District Strategic Plan Update

APRIL 25, 2022

This presentation includes recommendations related to the district's Strategic Plan.

Overview

- The final year of our previous five-year strategic plan was the 2020-21 school year.
- During the 2019-20 school year, all South Carolina school districts were given flexibility to delay submissions of annual updates to their strategic plans.
- This changed the timelines for some districts' five-year plans.

Overview

- After working through this issue over the last year, the SCDE preference is that districts who were previously on a 2015-16 through 2020-21 strategic plan and delayed submission of the 2019-20 update adopt a timeline of 2022-23 through 2026-27 for their new strategic plans.
- Our district and schools have worked diligently to conduct needs assessments, create goals, and identify strategies and actions that will help them reach those goals.

Recommendation

- The administration recommends that we keep the existing goals, strategies, and actions but **adjust the timeline** in our documents.

Next Steps

- This adjustment would put the district and schools in an even better position from a planning perspective and move us closer to long-term aims related to strategic planning.
- The Accountability Department can make this adjustment to all school and district plans.
