

LAKELAND INVENT IDAHO

Designing Your Display Board

Your display board is an opportunity for you to highlight the most important aspects of your invention process, show off your creativity, and market your product. This is an example of what a Display Board might look like, but you can make it look however you want. This is your invention and your display, so use your creativity to tell the story of your invention the way you want.

Be sure you use:

- Fonts that are readable (in style, size, and color)
- Colors that look good together
- Shapes that are the right size for the board
- Correct grammar and spelling
- Proper punctuation

Your Display Board should contain the following information on the back of the poster:

- Student(s) Name(s)
- Project Name
- Student(s) Grade(s)
- Student(s) School

You might also want to add:

- Images showing you building or testing the invention
- Information on how the invention was made
- How the invention is used
- Text that supports and explains any pictures, drawings, charts, etc.
- Testimonials from users and/or research results
- Any other information about the invention that will help explain it, what it does, or why it is good
