard of the 70’s. I am also really excited to see the new library

branch that will be at the new building to replace the current option, a “book vending machine” that you can use to get EPL books/movies. Although this seems like a good idea, almost all of the materials in that machine are for kids. Not convenient for adults or teens!

Since the new facility is much larger, there are wings dividing up the space. With more wings dividing up the building, the crew is going to conserve space at the current site by eventually wrecking the old building... and that will make more room for outdoor fields. The new rooms and programs offered at the new building are:

- Two NHL size rinks
- A wing entirely devoted to Robert Crown’s preschool
- Above one of the rinks: a track to jog, walk, and run
- A multi purpose room
- A large gym
- A library (EPL branch)
- A hallway for changing / locker rooms

Unfortunately, there will be no pool.

In conclusion, it will be exciting to see the new facility in the next couple of months! Personally, I am really excited about the new library and running track, and am hoping to see you all there! 🐾

Red Wolves and How They Survive

By Sarafina Rose Schlack

The red wolf lives in the southeastern region of the United States. A full grown red wolf is 45-80 lbs. The males average 60 lbs and the females 50 lbs. The red wolf eats small mammals, and some insects and berries. Red wolves were named so because of the reddish fur on their backs and ears. The red wolf also has white fur on its lips. Genetic studies say that this species is more closely related to coyotes than other wolves.

A red wolf lives in a pack with about 5-8 wolves. Red wolves need their pack to survive. A red wolf lives and travels in its pack. If a red wolf pack member gets hurt, the pack will stay with them and they will all help their one pack member to get better.

Every pack member gets food. If the pack has one sick, tired or hurt wolf, the pack cannot hunt. The entire red wolf pack uses their hunting skills together to catch larger animals such as deer. Individual red wolves usually eat smaller ground animals such as rabbits and rodents. Red wolves also eat birds and raccoons.

Did you know that red wolf cubs are born without seeing and hearing? They depend on their mother to feed and keep them safe. If you ever see a red wolf pack, never get too close. They are wild animals. 🐾

Save The Amazon Rainforest

By Jade Angell, Natalia Pfefferkorn and Rebecca Weiner

Did you know that the Amazon rainforest is on fire? Well, it is. The Amazon is the world’s largest rainforest, located in Brazil, Peru and other South American countries and it is roughly half the size of the United States.

Farmers are tearing down the Amazon to grow soybeans to import to China because it is hard to sell United States soybeans to China. This is called clogging. Tearing down the Amazon kills many species and ecosystems. People who cut down trees in the Amazon say they can’t save the Amazon because they have no other jobs and they need money to support themselves.

The Amazon rainforest is burning for multiple reasons. Dry weather, wind and heat make the fires worse. In the last month there were 19,925 fire outbreaks. Scientists say there will be more fires in the future. Some farmers clear the land with fire so that they can grow crops, and to graze cattle. For the last decade, regulations have actually been reduced. These fires make leaves die and the forest canopy thins. “This is an outrage!” said Natalia Pfefferkorn, one of the authors of this article after hearing this. Because of this people are protesting to save the Amazon. It is home to millions of species, almost half of the worlds species. If the Amazon keeps burning many of those species are likely to go extinct.

Man-made fires are extremely dangerous. These are caused because of careless accidents such as bonfires left without supervision or cigarettes recklessly tossed into the rainforest. The fire outbreaks are so large now that fires can be seen from space. They are a real threat. Man-made fires can destroy entire ecosystems and kill wildlife. They release carbon and greenhouse gasses into the atmosphere. Dense smoke from fires inhabits the clouds, which actually reduces rainfall and makes the Amazon dryer. Because the Amazon is getting dryer, it is easier for fires to start and spread. In the past few months, 75% of the Amazon was affected by these man-made fires.

Scientists call the Amazon rainforest “the lungs of the planet” and this is because the Amazon produces 20% of the world’s oxygen. They think this is going to be the worst year for fires since 2010.

You can help! Teach others what is happening in the Amazon. Make posters and reduce how much paper and oil you use. You can also donate to the Rainforest Action Network or to Rainforest Trust. These organizations help protect the beautiful Amazon rainforest by doing environmental programs throughout the Amazon and helping preserve the species and ecosystems throughout the Amazon. You can also donate to One Tree Planted: they help plant trees throughout the Amazon rainforest.

SAVE THE AMAZON! 🐾

The Booming Population, Will It Ever Stop Growing?

By Nathan Schlack

Did you know that the population of the earth is 7.74 billion people and in a decade it will be 8 billion people? This means that the population is getting larger very fast. We will be facing many problems that we will have to deal with in the future in order to survive.

Scientists are predicting that if the population keeps growing at this pace, in 100 years the world’s population will be 11 billion people. Imagine in 100 years there will be almost twice the amount of people as today. However, it took the world 2.5 billion years to reach just 1 billion people.

There are other reasons the growing population is not good for the planet. One of the many problems now and in the future is that there will be a food shortage. One in eight people do not have enough food in today’s world. In addition, scientists did a study that stated each person needs 100-150 square feet to live comfortably. Most of the world’s population lives in towns or cities. Roughly 55% of the population lives in population centers which are densely populated areas. In contrast, these population centers only take up 3% of the whole entire planet Earth. The reason for this lopsidedness is that only 43% of the entire earth is habitable or able to sustain living things. The reason for some places not to be habitable is hurricanes, earthquakes, volcanoes, tsunamis, air quality and many more reasons. Still, humans manage to live in such difficult habitats and climates.

Resources are a big problem we need to solve. Scientists say that there are only 100 years left of oil on earth. This means that we will have to rely on other sources of energy such as wind turbulence and hydroelectric energy.

The population is still growing. For every 5 babies that are born only 2 people die. The place that has the fastest growing population is Nigeria in Africa. If it keeps growing at the same speed it will reach one billion people by 2100.

