

Parent Friendly Summary of Parent and Family Engagement Plan
Lowell Elementary

We recognize the importance of involving parents in the education of our students. We believe a shared responsibility between the school and the family is essential to increasing student achievement. A Parent and Family Engagement Plan has been developed to foster the relationship between school and home. Elements of our plan include: communication, recommended roles of parents, students, and the school, opportunities for parental involvement, the shared responsibility for high academic achievement, and a system for parental partnerships in decision making. Our ultimate goal is to create a culture of care and academic excellence in which teachers and parents work together to meet the needs of all the students in our school. The detailed plan is located at
