

Make some **NOISE** in Audio Production!

Get ready to change your tune! Here's your opportunity to learn all about studio recording, live concert sound, digital audio production, and electronic music. You'll also become familiar with the skills producers need to be successful in the business end of this exciting industry. Either way, the Audio Production program is for you!

Learn how to succeed in an industry that continues to change and grow. With our state-of-the-art equipment, you will learn how to take charge of your recording sessions and live music events.

Advanced college/trade school credit is available to qualifying students from the following institutions:

COURSE TITLE: **AUDIO PRODUCTION**

COURSE DESCRIPTION

Audio Production is designed to give the student exposure to basic audio production techniques. This will be inclusive of live sound reinforcement, multi-track audio recording, as well as electronic instrumentation operation and composition basics. The student will play an active role as audio technician, engineer and producer, learning the fundamentals using industry standard equipment such as audio mixing consoles, microphones, digital tape recorders as well as virtual multi-tracking and editing systems. Instruction will also cover equipment installation and maintenance. Students will write, produce, engineer, mix and master their own projects. These projects include sound reinforcement for theater and musical performance, sound mixing for in-studio television production and post-production and original soundtrack composition for film, television and the music industry.

COURSE CONTENT