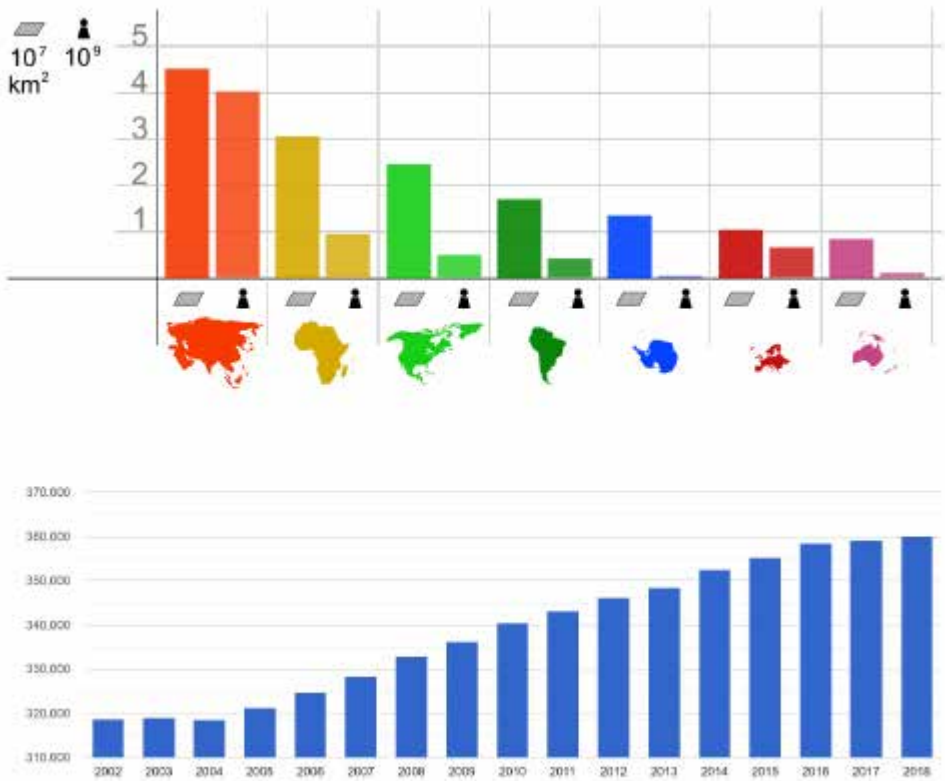

There are some scientists that think the population will not even reach 12 billion people. They think this because they say the growing number of people will stop in 2100. They think this because they say they are four stages of population growth. In the first stage, 4 to 7 babies are born, but only approximately two survive. The next stage is where factories, medicine and major technological advances happen. The third stage is where they still have all the technology but there are less babies being born. The last stage is where the population is stable and there is no population growth. They think the reason the population is still growing is that some countries have not gone through the four stages. 🐾

THE COUNTRIES WITH THE HIGHEST POPULATION:

1. China 1,420,000,000
2. India..... 1,360,000,000
3. United States 320,000,000
4. Indonesia 269,000,000
5. Brazil 121,000,000
6. Pakistan 244,000,000
7. Nigeria..... 200,000,000
8. Bangladesh 168,000,000
9. Russia 143,000,000
10. Mexico..... 132,000,000

THE POPULATION CENTERS THAT ARE MOST POPULATED:

1. Tokyo, Japan..... 38,140,000
2. Delhi, India 26,454,000
3. Shanghai, China 24,484,000
4. Mumbai, India..... 21,357,000
5. São Paulo, Brazil 21,297,000
6. Beijing, China 21,240,000
7. Mexico City, Mexico..... 21,157,000
8. Osaka, Japan..... 20,337,000
9. Cairo, Egypt 19,128,000
10. New York-Newark, USA .. 18,604,000

Go to the Dewey website to read the Tiger Times online and in color!

Bubble Tea!

By Talula Johnson and Josephine Solar

Bubble tea is a Taiwanese iced tea with a layer of chewy tapioca pearls (the bubbles) that sit at the bottom of the drink. The drink itself is made out of a tea base, milk, and fruit, and sometimes syrups. There are many different flavors of bubble tea and there are even different flavors of tapioca pearls. Bubble tea is our beloved drink and we would like you to have the experience of drinking it too. There are many different bubble tea places in Evanston and we would like to recommend the best bubble tea place.

TEALICIOUS BUBBLE

Customer service:
When we walked in, we went to the counter and were greeted with a friendly smile at the counter and a “ How may I help you?”. We were given many suggestions but soon we found our pick. A strawberry lemonade, a berry bubble tea, and a sweet egg waffle (a waffle with EGGstra egg and more sugar in a puffy ball form) We thought the customer service was EGGcellent and they were so nice to let us review them. We were given many choices like “What is your sugar level?”, “Any toppings?” and “What is your ice level?”.

Food & Drink:
Our food was delicious! I (Josephine) got a strawberry lemonade and it was amazing but I thought it was a little sugary, but after

you shake the drink it’s okay. I also got the egg waffle plain and it was amazing—a little sugary, but it’s okay. In my (Talula here) opinion the Eggstra egg waffle is NOT too sugary. But I’m the kind of person who scrapes Nutella out of the jar and adds WAY too much whipped cream to everything so... anyway, I got a berry smoothie with tapioca pearls and it was TEAlicious (we like puns)! It was just the right amount of sugar and ice! It was fresh, sweet and just the right amount of berry. The tapioca pearls (the bubbles) were sweet and chewy but in my opinion, a little bland for the original. We had so many options between drinks to herbal jelly and egg waffles and various types of chicken. The second time we went to Tealicious Bubble, we got a strawberry lemonade (again) and a tropical fruit bubble tea. The tropical fruit tea was pretty good but we have to admit that the berry bubble tea was better.

Atmosphere:
We loved the design inside of Tealicious bubble. It was modern and sleek but with plenty of purple and a cute wall of stuffed animals. The design was so rad and the seating was comfy and cool. The wall of stuffed animals is definitely our favorite part of the place! The lighting was also nice and there were places where you could get a perfect Instagram moment.

KUNG FU TEA
Customer Service:
The customer was okay—we were given options like ice and sugar levels. There was a long wait but we agreed that it was worth

it. The service was friendly and they told us what was in our drinks and what we could add.

Food & Drink:
There was a rolled Ice cream option. We got a Dark Knight which was enormous and delicious. We were kinda disappointed of how they had a very small variety of options. The Dark Knight is chocolate rolled ice cream with cookies on top. We also got a coconut wintermelon (kinda sounds like watermelon but it’s not) milk tea with tapioca pearls. It was very fresh and delicious but it had too much ice. We got a coconut milk tea with grape popping bubbles. It was okay.

Atmosphere:
The atmosphere was pretty cool but very busy. There was a lot going on between the menus and the decor on the walls. It was also a pretty small space. The seating options were some wooden chairs and padded stools. They weren’t the comfiest but we were happy with it.

JOYEE
Customer Service:
The service was very friendly and everybody smiled. The wait depended on the number of customers. We came there once and the wait was pretty long.

Food & Drink:
Joyee is mainly a restaurant with delicious noodles and okay sesame chicken but with millions of drink and bubble tea choices. We got a pineapple coconut bubble tea and chocolate freeze with mini green tapioca pearls. It was delicious and maybe not that nutritious but it seemed fresh and full of natural ingredients. The sizes were big.

Atmosphere:
The atmosphere was very modern and cute at the same time. The seating was very cute and there are lots of windows. There is also a wall of fresh pineapple in the kitchen that everyone can see. Joyee is also expanding, so they must be doing very well.

In conclusion, in our opinion we liked Tealicious Bubble the most but you can go see for yourself. Everyone has their own opinion and we have our own but personally we think Tealicious Bubble is the best because they scored best in all categories and have nice natural flavors. 🐾

Judaism

By Lucille Weisberg

Hey, do you celebrate Judaism? If you don’t, then how about I teach you a little bit about it? The first thing you need to know about Judaism is that they have lots and lots of holidays. These aren’t just any holidays, they all represent something.

Yom Kippur: it represents asking God for forgiveness for all of the mistakes that we have made by not eating for a whole day (if you are 13 and older).

