

2023-2024

## Extended Learning Programs

# *Launch Your Future Career Today*

Welcome to the Extended Learning Programs! We are so glad that you are interested in taking a certification course, training program or college course that will help you prepare for a future job.

The extended learning programs are designed to help increase awareness of career options and the academic, technical and employability skills that align with many types of jobs within different career fields.

The programs may be offered during the regular school day, after school and during the 2024 summer months. The programs will be offered on-site at district campuses, through on-line courses and programs offered at local industry and medical training facilities at little or no cost to RPS students. Additional programs may also be added to align with student interest and preparation for future careers. Grade levels have been noted for several programs.

Students may register for one course or program. Upon completion of the first course and final assessments, students may have the opportunity to register for a second course, if funds are available.

Please let us know if there is anything that we can do to help you as you select programs that will become part of a career pathway to a future job!

More Information can be found on the [launchyourfuture.net](https://launchyourfuture.net) website or by contacting Tiauna Young, Director of Career & Technical Education at [tiauna.young@rpsar.net](mailto:tiauna.young@rpsar.net)
