

Your child at 3 years

Child's Name _____

Child's Age _____

Today's Date _____

Milestones matter! How your child plays, learns, speaks, acts, and moves offers important clues about his or her development. Check the milestones your child has reached by age 3. Take this with you and talk with your child's doctor at every well-child visit about the milestones your child has reached and what to expect next.

What most children do by this age:

Social/Emotional Milestones

- Calms down within 10 minutes after you leave her, like at a childcare drop off
- Notices other children and joins them to play

Language/Communication Milestones

- Talks with you in conversation using at least two back-and-forth exchanges
- Asks "who," "what," "where," or "why" questions, like "Where is mommy/daddy?"
- Says what action is happening in a picture or book when asked, like "running," "eating," or "playing"
- Says first name, when asked
- Talks well enough for others to understand, most of the time

Cognitive Milestones (learning, thinking, problem-solving)

- Draws a circle, when you show him how
- Avoids touching hot objects, like a stove, when you warn her

Movement/Physical Development Milestones

- Strings items together, like large beads or macaroni
- Puts on some clothes by himself, like loose pants or a jacket
- Uses a fork

Other important things to share with the doctor...

- What are some things you and your child do together?
- What are some things your child likes to do?
- Is there anything your child does or does not do that concerns you?
- Has your child lost any skills he/she once had?
- Does your child have any special healthcare needs or was he/she born prematurely?

You know your child best. Don't wait. If your child is not meeting one or more milestones, has lost skills he or she once had, or you have other concerns, act early. Talk with your child's doctor, share your concerns, and ask about developmental screening. If you or the doctor are still concerned:

1. Ask for a referral to a specialist who can evaluate your child more; and
2. Call any local public elementary school for a free evaluation to find out if your child can get services to help.

For more on how to help your child, visit [cdc.gov/Concerned](https://www.cdc.gov/Concerned).

Don't wait.
Acting early can make
a real difference!