At Passover we celebrate Moses who saved us from being slaves. He listened to God with all his might to save us for greatness and we eat matzah ball soup.

Hanukkah is not a big holiday—the only thing that is really important is the menorah.

Did you know the world got created because of shabbat? Shabbat is how the world got created, according to what I’ve learned. 🐾

MCU and Bonus: Sony with Spiderman

By Tommy Simpson and Albert Zhu

Hello to all of you Marvel fans, and even some of you Sony fans or some of you who have no absolute clue of what we are about to talk about. The Marvel Cinematic Universe (MCU) is broken up into phases, that are different segments that explain it.

As a lot of you know, and have seen, the best-selling movie of all time (we’re pretty sure) is Endgame©. Some of our favorite characters (R.I.P Cap. and if you don’t know who that is, it’s Captain America). The whole storyline of the evolution of the MCU starts with:

PHASE 1

- 1. Iron Man (2008)
- 2. The Incredible Hulk (2008)
- 3. Iron Man 2 (2010)
- 4. Thor (2011)
- 5. Captain America: The First Avenger (2011)
- 6. The Avengers (2012)

This is also known as Phase 1 of the MCU. There are more phases as known to us that go to Phase 4. Phase 1 is what kicked off Marvel’s money-making timeline. This franchise is based on Stan Lee’s comics on superheroes, and made possible by Paramount Pictures. Marvel has been going crazy with their characters. (SPOILER ALERT) They took away Black Widow, Captain America, and Iron Man in Endgame. They are also planning to co-create Spiderman which means that Spiderman will be going back to Sony.

PHASE 2

- Iron Man 3 (2013)
- Thor: The Dark World (2013)
- Captain America: The Winter Soldier (2014)
- Guardians of the Galaxy (2014)
- Avengers: Age of Ultron (2015)
- Ant-Man (2015)

This phase opened us up to some new characters and their atmospheres, including Ant Man and Guardians of the Galaxy Vol.1. The other movies in this phase started a sequel to some of our favorite movies of all times.

PHASE 3

- Captain America: Civil War.
- Doctor Strange.
- Guardians of the Galaxy Vol. 2.
- Spider-Man: Homecoming.
- Thor: Ragnarok.
- Black Panther.
- Avengers: Infinity War
- Ant-Man and the Wasp.
- Avengers: Endgame

This phase has one of the highest-grossing movies of all time, Endgame, which is a

“As a lot of you know, and have seen, the best-selling movie of all time (we’re pretty sure) is Endgame.”

sequel to Avengers: Infinity War. This phase is what really brought Marvel the big bucks. Not only that, but this is what brought MCU fans and the MCU itself to the next level. This also gave the start to a new beginning to the MCU (that means it started phase 4).

PHASE 4

- Black Widow (May 1, 2020) Universe: Marvel Cinematic Universe...
- Doctor Strange and the Multiverse of Madness (May 7, 2021)...
- Spider-Man: Homecoming 3 (Aug. 16, 2021)...
- Thor: Love and Thunder (Nov. 5, 2021)...
- Black Panther 2 (May 6, 2022)...
- Guardians of the Galaxy Vol. 3 (TBD)...
- Captain Marvel 2 (TBD)...
- Into the Spider-Verse 2 (TBD)

This phase is going into action in 2020 and puts existing characters into more movies and more sequels to favorite movies from the past. This phase has not come out yet but is expected to be awesome!

BONUS SEGMENT:

We know that some of you have been distressed of losing one of your favorite characters, Spiderman, so we’re going to tell you what’s happening to him. Marvel and Sony made a deal to sell Spiderman to Sony but they then cut a deal. That means that Spiderman is staying in the MCU and the next movie is going to be in 2021. The movie Far From Home was a Sony movie because the deal wasn’t cut before that release date but now Spiderman is back at Marvel and the next movie is an MCU and Sony Spiderman movie. The deal was cut with a compromise. The next movie will be co-produced between both filmmaking companies and it may be that every Spiderman movie will be co-produced.

** If you don’t know, Marvel has released a new VR experience that’s called Avengers: Damage Control. Apparently Ultron’s back and you get to fight him in this experience. 🐾*

“Surprisingly, the arborist informed the school that the smell was a normal scent of the tree aging.”

Why Does the Tree by Door Number Three Smell?

By Felix Linder

Have you ever wondered why the tree in front of door three smells? What did you think it was? The flies? The dirt? In this article, you will learn why.

Before people figured it out, most families thought it was the sewers that made the tree smell. Other families had many other thoughts involving the white sap all over the base of the tree.

The Dewey staff asked an arborist to figure it out. An arborist is a tree expert. Surprisingly, the arborist informed the school that the smell was a normal scent of the tree aging.

The type of tree is probably a Hackberry tree. A Hackberry tree usually grows berries. Our tree has not grown berries yet (or it already did and for some reason stopped). The tree is named after the type of berry it grows. A hackberry fruit is a round berry that is a shade of purple, red and black.

Now when you walk out of door three and smell something like dead fish, just know it’s the hackberry tree! 🐾

The Hyperloop Train

By Mateo Chookaszian and Aaron Athans

The hyperloop train’s speed can go up to 760 mph. The hyperloop is faster than an airplane’s speed and other trains’ speed. In 2013, when the hyperloop train was made, it cost \$6 billion or \$11.5 million per mile. Other companies have owned the hyperloop but right now Tesla owns the hyperloop.

It is easily the fastest train or vehicle on earth, but a rocket ship is way faster. The hyperloop travels with magnet levitation in solid tubes which are located with emergency exits every few feet. It has no windows because it is so fast you would not be able to see anything. Elon Musk created the first hyperloop. The hyperloop construction cost now is between \$9 and \$13 billion dollars. The hyperloop is going to be built to be super safe and that is Tesla’s number one priority.

There are universities testing the hyper-loop which are University of Politecnica de Valencia, The University of Colorado in Denver, The University of California in Irvine. Also, testing is being done at The University of Cincinnati and The University of Illinois, Urbana-Champaign.

If you are looking to see how long it takes to build a hyperloop? It takes about 20 years to build an official hyperloop. The hyper-loop does not use steam or diesel for the motor. It uses an electric motor instead. 🐾

The Story of Mice

By Sean Park

A mouse is a small animal. Some people keep them as their house pet. They are also well known as pests which means a bad animal for humans.

This is a true story from my own family.

Recently, when the weather got cold, my mom noticed a small bite on the avocado that she left on the counter top of our kitchen. When she saw that, first she thought it could be a big bug from inside the avocado crawling out. However, she had a feeling that it could be a mouse and searched for a mouse trap in the internet and ordered a humane mouse trap that doesn't kill the mouse when caught but traps it in for releasing later.

Then after that day she saw a little mouse touching the leftover avocado on the counter top after everyone was in bed around 12:30AM(a very late hour). She saw this mouse was having only the one it knew that it had eaten already among the three avocados on the counter top and seemed to know what was safe to continue to eat.

