

Guest/Vendor Technology Information

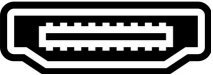

Most facility locations that are equipped with Audio and Video systems are generally standard across the district. Steamboat Springs School District RE-2 is a Chromebook and Windows PC environment, adapters or additional cables for other types of devices may be limited or unavailable.

Common Areas, Auditoriums, Gymnasiums

Most of these areas in all facilities are equipped with a Projection system or Large Television, room audio, and voice amplification systems such as microphones.

If you need one of these systems to present please confirm with your district point of contact that the area you are presenting in is equipped with one or all of these systems.

These locations would have connection types similar to these.

HDMI 	HDMI Provided cable or wall input jack for video display
	1/8" Aux Cable Provided cable or wall input jack for in room Audio and music
	USB A (Limited Locations) Provided cable or wall input jack for Touch Screen Panels (Optoma/SMART boards)
	WiFi WiFi is available in most Campus locations. <i>*See WiFi information for Guests/Vendors</i>
	Microphones A provided microphone for voice amplification.

WiFi Information for Guests/Vendors

WiFi is available at most of our Facilities through our passwordless open network **SSSD-Guest** please be advised that some sites may not function for you as this network is intended for all Staff, Students and Guests and is filtered for student access as required by law. This network is also throttled to **20 mbps per device**.*

- Network congestion in public/common spaces may impact Access Points at times causing slower than normal speeds and maybe no internet connections at all.

Our security measures in place do not allow outside personal devices on our internal secured network at this time. It is always a good idea to download your presentation to a USB drive, or your local device to prevent issues with internet connectivity during your presentation(s).
