FACILITY CONSTRUCTION

Policy Code: **9030**

Facility construction will be undertaken in accordance with the long-range plan adopted by the board of education and the facility design approved by the board.

Buildings should be constructed with durable materials that, when possible, permit space to be adapted to various purposes and to be adjusted to changes in technology or the educational program.

The board will not accept substandard construction. In the event of insufficient funding for a project, the board will defer implementing parts of the long-range plan.

Any repairs or renovations of school facilities should be undertaken in such a way as to minimize disruption of instructional time and the educational environment.