My mother wasn't able to catch the mouse, because it was so small and fast but had to wait for the mousetrap to arrive.

The next day, as soon as the mouse trap arrived, she set one up with some peanut butter and another one with some cheese, both well known to be mouse's favorite foods. She succeeded in catching one on the same night on the peanut butter side, then she noticed something was still eating the leftover avocado and succeeded in catching the other one on the other mouse trap when she left some avocado pieces in it. It was interesting that any of these mice didn't eat cheese but only liked avocados. After two mice, we were not able to catch anymore. It seems that these mice were a couple that moved into our house to stay the winter making their family together! Usually mice have 20 babies at once so it's really terrible what would have happened if we didn't catch them quickly!

We released them in a park and watched them crawling onto a tree like a squirrel. I think they would have all died anyways in this cold weather.

“My mom didn’t want to kill anything in the house so was very happy to find this humane mouse trap on the internet market.”

About Humane Mouse Traps:
The usual Snap Trap kills mice by hitting it with a strong snap. My mom didn't want to kill anything in the house so was very happy to find this humane mouse trap on the internet market.

This is how it works. You can put food that a mouse likes (peanut butter or cheese is recommended but in my experience, avocado pieces work perfectly) inside and set the entrance door open by fixing the door to keep open, but will close as soon as something gets into the trap. The mouse will be unable to escape. There was an opinion some mice can die from exhaustion when caught in the trap (from the horror). It's interesting that all the mice are different characters. In my case, my mice were both very tidy that they were grooming (they seemed to be sucking their tails to their front toe to make sure they're clean) themselves when caught in the trap and were diligently looking for ways to escape by scratching near the entrance.

About How Smart A Mouse Is:
Some people think a mouse is not smart, but actually some of them are quite smart. For example, according to an experiment, a Shrew mouse memorizes the way they come into a house and they find other ways in & out easily. But an ordinary mouse is not as smart as a Shrew. It doesn't memorize well enough. A big mouse is a bit smarter than a little mouse... I mean an ordinary mouse.

A mouse could slip through as thin as a quarter could slide in and it never gets stuck on it's way. So that means that it could slip through your door and come in your house even though the door is closed if only there's a very small gap. 🐭

“One day an apple fell on Isaac’s head, and in a brilliant stroke of insight, Isaac suddenly came up with his theory of gravity.”

Isaac Newton

By Pietro Rossi

Isaac Newton was born in London, England on January 4th, 1643 and died on March 31st 1727. The reason I picked Isaac Newton is because I wanted to pick somebody I didn't really know about. So not only you guys are going to learn about Isaac Newton, so am I.

Let's get facty! I asked Isaac Newton his favorite basketball team and he said the Washington Wizards because he was a wizard! Isaac Newton was an English mathematician, physicist, and astronomer. His father's name was Isaac Newton Sr. His father was a farmer and died 3 months before Newton's birth. Newton's mother's name was Hannah Ayscough. His mother remarried when Isaac was 3 years old and left poor Isaac in the care of his grandparents. Isaac attended school where he was inadequate. At one point his mother took him out of school to try to make him a farmer. Isaac didn't want to be a farmer, so he continued school. Isaac Newton then attained his preliminary education from The King's school in Grantham and achieved the top-rank. He then enrolled himself as a smart student at Trinity College Cambridge in 1661. One day an apple fell on Isaac's head, and in a brilliant stroke of insight, Isaac suddenly came up with his theory of gravity. He would spend most of his life at Cambridge, becoming a teacher of mathematics and a fellow of the royal society. He was eventually elected to represent Cambridge University as a member of parliament in the British government. Isaac had to leave Cambridge in 1665 to 1667 because of the great plague. He spent those two years in study in isolation at his home. In Woolsthorpe, he developed his theory of calculus, gravity and the laws of motion.

In conclusion, Isaac Newton died in 1727 but is famous because of the discoveries. Would you want to be Isaac Newton? 🐾

11 Things You Never Knew About Tapirs

By Sam Bray

1. A tapir is a mammal that looks like a pig crossed with an elephant.
2. A tapir's top predator is a jaguar.
3. Tapirs can swim really well. They will jump into a river to escape a jaguar.
4. Tapirs eat bark, buds, and underwater vegetation.
5. There are 5 types of tapirs: South American, Malayan, Brazilian, Mountain, and Baird's.
6. Tapirs live in Malaysia, Asia and Brazil, South America.
7. Malayan tapirs are really endangered. There are only about 300 of them left in the wild.
8. The scientific name for a tapir is either something tapirus or tapirus something depending on which species.
9. Tapirs can live up to 25 years in the wild. In captivity they can live up to 30 years.
10. Tapirs are nocturnal, which means they sleep during the day and are awake at night. Humans are diurnal which is the opposite of nocturnal.
11. The biggest tapirs can weigh up to about 500-800 lbs. Tapirs are somehow related to the rhinoceros family. The largest tapirs can grow to be about 3.3 feet tall. 🐾

The Newest Video Games on the Newest Platforms

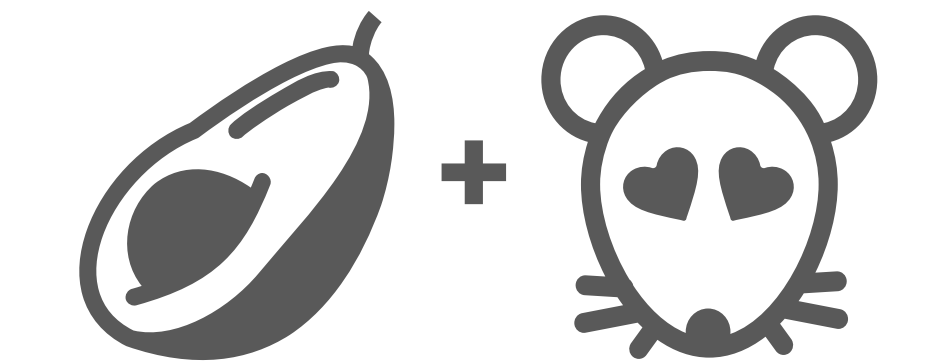

By Frederick Green

There are a lot of new games but there are a lot of new consoles too! Here is a short list of fantastic games and where to find them. (P.S. Remember this is my first article ever so don't expect it to be super long.)

SUPER MARIO MAKER 2 (on Nintendo Switch or Switch Lite): It's like Super Mario Maker 1, but this version is new. It has new stuff like this: Downloadable Content (DLC), new areas and new items like Winter and the Master Sword! You get it by tapping and holding the mushroom and if you see the Master Sword in a little box tap on it. And there is a two-player mode now!

CUPHEAD (on the Nintendo Switch or Switch Lite, Playstation 4, and Xbox): Two cups/one casino/one devil... ladies and gentlemen welcome to Cuphead!!!! Now I don't have much to say about this so basically everything looks like a 1930s cartoon, and you fight bosses so yeah that's pretty much it. And there is new DLC here too!

LUIGI'S MANSION 3 (on Nintendo Switch or Switch Lite): Now a lot of people have been waiting for this game's release.(And somehow I know nothing about it.) and ironically it came out on Halloween. In two-player there is a new character named Googey, a gooey version of Luigi, and he can not touch water. 🐾

Retro Games Are The Best

By Gregory Green

Retro games are the very best-like no other. This is an article about why they're the best and what they are and how to play them.

REASONS

1. If there were no old games, there wouldn't be any new ones
2. The graphics are very realistic (that's my opinion DON'T JUDGE ME). Very true.
3. It's so much fun jumping on platforms and roaming the 2-D (and 3-D) worlds and defeating bosses and hadoukening and racing throwing shells and stuff.

There are probably more reasons than this, but I need to get to a different part.

GAMES

Contra (Nintendo Entertainment System-NES)
One of the oldest alien battle games ever made, but it's super fun. You battle aliens, get new equipment by striking airships, and defeat bosses. There are newer ones, but this one is the original.

Super Mario Bros (NES)
This game is probably the one game you NEED to know, because it is widely known around the world. It's a 2-D platformer where you jump on bricks and throw shells and jump on goombas and defeat bosses. GET. THIS. GAME.

Legend of Zelda (NES)
You might know about Breath of the Wild, but this was, like, 30 years before that. It still had the pixel graphics, but this game had a lot of stuff to it. You could (and still can) shoot arrows and slash swords and defeat Bokoblins and Armos and blade traps and darknuts. If you want to get Breath of the Wild for \$60, that's fine, but if you want around the same quality for a third of the price, you are making a scumdidly-umptious choice.

Sonic the Hedgehog (Mega Drive/Genesis)
This game operates at 100 miles per hour (literally!). From Green Hill Zone to Sky Base Zone, this game is fully action-packed as you dash through the zones as Sonic the Hedgehog, collecting golden rings while you're at it.

Street Fighter 2 (SNES)
The World Warrior(Genesis/Mega Drive/ SNES): This game has a plentiful of characters to choose from like Ryu (the hadoukening powerful fighter that is a fan favorite),the extremely buff 254 pound 7 foot tall beast, and M.Bison, the 247 pound character that's sort of short.

Duck Hunt (NES)
It's a game about an amazing but cruel dog making you hunt a bunch of ducks for his enjoyment(and dinner). It is compatible with the Nintendo Zapper, a fake weapon made for the game. This game is really fun, and the zapper is really cheap(moneywise).

Bubble Bobble (NES)
This is a game where you are a dinosaur that can shoot bubbles out of your mouth. The goal is to trap enemies in bubbles, jump on them, from there the enemy will turn into a fruit or vegetable, and then you'll eat the food for points. It is one of the cutest games on the NES, and one of the cutest soundtracks.

Super Mario Kart (SNES)
You might know what the new Mario Karts are, but this one was first. At the start, you select how many players, what mode you want, and what set of tracks you want. There are 8 characters to choose from, like Koopa, Bowser, Mario, and more. All the tracks are super fun, and I would recommend this for any Mario collector.

Star Fox (SNES)
This game is where you are playing as a fox in an AIRSHIP, fighting people in airships, alongside your friends Falco and Slippy, in different planets and asteroid belts, and doing half-barrel rolls and shooting lasers at bosses, and it's a 3D game with the "new"(1996) FX chip that allows the game to be amazing.

Mario RPG, Legend of the Seven Stars (SNES)
This is Mario turn-based. You walk around as Mario, but whenever you touch an enemy, that's what sets off the RPG (role playing game) part. You can select to punch, unless you get weapons, like a hammer, that does extra damage. Plus, if you tap at the right time when Mario's attacking, you can do TWICE THE DAMAGE!

Super Mario 64 (N64)
3D Mario for the first time! Platforming reimagined! This was before Odyssey and 3D World and Mario Galaxy and Sunshine was a thing! Yeah, it might just look like really good origami folding, but it was an inspiration for all these new games!

Pokemon Stadium (N64)
This game is just the regular turn based Pokemon, but in a huge battlefield and even cooler and more intense. This is old Pokken Tournament, with the old N64 graphics.

Dig Dug (Atari, NES)
This is an arcade hit. If you didn't know, in this game you are in a mine sort of place and you play as a guy with a head full of helium, digging downwards and blowing up enemy's heads and making sure they don't dig their way out.

Pong (Atari, Magnavox Odyssey)
You better know what this game is. I'll describe it with three words: Ancient Ping-Pong (is ping-pong one word?).

HOW TO PLAY THEM

NES Classic
This mini console is packed with 30 games built-in! Games like Super Mario Bros, Bubble Bobble, Excitebike and more! You can even change the game filter, and it has a cool out-of-game music and 4 save files for each game! If you're not a really old retro gamer, show this to your parents(I bet they'll like it).

Playstation Flashback
This console is 45% smaller than the original Playstation, yet still built in with 20 games like Ridge Racer type 4, and Tekken 3, plus 2 controllers, making it an awesome birthday/holiday present!

Sega Genesis/ Mega Drive
This console is extremely worth getting. It has 81 games pre-installed, including Sonic the Hedgehog, Mortal Kombat and more. This console has 2 wired controllers, stereo sound and original controller ports.

Atari Flashback 8
This has an insane amount of games built in. 108! The 108 include Pitfall, Kaboom, River Raid, and more! This comes with 2 wired controllers and plug-and-play on any TV. This is almost as retro as it can get.

Game Boy
The Gameboy is tiny, on-the-go gaming console has surprisingly good games, being one of the tiniest Nintendo consoles out there. These games are like Tetris, Pac-Man, Pokemon Red and Blue and Yellow, Legend of Zelda, and 1041 more. This may be small, but you can basically take it with you anywhere.

Nintendo 64
This was very good for Nintendo's popularity, since it had the first 3D games for this hit game company. Those games include Super Mario 64, LOZ: Ocarina of Time, Super Smash Bros, Mario Kart 64, Banjo-Kazooie, and a lot more. 🐾

Super Kirby Clash

By Wallace Odle

I love video games. I've been playing them for most of my life. I have over 100 video games.

- Some of the games I've been playing this year:**
1. Cuphead
 2. Super Mario Maker 2
 3. SNES online which includes Super Mario World
 4. SUPER KIRBY CLASH

I am going to discuss [drum roll please.] TA-DA!! SUPER KIRBY CLASH! [obviously.] Now I'm going to write about this awesome, free, game.

One reason I like Super Kirby clash is the bosses. Let's see, there are... 108 BOSSES! WHAT!?!?!? Okay?

Now I'm gonna talk about my favorite two bosses.

Aeon Hero
I really like Aeon Hero because he is named, and is the strongest warrior in the Kirby universe and a mysterious masked Kirby [A.K.A Kirby from the future.]

King D-Mind
I like him for 1 reason because, as you will see, once the enemy takes enough damage it gets furious. And when it gets furious, it becomes stronger. After King D-Mind gets furious, he grabs a random gargantuan really-cool axe from another dimension

I also like Super Kirby Clash because of the online party – you get to play with people from all over the world. And also because you usually get good people on hard bosses.

I like super Kirby clash ALSO because Kirby is soooo cute! Just look at him! 🐾

Eddy Pineiro

By Isaac Lefkovitz

The Chicago Bears were playing the Philadelphia Eagles in the first round of the 2018 NFL playoffs. The Eagles were up 17–16 with five seconds left on the clock. The Bears victory would come down to Cody Parkey’s 41 yard field goal attempt. Parkey kicked his field goal and it sailed just left of the goal post so the Bears were out of the playoffs and their great season of 2018 had ended. So of course, they fired Cody Parkey. But now they needed a new kicker. So that’s why they got Eddy Pineiro.

When Eddy Pineiro first joined the NFL he joined the Oakland Raiders. He was placed on injured reserve on September 1, 2018. I’m not completely sure what that is but I’m pretty sure that means he was not playing. Eddy Pineiro left the Oakland Raiders after only one year.

Meanwhile, the Chicago Bears had fired Cody Parkey so they needed a new kicker. They thought Eddy Pineiro looked good so they drafted him. In pre-season Pineiro had missed an extra point against the Tennessee Titans but then he did not miss one field goal or extra point. He even made a winning field goal against the Denver Broncos. The Broncos were winning 16-14 so the Bears had to kick a 53 yard field goal. Piniero made it so the Bears won 17–16. After that Eddy Pineiro continued to never miss a field goal. Until the Chicago Bears played the LA Chargers.

It started with a missed extra point. The Bears had gotten their first touchdown of the game but Pineiro failed to convert. Then at the end of the game the Chargers were winning 17–16. The Bears were somewhere around the 28 yard line. The Bears ran down the clock until there were three seconds left. Then Eddy Pineiro kicked a 41 yard field goal – the same distance Cody Parkey had to kick when the Bears were playing the Eagles. HE MISSED! The Chargers won.

I’m not sure what happened when the Chicago Bears played the Detroit Lions but I know that when the Chicago Bears played the LA Rams (I know, 2 teams from LA) in the first half he missed 2 field goals but made an extra point. I didn’t watch the second half but I heard he missed another field goal.

Eddy Pineiro started out as one of the most promising players on the Chicago Bears and one of the best kickers in the NFL this year. It looked like he would be the MVP (most valuable player), and that he might get the Bears back into the playoffs, but unfortunately for Bears fans, he might not be the player everyone hoped for him to be. Will he suffer the same fate as Cody Parkey, or will he make a turn-around and be what he was at the beginning of the season? Only time will tell... 🐾

EDDY PINEIRO STATS	
Field goal percentage	76.2
Extra point percentage	92.6
Total points	73

Eddy Pineiro

By William Edwards and Sam Zakarin

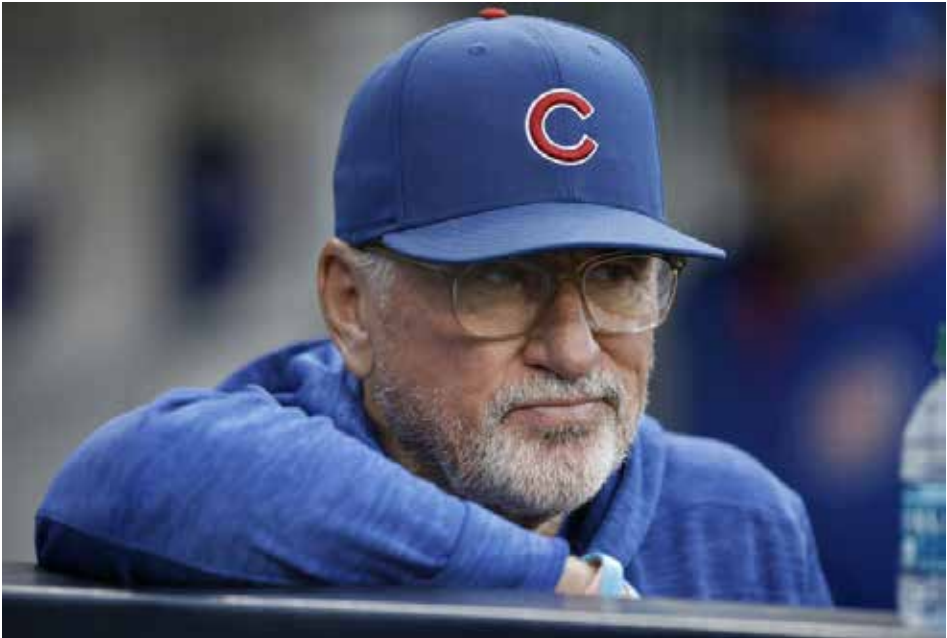

Eddy Pineiro is the Bears’ new kicker. He was born on September 13, 1995 in North Miami Beach, Florida. Eddy Pineiro is 5 feet 11 inches and weighs 176 pounds. The college he went to was Florida University.

Eddy Pineiro went undrafted in 2018 but he signed with the Oakland Raiders. He was the backup kicker for the Raiders. The Raiders’ starting kicker didn’t get injured, so Eddy didn’t get a single kick! The Raiders thought he was worthless so they traded him to the desperate Chicago Bears for a seventh round pick.

That was a terrible trade by the Raiders. Eddy isn’t the best player but he sure is worth more than a seventh round pick. In week two, he got the game winning field goal. Everyone loved him! Eddy Pinerio didn’t know that people would hate him soon.

In week 8 of the NFL season, the Bears were playing the Chargers. The Chargers were heavy underdogs. The quarterback Mitchell Trubisky was terrible in the game, and the Chargers were winning 17–16 with 4 seconds left. Pinerio was on the field for a 48 yard field goal. He blew it. He missed the game winning field goal. Wow. Now people hated him. I don’t blame him. After all, Trubisky was terrible too.

Anyway, the lesson is, kids, Eddy Pinero is pressured every game, so don’t hate him! 🐾

The Cubs Collapse

By Jonah Wright and Charlie Edwards

You might be wondering what the heck happened to the Cubs this year! Well, stay tuned to figure out 5 reasons why the Cubs collapsed.

1. Away games

The Cubs struggled especially on the road. They had 33 wins and 48 losses in away games this year. In 2016 when they won the world series they had 46 wins and only 34 losses on the road. That’s mostly because the pitchers were terrible during away games.

2. Contracts

The Cubs wasted a lot of money on some not great players and that kept us from signing anyone good in the offseason. For example, Tyler Chatwood – a guy who walked 8 people in one game – gets paid more than Kris Bryant and Javier Baez combined! Also, Jason Heyward is one of the highest paid baseball players in the MLB and he is average at best.

3. Fielding

The Cubs had the 26th best fielding. The Cubs have always been bad at fielding, but this was a terrible year– the Orioles, Tigers, and Royals were better.

4. Joe Madden

There were times when it seemed like Joe went to the bullpen for no reason. When a pitcher was doing well, he would pull them and put in someone who was worse, like Tyler Chatwood or Craig Kimbrel.

5. Bullpen

The Cubs’ bullpen was absolute garbage. The stats say the bullpen is good but in the end they always blow us the game. Tyler Chatwood is still terrible and so far Craig Kimbrel has been a huge expensive mistake. Pedro Strop was very disappointing this year and Steve Cizeck was also disappointing. 🐾

Animal Memes

By Ren Opdycke and Benton Kaeding

MMMMM, What’s going on in here?

Doughdogs/ Mutt Butts/ Powder Pups

By Eve Coates and Ryan Levine

We introduce to you the Wonderful World of Harpolandia where dogs and doughnuts live in harmony as one animal, the dough-dog. There are many species of doughdogs. Some species are:

- Glazed greyhound
- Vanilla vizsla
- Coffee corgi
- Strawberry shi tzu
- Chocolate chihuahua
- Powdery poodle
- Boston cream bulldog
- Blueberry beagle
- Labrador long john

Facts about these species:

In the wonderful land of Harpolandia, these delicious dogs love to listen to Oprah Winfrey’s music. They love eating each other because doughdogs’ favorite food is doughnuts. But whenever a doughdog is eaten by another doughdog, they can regrow whatever was eaten off them. Powder pups always eat bacon, eggs, and ground beef. You can buy some tasty mutt butts as a snack or as a pet. If you are looking to adopt a doughdog our adoption agency is called #wehateourjob. Our website is wehateourjob.com. To learn more call...

1800–wehateourjob–573

Powder pup recipe:

1. Find a big bowl
2. Find a dog
3. Put the dog in the bowl
4. Add a doughnut in the bowl
5. Mix until fluffy
6. Add 3 drops of human tears
7. Add 4 pigeon feathers
8. Add 2 toenail clippings
9. Bake in oven for 2 minutes
10. Pour toppings on your powder pup
11. Eat or keep as a pet

WARNING:

If you eat the head of the powder pup, it may be crunchy because of the toenails. If so put them on the grill and grill them for 5 days straight.

Thank you for reading our article. Now go buy your doughdogs, kids! 🐾

Real or Fake ?

Interview with Ms. Barroso/ Entrevista con Sra. Barroso

By/Por By Wayra Sheridan and Angelina Garcia

What do you like to do in your spare time?
Qué haces en tu tiempo libre?
Dance, sing, cook, EAT
Bailar, cantar, cocinar, COMER

What did you do before teaching?
Qué hicistes antes de enseñar?
Worked in a store as a cashier
Trabajé en tienda como un persona de registrador

Did you do any sports, and what sports?
Hicistes algunos deportes y cuál deportes?
Soccer, a long long time ago
Soccer, hace mucho mucho tiempo

What is your favorite food?

HAPPY HOLIDAYS!

SEE YOU NEXT YEAR!

Interview with Evanston’s Games & Cafe Owner!

By Silvio Duarte and Marlowe Flores

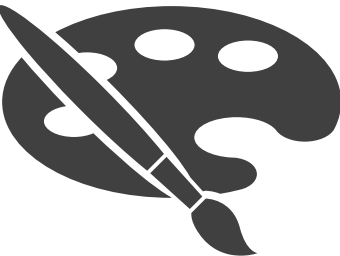

What is your name? Eli	How much time do you work every week? 65 hours
What is your favorite game? <i>Go</i> – it’s the oldest game in the world.	What languages do you know ? English and a little Spanish
What is your favorite food? Corn beef sandwiches.	What is your favorite comic book? I don’t read comics.
What is your favorite restaurant? The Celtic Knot.	Why is your store called Games & Cafe? Because there are games, food and drinks.
What made you decide to open this cafe? A friend said, “I am bored, can you take over?” I wanted people to have a place to be together.	What did you do when you were a kid? Play games.
What can people do at your cafe? Eat, drink, and play games	How many years have you owned this cafe? Almost 3 years.
If a kid wants to start a business like you did, what do they need to learn? Everything!	If you had a superpower, what would it be? Flying and keeping warm.
Where did you grow up? Northbrook	What superhero is your favorite ? Iron Man
	Evanston Games & Cafe is located at 1610 Maple Ave. 🐾

Interview with Ms. Mattox, Art Teacher

By Brinley Mason

Who is Mrs. Mattox? I am an art teacher here at Dewey Elementary School.	What did she want to be when she grew up? Did she want to be an art teacher? I didn’t think about becoming an art teacher when I was young. I loved to draw build-ings and floor plans and wanted to be an architect. When I went to college I fell in love with art history and studio arts. That’s when my career goals started to change.
Which gender is he/she? I am a girl and use the pronouns she, her, and hers.	Which college did she go to? I went to 2 colleges: Colby College in Waterville, ME and The University of Colorado, Boulder, CO.
How old is she? I don’t think about my age because I feel young.	Did she have a job before being an art teacher? Before I became an art teacher, I worked in advertising as an account executive. It was fun but I wanted to work with children, so I made a career change. I went to graduate school, got my Masters of Arts in Teaching, and got a job teaching middle school language arts. I was really excited when a position to be an art teacher became avail-able and I got it!! Art is my passion. 🐾
How many years did she work at Dewey? This is my 4th year teaching art at Dewey.	
Where was she born? I was born in Cleveland, Ohio.	

Interview with Mr.Spicuzza, Kindergarten Teacher

By Sadie Skeaff and Lakshmi Hoff-Sharma

How long have you been teaching? 23 years.	What is your favorite animal and why? Turtles because” Turtle” was my brother’s nickname.
How old are you? 48.	Did you teach anywhere before Dewey? 6 other schools.
What is your favorite food? Sushi.	Where do you want to go on vacation? Athens, Greece.
Do you have a pet? 2 dogs.	Thank you for reading this article!!!! We hope you learned something about Mr.Spicuzza!!!!!! 🐾
What is your favorite color? Purple.	

Interview with Mrs. Borree, Librarian

By Chiara Murillo and Emily Rauh

How long have you been teaching at Dewey? I have been at Dewey for nine years and have been a teacher for 20 years (Yikes, that is a long time!!).	What is one of your favorite children’s books? When I was a little girl I used to love looking at the illustrations in the book <i>On Market Street</i> by Arnold and Anita Lobel. I have it at Dewey and I still open it up from time to time and enjoy the incredible artwork.
	How many new books do you get each year? On average I probably order about 250–300 new books every year.
Why did you choose to become a librarian? I went to graduate school for Instructional Technology and added a Librarian Certifi-cation to my program to give me more job options. I feel like being a librarian chose me! Before I became a librarian I was a 7th grade Social Studies teacher in Wisconsin and when I moved to Illinois to live with my now husband I was hired as a librarian because I had the certification.	How many books do you find unchecked out each year? Well, I “weed” books, which means that I look at the books that have not been checked out for a long time. I let the Dewey students take them home if they would like at the end of the year and so there are about 500 books I have to weed. I weed so that the students stay interested in the books in the Dewey Library. After all, this school is very old.
What is your favorite banned and/or challenged book? * My favorite is <i>Are You There God It’s Me Margaret</i> by Judy Blume!!!	As a child, what did you want to be when you grow up? When I was seven, I watched Mary Lou Retton in the Olympics and I wanted to be a gymnast. When I was 11, I had a major growth spurt and my dreams were crushed. I also wanted to be a singer or doctor.
Has/what book(s) have been banned at Dewey? I don’t know of any books that have been banned at Dewey or in District 65. <i>Skeleton Man</i> by Joseph Bruchac was challenged at the district level a few years ago but it was not removed from any library.	Is it fun being a librarian?! I think so!!! I feel like the library is the happiest place at Dewey!
Do you know of anyone who has challenged a book? There was a challenge by a D65 parent a few years ago.	<i>*A banned book is a book that has been chal-lenged and banned. When someone challenges a book, it is because it might have had some-thing against religion, culture, race, unwanted words, or LGBTQIA+, etc. People stand up for these challenged books, and sometimes the books don’t get banned, but sometimes they do. But it makes the world a little better, when you do stand up for a book.</i>
	Thank you Ms. Boree! Now we know the opinion of a librarian! Thank you for run-ning the Dewey library! 🐾

Astronaut Mark Kelly, Running for U.S. Senate in Arizona

By Vikram Kelly

Captain Mark Kelly is a retired U.S. Navy combat pilot, engineer, and a NASA astronaut. He is running for U.S. Senate in Arizona. He is running as a Democrat for the Senate seat currently held by Republican Martha McSally. Kelly is married to former U.S. Congresswoman Gabby Giffords of Arizona.

In 2011 after U.S. Congresswoman Giffords was shot, Kelly stated he believed there was a chance to change a political environment he believed was filled with a lot of chaos. In 2019, Mark Kelly announced his candidacy for U.S. Senate stating he is running “because Washington is broken and Arizonans deserve independent leadership focused on solving problems.”

Mark Kelly is an advocate for common-sense, effective gun laws and he wants to improve our environment and fix our broken immigration system. He learned how to solve really tough problems while being in the Navy and a part of NASA. He also learned to get along with and lead people from different backgrounds and different opinions in service of a greater mission.

I had the honor of meeting Captain/ Astronaut Mark Kelly recently and if I could vote for him, I would! 🐾

Puppy Palace! Interview with a Wright Way Rescue Employee

By Clara Melson and Maya Mangrich

What is Wright Way Rescue?
We are a no kill shelter, so if an animal comes we provide medical care and they are part of the program until they get a forever home.

Do you have a dog at home?
I just lost my dog a couple of years ago he was 13 and his name was Malomar and he came from the city pound.

How long have you been working here?
A year and a half but I have worked in animal shelters for 15 years.

What is your favorite type of dog?
Siberian Huskys and rescue dogs.

Who is your weirdest customer here?
We appreciate anybody who will help rescue animals.

Did you ever have a dog that did not like kids?
There are dogs that have never been around kids.

And if you did what is its name?
I can't remember one that has actually not liked kids.

When did you start working here?
I started working at WWR in 2015. Then I stopped and came back a month ago.

Why don't you walk the puppies?
To keep the puppies safe from disease. 🐾

Ms. Stanley is Da Best!

By JoJo Levine and Max Colledge

Demon Question: How old are you?
28 years young.

Decent Question: What is your favorite animal?
I really like ducks.

Question that has been asked before: If you could have a super power, what would it be?
The ability to read the minds of my students.

Sports Question: What is your favorite Chicago sports teams?
Chicago Sky (Women's basketball)

Boring Question: Is it hard to have to go to school and work at the same time?
I would say the hardest part is having to teach lessons, plan lessons and grade lessons at the same time and then work extra hours after school.

Okay Question: What's your least favorite food?
Mustard

Awesome Question: Which candy would you go dumpster diving for?
Cheese, it isn't candy, but...

Gross Question: Have you ever had a student puke on you before?
No and I would like to keep it that way.

For once, a Normal Question: What's a hobby you do in your free time?
I play the flute.

Another Normal Question... Psych: Who are your top 2 favorite students? (Let us give you a hint) (US!)
All the students are my favorite students.

We are sorry for the odd questioning! 🐾

Interview with Ms. Colbert, Kindergarten Teacher

By Jessica Rauh, Marit Skwish and Eliza Wright

Ms Colbert is a longtime Dewey kindergarten teacher who has taken the year off from Dewey to be with her new baby and family.

Do you think you are coming back to Dewey?
Maybe, but we'll see what happens.

What is your favorite color?
I love purple.

What is your favorite animal?
I really like dogs and monkeys.

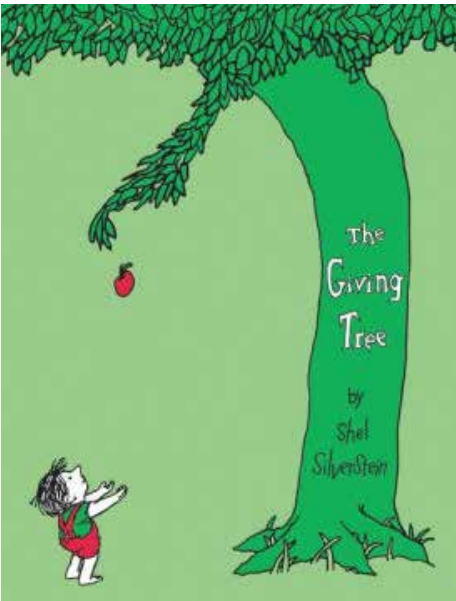

Have you ever taught any other grade than kindergarten?
I taught a half year of preschool but then I spent all my other time at Dewey.

Have you ever had any pets, and if so, which ones?
When I was little I had a gerbil and a rabbit, then, I had Mr. Spiky Bubbles.

What is your favorite food?
I like pizza, sushi, and salad.

If you could go anywhere in the world, where would you go?
I would love to go to Australia.

What are your favorite books?
Matilda and *The Giving Tree* 🐾

Dance for Dewey Fundraiser Help the PTA Meet Their Goal

Dance for Dewey was a huge success last week! Thank you to the Dewey Players, our parent-teacher band, who were amazing. And thank you to Principal Sokolowski for showing us how to really dance on Friday night!

There is still time to help us meet our fundraising goal of \$12,000. We are only a quarter of the way there. **This funding is critical to all the things Dewey PTA supports, including scholarships for before- and after-school activities, school events, field trips, the edible garden, Books & Breakfast, sports and much more.**

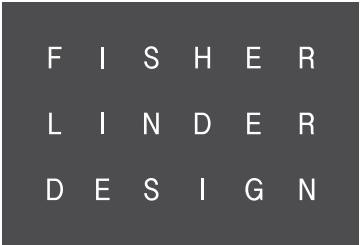

Donate through the PTA's website (www.district65.net/dewey) via CheddarUp. Checks and cash (made payable to Dewey PTA) are also an option, as well as Chase Quick Pay/Zelle (deweypta@yahoo.com).

Tiger Times thanks The Copy Room for its excellent copy services.
